

Contents

Tetrathiafulvalene-Based Conductors Containing Organometallic Components	1
John A. Schlueter	
New Molecular Architecture for Electrically Conducting Materials Based on Unsymmetrical Organometallic-Dithiolene Complexes	35
Kazuya Kubo and Reizo Kato	
Electroactive Paramagnetic Complexes as Molecular Bricks for π-<i>d</i> Conducting Magnets	55
Stéphane Golhen, Olivier Cador, and Lahcène Ouahab	
π-<i>d</i> Interaction-Based Molecular Conducting Magnets	77
Akira Miyazaki and Toshiaki Enoki	
Metallocenium Salts of Transition Metal Bisdichalcogenate Anions; Structure and Magnetic Properties	97
V. Gama and M. Almeida	
Conductive Materials Based on $M(dmit)_2$ Complexes and Their Combination with Magnetic Complexes	141
Lydie Valade and Christophe Faulmann	
Magnetic Properties of Radical, Crystalline Mixed Cyclopentadienyl/Dithiolene Complexes	161
Marc Fourmigué	
Index	191

Conducting and Magnetic Organometallic Molecular Materials

(Eds.) M. Fourmigué; L. Ouahab

2009, XII, 193 p. 104 illus., 22 in color., Hardcover

ISBN: 978-3-642-00407-0
