Contents

Antibiotic Resistance and Implications for the Appropriate Use of Antimicrobial Agents 1
Meredith Deutscher and Cindy Friedman

Part I Significant Pathogens

Antimicrobial Resistance Among Epidemiologically Important Gram-Positive Bacteria 33
Cassandra D. Salgado

Gram-Negative Bacteria 45
Craig A. Martin

Tuberculosis 61
Vidya Sundareshan and Martin E. Evans

Community-Acquired Viral Infections 79
Chris Parsons

Influenza 109
Christian Sandrock

Invasive Fungal Infections 127
Javeed Siddiqui

Part II Evidence-Based Management of Infectious Diseases

Upper Respiratory Infections and Acute Bronchitis 151
Arch G. Mainous III and William J. Hueston

Pneumonia 169
Hien H. Nguyen

Urinary Tract Infections 183
Dimitri M. Drekonja and James R. Johnson

Sexually Transmitted Diseases 195
Alice C. Thornton, Bojana Stevich, Janet N. Arno, and Barbara Van Der Pol

Gastrointestinal Tract Infections 231
Robert E. Post and Barry L. Hainer

Endocarditis 267
Eric Matheson

Infections of the Central Nervous System 283
Nicoline Schiess and Avindra Nath

Uncomplicated Skin and Soft Tissue Infections 301
Ivar L. Frithsen and Cassandra D. Salgado

Septic Arthritis and Osteomyelitis 313
Camelia E. Marculescu

Human Immunodeficiency Virus (HIV): Acquired Immune Deficiency Syndrome (AIDS) 327
Frank Romanelli

Part III Special Considerations

Strategies for Optimal Antimicrobial Use 345
Arch G. Mainous III and Paul Little

Infections in the Immunocompromised Host 361
Cristina Baker and Vicki A. Morrison

Future Trends in Antimicrobial Use 377
Arch G. Mainous III

Subject Index 387
