Large Solutions to Semilinear Elliptic Equations with Hardy Potential and Exponential Nonlinearity	1
Catherine Bandle, Vitaly Moroz, and Wolfgang Reichel	
1 Introduction	1
2 Some Definitions and Tools	3
2.1 Sub- and super-harmonics	4
2.2 Hardy constant	5
2.3 Phragmen–Lindelöf alternative	5
2.4 Sub- and super-solutions	6
2.5 Solutions with zero boundary data	8
3 A Priori Upper Bounds	10
4 Nonexistence of Large Solutions if $\mu < 0$	13
5 Asymptotic Behavior of Large Solutions near the Boundary	14
5.1 Global sub-solutions	14
6 Uniqueness and Existence of Large Solutions	16
6.1 Uniqueness	16
6.2 Existence	17
7 Borderline Potentials. Summary and Open Problems	17
7.1 Summary and open problems	21
References	22
Stability Estimates for Resolvents, Eigenvalues, and Eigenfunctions of Elliptic Operators on Variable Domains	23
Gerassimos Barbatis, Victor I. Burenkov, and Pier Domenico Lamberti	
1 Introduction	23
2 General Setting	27
3 Perturbation of ϕ	29
4 Stability Estimates for the Resolvents and Eigenvalues	31
5 Stability Estimates for Eigenfunctions	40
6 On the Regularity of Eigenfunctions	48
7 Estimates via Lebesgue Measure	52

7.1	Local perturbations	53
7.2	Global normal perturbations	56
8	Appendix	57
	References	59
