PREFACE	xi
PART I INTRODUCTION	1
<b>1 OVERVIEW</b>	<b>3</b>
PART II GUIDE TO THE ASCE 7-10 STANDARD PROVISIONS ON WIND LOADS	7
<b>2 ASCE 7-10 WIND LOADING PROVISIONS</b>	<b>9</b>
2.1 Introduction / 9	
2.2 ASCE 7-10 Standard: An Overview / 10	
2.3 Organization of the Guide: Chapters 3 to 9 / 19	
<b>3 REGULAR AND SIMPLIFIED APPROACH: RISK CATEGORY, BASIC WIND SPEED, ENCLOSURE, EXPOSURE, TOPOGRAPHIC FACTOR</b>	<b>21</b>
3.1 Risk Category (ASCE Table 1.5-1) / 21	
3.2 Basic Wind Speed $V$ (ASCE Sect. 26.5, ASCE Figs. 26.5.-1a, b, c) / 22	
3.3 Enclosure Classification (ASCE Sects. 26.2 and 26.10) / 23	

3.4	Exposure Category (ASCE Sect. 26.7) / 24	
3.5	Topographic Factor $K_{zt}$ (ASCE Sect. 26.8, ASCE Fig. 26.8-1) / 27	
<b>4</b>	<b>REGULAR APPROACH: STEPS COMMON TO ALL BUILDINGS/OTHER STRUCTURES (MWFRS AND C&amp;C)</b>	<b>31</b>
4.1	Introduction / 31	
4.2	Regular Approach: Steps Common to All Buildings and Other Structures (MWFRS and C&C) / 32	
<b>5</b>	<b>REGULAR APPROACH: BUILDINGS, PARAPETS, OVERHANGS (“DIRECTIONAL” PROCEDURE), MWFRS</b>	<b>37</b>
5.1	Introduction / 37	
5.2	Regular Approach: Enclosed or Partially Enclosed Buildings of All Heights, MWFRS / 37	
5.3	Regular Approach: Roof Overhangs and Parapets, MWFRS / 53	
5.4	Regular Approach: Open Buildings with Monoslope, Pitched, or Troughed Free Roofs, MWFRS / 55	
<b>6</b>	<b>REGULAR APPROACH: LOW-RISE BUILDINGS, PARAPETS, OVERHANGS (“ENVELOPE” PROCEDURE), MWFRS</b>	<b>57</b>
6.1	Net Pressures on Walls and Roof / 57	
6.2	Comparison Between Results Based on ASCE Sects. 27.4.1 and 28.4.1 / 62	
6.3	Regular Approach: Parapets and Roof Overhangs, MWFRS / 63	
<b>7</b>	<b>REGULAR APPROACH: STRUCTURES OTHER THAN BUILDINGS, MWFRS</b>	<b>65</b>
7.1	Solid Freestanding Walls and Solid Signs / 65	
7.2	Open Signs, Lattice Frameworks, Trussed Towers / 69	
7.3	Chimneys, Tanks, Rooftop Equipment, and Similar Structures / 74	
7.4	Solid Attached Signs / 75	
7.5	Rooftop Structures and Equipment on Buildings / 77	

<b>8</b>	<b>SIMPLIFIED APPROACH: ENCLOSED SIMPLE DIAPHRAGM BUILDINGS, PARAPETS, OVERHANGS (MWFRS)</b>	<b>81</b>
8.1	Simplified Approach: Class 1 Buildings, Walls and Roof, MWFRS / 81	
8.2	Simplified Approach: Parapets, MWFRS / 85	
8.3	Simplified Approach: Roof Overhangs, MWFRS / 85	
8.4	Simplified Approach: Class 2 Buildings, Walls and Roof, MWFRS / 86	
8.5	Simplified Approach: Simple Diaphragm Low-Rise Buildings, MWFRS / 90	
<b>9</b>	<b>REGULAR AND SIMPLIFIED APPROACHES: C&amp;C</b>	<b>95</b>
9.1	Introduction / 95	
9.2	Regular Approach / 95	
9.3	Simplified Approaches / 105	
<b>PART III WIND ENGINEERING FUNDAMENTALS</b>		<b>107</b>
<b>10</b>	<b>ATMOSPHERIC CIRCULATIONS</b>	<b>109</b>
10.1	Atmospheric Hydrodynamics / 109	
10.2	Windstorms / 113	
<b>11</b>	<b>THE ATMOSPHERIC BOUNDARY LAYER</b>	<b>117</b>
11.1	Wind Speeds and Averaging Times / 118	
11.2	Wind Speed Profiles / 121	
11.3	Atmospheric Turbulence / 130	
<b>12</b>	<b>EXTREME WIND SPEEDS AND WIND-INDUCED EFFECTS</b>	<b>137</b>
12.1	Wind Speed Data / 138	
12.2	Cumulative Distributions, Exceedance Probabilities, Mean Recurrence Intervals / 141	
12.3	Parametric Estimates of $\overline{N}$ -Year Wind Speeds; Closed Form Estimators; Software / 143	
12.4	Probabilistic Estimates of Wind Effects Based on Nondirectional and Directional Wind Speed Data / 149	

12.5	Development of Directional Databases of Hurricane Wind Speeds / 153	
12.6	Development of Directional Databases of Non-Hurricane Wind Speeds / 155	
12.7	Non-Parametric Statistics, Application to One-Dimensional Time Series / 157	
12.8	Error Estimates / 159	
<b>13</b>	<b>BLUFF BODY AERODYNAMICS BASICS; AERODYNAMIC TESTING</b>	<b>163</b>
13.1	Introduction / 163	
13.2	Bluff Body Aerodynamics / 163	
13.3	Aerodynamic Testing / 173	
13.4	Low-Frequency Turbulence and Aerodynamic Pressures on Residential Homes / 183	
<b>14</b>	<b>STRUCTURAL DYNAMICS</b>	<b>185</b>
14.1	Introduction / 185	
14.2	The Single-Degree-of Freedom Linear System / 186	
14.3	Continuously Distributed Linear Systems / 190	
14.4	Time Domain Solutions for Three-Dimensional Dynamic Response / 199	
<b>15</b>	<b>AEROELASTICITY</b>	<b>203</b>
15.1	Introduction / 203	
15.2	Vortex-Induced Oscillations / 205	
15.3	Galloping / 206	
15.4	Flutter / 210	
<b>16</b>	<b>STRUCTURAL RELIABILITY UNDER WIND LOADING</b>	<b>217</b>
16.1	Introduction / 217	
16.2	First-Order Second-Moment Approach, Load and Resistance Factors / 220	
16.3	Dependence of Wind Effects on Wind Directionality / 225	
16.4	Structural Strength Reserve / 226	
16.5	Design Criteria for Multi-Hazard Regions / 228	
16.6	Individual Uncertainties and Overall Uncertainty in the Estimation of Wind Effects / 229	
16.7	Calibration of Design MRIs in the Presence of Dynamic Effects or of Large Knowledge Uncertainties / 232	

<b>17</b>	<b>LOSS ESTIMATION</b>	<b>237</b>
17.1	Introduction / 237	
17.2	Elements of Damage Estimation Procedures / 238	
17.3	Loss Estimation / 245	
<b>PART IV</b>	<b>WIND EFFECTS ON BUILDINGS</b>	<b>247</b>
<b>18</b>	<b>RIGID BUILDINGS</b>	<b>249</b>
18.1	Introduction / 249	
18.2	Database-Assisted Design (DAD) / 252	
18.3	Wind Directionality Effects / 258	
18.4	Uncertainties in the Estimation of Wind Effects / 259	
<b>19</b>	<b>TALL BUILDINGS</b>	<b>261</b>
19.1	Introduction / 261	
19.2	High-Frequency Force Balance Approach (HFFB) / 263	
19.3	Aeroelastic Effects. Testing Based on Strain Measurements / 265	
19.4	Database-Assisted Design / 269	
19.5	Serviceability Requirements / 278	
19.6	Preliminary Estimates of Flexible Building Response / 279	
<b>PART V</b>	<b>APPENDICES</b>	<b>287</b>
<b>APPENDIX A1</b>	<b>RANDOM PROCESSES</b>	<b>289</b>
A1.1	Fourier Series and Fourier Integrals / 290	
A1.2	Parseval's Equality / 291	
A1.3	Spectral Density Function of a Random Stationary Signal / 292	
A1.4	Autocorrelation Function of a Random Stationary Signal / 293	
A1.5	Cross-Covariance Function, Co-Spectrum, Quadrature Spectrum, Coherence / 295	
A1.6	Mean Upcrossing and Outcrossing Rate for a Gaussian Process / 296	
A1.7	Probability Distribution of the Peak Value of a Normally Distributed Random Signal / 297	
A1.8	Probability Distribution of the Peak Value of a Non-Gaussian Random Signal / 298	

<b>APPENDIX A2   MEAN WIND PROFILES AND ATMOSPHERIC BOUNDARY LAYER DEPTH</b>	<b>301</b>
A2.1   Equations of Balance of Momenta within the Atmospheric Boundary Layer / 301	
A2.2   The Turbulent Ekman Layer / 302	
<b>APPENDIX A3   SPECTRA OF TURBULENT VELOCITY FLUCTUATIONS, KOLMOGOROV HYPOTHESES</b>	<b>307</b>
<b>APPENDIX A4   WIND DIRECTIONALITY EFFECTS, OUTCROSSING AND SECTOR-BY-SECTOR APPROACHES</b>	<b>311</b>
A4.1   Approach Based on the Outcrossing of the Limit-State Boundary / 311	
A4.2   The Sector-By-Sector Approach [18-10] / 313	
<b>APPENDIX A5   REPORT ON ESTIMATION OF WIND EFFECTS ON THE WORLD TRADE CENTER TOWERS</b>	<b>315</b>
