

The Cambridge Handbook of Environment in Human Development

Families, communities, and societies influence children's learning and development in many ways. This is the first handbook devoted to the understanding of the nature of environments in child development. Utilizing Urie Bronfenbrenner's idea of embedded environments, this volume looks at environments from the immediate environment of the family (including fathers, siblings, grandparents, and day-care personnel) to the larger environment (including schools, neighborhoods, geographic regions, countries, and cultures). Understanding these embedded environments and the ways in which they interact is necessary to understand development.

Dr. Linda C. Mayes is the Arnold Gesell Professor of Child Psychiatry, Pediatrics, and Psychology in the Yale Child Study Center, a department in the Yale School of Medicine. She is also a member of the directorial team of the Anna Freud Centre, London. As a clinical investigator she works at the interface of three fields – pediatrics, developmental psychology, and child psychiatry. Formally trained as a pediatrician and neonatologist, in her work Dr. Mayes integrates perspectives from child development, behavioral neuroscience, psychophysiology, neurobiology, developmental psychopathology, and neurobehavioral teratology. She is the author of nearly 200 peer-reviewed papers and more than 100 chapters and reviews. Dr. Mayes is the author of a book for parents, *The Yale Child Study Center Guide to Understanding Your Child*. She is also special adviser to the dean in the Yale University School of Medicine and a member of the National Scientific Council on the Developing Child.

Michael Lewis is University Distinguished Professor of Pediatrics and Psychiatry and Director of the Institute for the Study of Child Development at Robert Wood Johnson Medical School, University of Medicine and Dentistry of New Jersey. He also is Professor of Psychology, Education, Cognitive Science, and Biomedical Engineering at Rutgers University. Dr. Lewis has published more than 300 articles in scientific journals and has written or edited more than 35 books, including *Social Cognition and the Acquisition of Self* (1979), *Children's Emotions and Moods: Developmental Theory and Measurement* (1983), *Shame: The Exposed Self* (1992), and *Altering Fate: Why the Past Does Not Predict the Future* (1997). He edited the *Handbook of Developmental Psychopathology*, second edition (2001) and the *Handbook of Emotions*, third edition (2009). He recently won the Urie Bronfenbrenner Award from the American Psychological Association for Lifetime Contribution to Developmental Psychology in the Service of Science and Society.

Notes on Contributors

THOMAS M. ACHENBACH
Thomas M. Achenbach, Ph.D., is Professor of Psychiatry and Psychology and President of the nonprofit Research Center for Children, Youth, and Families at the University of Vermont. His research currently focuses on multicultural assessment and epidemiology of psychopathology and adaptive functioning from age one to ninety-plus years.

MARC H. BORNSTEIN
Marc H. Bornstein, Ph.D., is Senior Investigator and Head of Child and Family Research at the Eunice Kennedy Shriver National Institute of Child Health and Human Development. Bornstein has published in experimental, methodological, comparative, developmental, and cultural science as well as neuroscience, pediatrics, and aesthetics. Visit www.cfr.nichd.nih.gov and www.tandfonline.com/HPAR.

W. THOMAS BOYCE
W. Thomas Boyce, M.D., is the Sunny Hill Health Centre/BC Leadership Chair in Child Development at the University of British Columbia. He is also Co-Director of

the Experience-Based Brain and Biological Development Program of the Canadian Institute for Advanced Research, a member of the Institute of Medicine, and a member of Harvard University's National Scientific Council on the Developing Child.

ROBERT H. BRADLEY
Robert H. Bradley, Ph.D., is Professor and Director of the Family and Human Dynamics Research Institute at Arizona State University. Former Associate Editor for *Child Development and Early Childhood Research Quarterly*, in his research he focuses on parenting, the impact of home environment on child well-being, child care, early education, and the measurement of children's environments. He was an investigator in the NICHD Study of Early Child Care and Youth Development and the Early Head Start Research and Evaluation Study.

KELLY BRIDGES
Kelly Bridges is an adjunct faculty member and Ph.D. student in the Department

of Communicative Sciences and Disorders at New York University, where she is studying the speech and language of adults who have neurological disease and psychiatric disorders. She received her master's degree in experimental psychology with a focus on child language acquisition from Florida Atlantic University in 2008, and her bachelor's degree in psychology from Loyola University Maryland in 2006.

JEANNE BROOKS-GUNN

Jeanne Brooks-Gunn, Ph.D., is the Virginia and Leonard Marx Professor of Child Development at Columbia University's Teachers College and the College of Physicians and Surgeons. Brooks-Gunn is a Developmental Psychologist and a member of the National Academy's Institute of Medicine. She directs the National Center for Children and Families at Columbia University. Her work focuses on the development and health of children and youth, with special foci on how families, schools, and neighborhoods influence development; on how children from poor, single-parent, or low-education families fare; and on how policies and programs can enhance well-being.

BRENDA K. BRYANT

Brenda K. Bryant, Ph.D., is Professor Emeritus of Human Development at the University of California, Davis. Her research focuses on children's sources of support in the family, school, and community and their relationship to social-emotional functioning in middle childhood. In addition, she is finalizing a longitudinal study that addresses these issues in middle childhood in relation to vocational and social-emotional development in adulthood.

SANDRA L. CALVERT

Sandra L. Calvert, Ph.D., is a Professor of Psychology at Georgetown University. She is also the Co-Founder and Director of the Children's Digital Media Center, which hosts an interdisciplinary group of scholars who are funded primarily by the National Science Foundation. Professor Calvert's

current research focuses on the role of digital media, particularly the characters who populate onscreen stories, in the lives of children and youth.

SCOTT COLTRANE

Scott Coltrane, Ph.D., is Dean of the College of Arts and Sciences and Professor of Sociology at the University of Oregon. His research focuses on fathers, families, social inequalities, and gender equity.

E. MARK CUMMINGS

E. Mark Cummings, Ph.D., is professor and Notre Dame Endowed Chair in Psychology at the University of Notre Dame, in his research interests focuses on family factors, especially socioemotional processes, associated with normal development and the development of psychopathology in children.

STACEY B. DAUGHTERS

Stacey B. Daughters, Ph.D., is an assistant professor in the Department of Behavioral and Community Health and Director of the Stress, Health, and Addiction Research Program (SHARP) at the University of Maryland, College Park. Her research interests include understanding the interaction of neurobiological and behavioral determinants of stress and addiction and the translation of this knowledge into effective prevention and intervention programs.

CINDY DECOSTE

Cindy DeCoste is a Research Associate in the Department of Psychiatry at Yale University School of Medicine and Project Director for a research program focused on developing and evaluating attachment- and mentalization-based interventions for mothers who have substance abuse disorders.

MARC DE ROSNAY

Marc de Rosnay, Ph.D., Department of Psychology, University of Sydney, Australia, specializes in the development of emotional competence during infancy and early childhood.

NOTES ON CONTRIBUTORS

xi

JACQUELYNNE S. ECCLES

Jacquelynne S. Eccles, Ph.D., is the McKeachie/Printrich Distinguished University Professor at the University of Michigan, Ann Arbor. She is past President of Division 35 (Psychology of Women) of the APA and of the Society for Research on Adolescence, past Editor of the *Journal of Research on Adolescence*, and current Editor of *Developmental Psychology*. Her research focuses on development in the second two decades of life with particular focus on the Eccles Expectancy Value Model of Achievement-Related Choices and on the contextual influences on social and achievement-related developmental trajectories.

HADAS EIDELMAN

Hadas Eidelman is a doctoral student at the Harvard Graduate School of Education. Hadas has a long background of work in early childhood education, including teaching, administrating, and facilitating infant and early childhood art programming. Currently, Hadas' research involves longitudinal statistical modeling of family mental health and social emotional outcomes in children.

RUTH FELDMAN

Ruth Feldman, Ph.D., is a Professor of Psychology and Neuroscience at Bar-Ilan University, Israel and director of a community clinic for parents and young children. Her research focuses on the neurobiology of affiliation; biobehavioral aspects in disorders associated with maternal-infant bond formation including prematurity, postpartum depression, and childhood PTSD; children's social-emotional development; and methods for the observation of social interactions between attachment partners.

PETER FONAGY

Peter Fonagy, Ph.D., F.B.A., is Freud Memorial Professor of Psychoanalysis and Head of Department, Research Department of Clinical, Educational and Health Psychology at University College London and is Chief Executive of the Anna Freud Centre, London. Professor Fonagy is a clinical

psychologist and a training and supervising analyst in the British Psycho-Analytical Society (<http://www.psychanalysis.org.uk/>) in child and adult analysis. His clinical interests center around issues of borderline psychopathology, violence, and early attachment relationships. His work attempts to integrate empirical research with psychoanalytic theory.

WALTER S. GILLIAM

Walter S. Gilliam, Ph.D., is an associate professor of child psychiatry and psychology at the Yale Child Study Center and Director of the Edward Zigler Center in Child Development and Social Policy. His research involves policies regarding early childhood education and child care, methods to improve the quality of early childhood services, the impact of early childhood education programs on children's school readiness, and early childhood mental health consultation.

ANDREA L. GOLD

Andrea L. Gold, M.S., M.Phil., is a doctoral student in the Department of Psychology at Yale University. Her research interests focus on neurobiological mechanisms of emotion-cognition interactions underlying risk for psychopathology following exposure to traumatic life events, including childhood maltreatment.

ELENA L. GRIGORENKO

Elena L. Grigorenko, Ph.D., is Emily Fraser Beede Associate Professor of Developmental Disabilities, Child Studies, Psychology, and Epidemiology and Public Health at Yale University.

SARA HARKNESS

Sara Harkness, Ph.D., M.P.H., is Professor of Human Development, Pediatrics, and Public Health at the University of Connecticut, where she also is Director of the Center for the Study of Culture, Health, and Human Development. Her research focuses on the cultural organization of children's environments and its implications for policies and programs in health and education.

SYBIL L. HART

Sybil L. Hart, Ph.D., is Professor of Human Development and Family Studies at Texas Tech University. She received her Ph.D. in Psychology from Tufts University and recently edited *Handbook of Jealousy: Theory, Research and Multidisciplinary Approaches* (Wiley-Blackwell, 2010).

JESSICA S. HENRY

Jessica S. Henry, M.A., is currently a doctoral student in the Clinical Psychology program in the Department of Psychology at the George Washington University. She received her bachelor's degree in psychology from Howard University and her master's degree in clinical psychology with a Specialization in Psychology of Education from Teachers College, Columbia University. Her research interests are identifying race and culturally relevant sources of protection for youth exposed to stressful experiences and traumatic life events.

ERIKA HOFF

Erika Hoff, Ph.D., is Professor of Psychology at Florida Atlantic University. Her research examines the effects of socioeconomic status and dual-language input on early language development. Her books include *The Blackwell Handbook of Language Development* (with Marilyn Shatz, Blackwell, 2007), *Childhood Bilingualism: Research on Infancy through School Age* (with Peggy McCardle, Multilingual Matters, 2006), *Research Methods in Child Language*, and *Language Development* (Wiley-Blackwell, 2012). She is currently Associate Editor of *Child Development* (Cengage, 2013).

TOM HOLLENSTEIN

Tom Hollenstein received his Ph.D. at the University of Toronto in 2005 and is currently an Associate Professor in the Developmental Psychology program at Queen's University in Kingston, Ontario, Canada. His research foci are adolescent emotional development and dynamic systems approaches.

STEPHANIE M. JONES

Stephanie M. Jones' basic developmental research focuses on the longitudinal effects

of poverty and exposure to violence on social and emotional development in early childhood and adolescence. In addition, she conducts evaluation research focusing on the developmental impact of school-based interventions targeting children's social-emotional skills and aggressive behavior, as well as their basic academic skills.

JULIA KIM-COHEN

Julia Kim-Cohen, Ph.D., is Assistant Professor of Psychology in the Department of Psychology at Yale University. Dr. Kim-Cohen received her Ph.D. in Clinical Psychology from the University of Rochester and was a postdoctoral trainee at the Social, Genetic, and Developmental Psychiatry Centre at the Institute of Psychiatry, King's College London. Her research focuses on genetic and environmental influences on risk for disruptive behavior problems and resilience in children exposed to maternal depression and maltreatment.

PAMELA K. KLEBANOV

Pamela K. Klebanov, Ph.D., is a Senior Research Scientist at the National Center for Children and Families at Columbia University's Teachers College and a Visiting Research Collaborator at Princeton University's Center for Research on Child Wellbeing. Klebanov's research focuses on the effects of poverty and risk factors on child health and development.

BRETT LAURSEN

Brett Laursen, Ph.D., is Professor of Psychology and Director of Graduate Training at Florida Atlantic University and Docent Professor of Social Developmental Psychology at the University of Jyväskylä, Finland. He has authored numerous papers on parent-child and peer relationships and edited several volumes on adolescent development and developmental methodology, the most recent of which are *Relationship Pathways: From Adolescence to Young Adulthood* (with Andy Collins, Sage, 2012) and *The Handbook of Developmental Research Methods* (with Todd Little and Noel Card, Guilford, 2012). He is a recipient

of an Honorary Doctorate from the Orebro University, Sweden, and he is currently Editor of the Methods and Measures section of the *International Journal of Behavioral Development*.

MARY J. LEVITT

Mary J. Levitt, Ph.D., is a Professor in the Developmental Science program, Department of Psychology at Florida International University, with a focus on the development of social relationships across the life span. Her current research addresses social network change and postmigration adaptation of newly immigrant children and adolescents. She received her Ph.D. from the Life Span Developmental Psychology program at Syracuse University.

ALICIA F. LIEBERMAN

Alicia F. Lieberman, Ph.D., is Professor and Vice-Chair for Academic Affairs at the University of California San Francisco Department of Psychiatry. She holds the Irving B. Harris Endowed Chair in Infant Mental Health and is Director of the Child Trauma Research Program at San Francisco General Hospital.

SHOON LIO

Shoon Lio, Ph.D., is an assistant professor of sociology/anthropology at the University of Illinois, Springfield. His interests include neighborhood context for sociopsychological development and civic engagement, political sociology, collective memory, and social psychology.

JESSICA F. MAGIDSON

Jessica F. Magidson, M.S., is a doctoral student in the Clinical Psychology program at University of Maryland, College Park. Her research and clinical interests focus on treatment development for substance use and depression comorbidity as well as improving HIV medication adherence.

ANN S. MASTEN

Ann S. Masten, Ph.D., LP, is a Distinguished McKnight University Professor in the Institute of Child Development at the University

of Minnesota. She directs the Project Competence studies of risk and resilience; is President of the Society for Research in Child Development (2011–2013); and is a member of the Board on Children, Youth and Families of the Institute of Medicine/National Academies.

DAVID L. MOLFESE

David L. Molfese, Ph.D., completed graduate training in both molecular and cognitive neuroscience. He is currently a postdoctoral Fellow at the University of Houston.

PETER J. MOLFESE

Peter J. Molfese, Ph.D., completed his graduate work at the University of Houston in Developmental Cognitive Neuroscience and is now a postdoctoral associate at Yale School of Medicine and Haskins Laboratories, New Haven. He specializes in learning and language development as well as neuroimaging theory, methods, and statistics.

LYNNE MURRAY

Lynne Murray, Ph.D., is affiliated with the School of Psychology and Clinical Language Sciences at the University of Reading in the United Kingdom. Professor Murray's research focuses on the impact of parental psychiatric disorders on child development. She has published widely on the influence of postnatal depression on child development and the intergenerational transmission of psychopathology.

JELENA OBRADOVIĆ

Jelena Obradović, Ph.D., is an assistant professor at Stanford University in the Developmental and Psychological Sciences program in the School of Education. Dr. Obradovic's research focuses on how contextual risk and adversity influence children's adaptation across multiple domains of functioning over time. She studies how individual differences in children's physiological reactivity and self-regulatory abilities enable some disadvantaged children to demonstrate remarkable resilience, while placing others at risk for maladaptive outcomes.

LAUREN M. PAPP

Lauren M. Papp, Ph.D., is the assistant Professor in the Department of Human Development and Family Studies at the University of Wisconsin. He has research interests that include intimate relationship quality and psychological distress, interparental conflict and child development, and quantitative methods and modeling of family and relationship processes.

ROSS D. PARKE

Ross D. Parke, Ph.D., is a distinguished professor of psychology, Emeritus, and past director of the Center for Family Studies at the University of California, Riverside. His interests include fatherhood, the relation between families and peers, ethnic variation in families, and the impact of the new reproductive technologies on families. His current project is a book entitled *Future Families: Diverse Forms, Rich Possibilities*.

YAACOV PETSCHER

Yaacov Petscher, Ph.D., is the Director of Research at the Florida Center for Reading Research. He is interested in the assessment, measurement theory, and the study of individual differences in literacy research assessment.

AELIESA PISCIELLA

Aelesia Pisciella received her Ph.D. in Applied Developmental Psychology from Fordham University. At Fordham, her research focused on mothers' participation in family leave on children's and mothers' well-being, as well as an examination of the links between maternal employment and the quality of parent-child relationships. She has also conducted research on the economic and housing instability of young children and families to determine how these early experiences impacted children's social-emotional development.

ALIZA W. PRESSMAN

Aliza W. Pressman, Ph.D., is a clinical instructor in the Department of Pediatrics in the Division of Behavioral and Developmental Health at the Mount Sinai School of

Medicine, where she teaches behavior and child development and investigates and designs parent education programs for at-risk mothers. She was previously a Fellow at the National Center for Children and Families at Teachers College, Columbia University.

SARAH RABBITT

Sarah Rabbitt, M.S., M.Phil, is a doctoral student in the Clinical Psychology program in the Department of Psychology at Yale University. Her research interests include developing ways to improve access to evidence-based treatment for children and adolescents who have behavior disorders.

CRAIG T. RAMEY

Craig T. Ramey, Ph.D., is the Distinguished Research Scholar of Human Development at the Virginia Tech Carilion Research Institute, Professor of Psychology at Virginia Tech, and Professor of Pediatrics at the Virginia Tech Carilion School of Medicine. He specializes in the study of factors affecting children's health and the development of intelligence, social competence, and academic achievement. Over the past forty years he and his wife, Sharon Landesman Ramey, have conducted multidisciplinary longitudinal research with more than 100,000 children in more than forty states. He is the Founding Director of several frequently cited early intervention programs, including the Abecedarian Project, Project CARE, and the Infant Health and Development Program, and currently serves as the Chief Science Officer for the statewide preschool educational program for preK children in Louisiana.

SHARON LANDESMAN RAMEY

Sharon Landesman Ramey, Ph.D., is Distinguished Research Scholar of Human Development at the Virginia Tech Carilion Research Institute, Professor of Psychology at Virginia Tech, and Professor of Psychiatry at the Virginia Tech Carilion School of Medicine. She is a developmental scientist who studies the multiple biosocial and environmental influences on prenatal and early child development, the transition to school and academic achievement, family dynamics, and

NOTES ON CONTRIBUTORS

xv

intergenerational vitality and competence. She is engaged in multiple large-scale and multi-site trials to improve the health and education outcomes of vulnerable children, including children from challenging life circumstances and children who have disabilities.

JESSICA M. RICHARDS

Jessica M. Richards, M.S., University of Maryland College Park, Department of Psychology, is a graduate student in the doctoral program in Clinical Psychology.

ROBERT W. ROESER

Robert W. Roeser is Professor of Psychology and Human Development in the Department of Psychology at Portland State University in Portland, Oregon. Dr. Roeser's expertise is in teachers' professional development and school as a primary cultural context of adolescents' motivation to learn, achievement, and identity development. His current research is focused on how contemplative practices like mindfulness and yoga can improve teaching and learning in schools through the effects of these practices on stress reduction, the enhancement of well-being, the sharpening of attention and awareness, and the cultivation of empathy and compassion among educators and students alike.

THOMAS J. SCHOFIELD

Thomas J. Schofield, Ph.D., is a postdoctoral scholar at the University of California, Davis. His interests include the antecedents and consequences of parenting practices, the contexts in which parents attempt to shape child and adolescent development, and ethnic variation in families.

RONALD SEIFER

Ronald Seifer, Ph.D., is Professor of Psychiatry and Human Behavior at Alpert Medical School of Brown University and Director of Research at E. P. Bradley Hospital. Research interests are in the area of developmental psychopathology and public health, with ongoing studies on resilience in maltreated children, early development in the context of preventive interventions for postpartum depression, program evaluation of integration

of mental health in primary care and child care settings, and program evaluation of implementation of nurse home visiting programs. Dr. Seifer received his Ph.D. in developmental psychology from the University of Rochester in 1981. He spent eight years at the Institute for the Study of Developmental Disabilities at the University of Illinois Chicago, before moving to Brown University and E. P. Bradley Hospital in 1986.

ANNE SHAFFER

Anne Shaffer, Ph.D., is an assistant professor of psychology at the University of Georgia. Dr. Shaffer's research focuses on identifying contextual factors at multiple levels of analysis that may mediate or moderate the effects of adversity on outcomes in childhood and adulthood. A current area of research is the sequelae of maltreatment and family stress, with a specific focus on emotional maltreatment.

MICHELLE SLEED

Michelle Sleed is a Senior Research Psychologist at the Anna Freud Centre in London and University College London. Her research focuses on parent-infant relationships and interaction, parental representations, parental mental health, and outcomes of psychotherapeutic interventions for parents and infants. She teaches and supervises in the area of parent-infant research and service evaluation.

LAURA STOUT SOSINSKY

Laura Stout Sosinsky, Ph.D., is an assistant professor of applied developmental psychology in the Fordham University Department of Psychology. Her research involves early childhood development in the contexts of parenting and early care and education; family, industry, and policy contributors to the quality, availability, affordability, and accessibility of child care and early education services; and parental child care decision making.

NANCY E. SUCHMAN

Nancy E. Suchman, Ph.D., is Associate Professor in the Department of Psychiatry and

in the Child Study Center at Yale University School of Medicine. Her clinical research focuses on developing and evaluating attachment- and mentalization-based interventions for mothers who have substance use disorders and psychiatric illnesses.

CHARLES M. SUPER

Charles M. Super, Ph.D., is Professor of Human Development and Pediatrics at the University of Connecticut, where he is Co-Director of the Center for the Study of Culture, Health, and Human Development. His primary research concerns how culture interacts with emerging biological systems to shape early development.

LOUIS TUTHILL

Louis Tuthill, Ph.D., formerly a Social Science Analyst at the National Institute of Justice, is an assistant professor in the Department of Sociology, Anthropology, and Criminal Justice at Rutgers-Camden. He has worked closely with law enforcement agencies in crime mapping, performance measures, and evaluation research. His interests include neighborhood violence, gang activity, illicit firearms and drug trafficking, and juvenile delinquency.

PATRICIA VAN HORN

Patricia Van Horn, Ph.D., is a Clinical Professor at the University of California San

Francisco Department of Psychiatry. She is Director of the Division of Infant, Child, and Adolescent Psychiatry at San Francisco General Hospital and Associate Director of the Child Trauma Research Program.

ERIC VEGA

Eric Vega, Ph.D., is a Resident Scholar in the Center for Family Studies at the University of California, Riverside. His interests include schooling, immigrant families, and the formation of educational capital in ethnic family networks. His current research is on educational policy reform and academic achievement of immigrant children.

SARAH WARD

Sarah Ward is a graduate student in the Clinical Science and Psychopathology Research Program at the University of Minnesota.

MONICA YUDRON

Monica Yudron is a doctoral student at the Harvard Graduate School of Education with more than 15 years of experience in education-related fields including teaching, publishing, and policy making. Her research interests are centered on understanding formal programs of early childhood education and care as primary settings for intervening in the lives of young children facing a variety of poverty-related risks.
