

Valuation of Network Effects in Software Markets

A Complex Networks Approach

Bearbeitet von
Andreas Kemper

1. Auflage 2012. Taschenbuch. XVII, 309 S. Paperback

ISBN 978 3 7908 2813 9

Format (B x L): 15,5 x 23,5 cm

Gewicht: 504 g

Wirtschaft > Corporate Responsibility > Unternehmenskooperationen.
Beteiligungsunternehmen

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Part I Introduction

1 Background and Motivation	3
1.1 Research Objectives	5
1.2 Research Design	7
1.3 Scale and Scope of the Research	8
1.4 Target Audience	9
1.5 Course of Analysis	9

Part II Valuation in Modern Software Markets

2 Investment and Company Valuation	15
2.1 Principles of Investment Valuation	15
2.2 Traditional Investment Valuation	16
2.2.1 Asset Value Approach	17
2.2.2 Market Value Approach	17
2.2.3 Discounted Cash Flow Models	18
2.3 Real Option Valuation	20
2.3.1 Option-Pricing Theory	21
2.3.2 Real Options Analogy	22
2.3.3 Typology of Real Options	22
2.3.4 Real Options Management Process	24
2.3.5 Real Options in Practice	26
2.3.6 Reconsideration of Real Options	27
3 Modern Software Markets	29
3.1 Principles of Software Markets	29
3.2 Fundamental Trends in Software Markets	32
3.3 Characteristics of Software Markets	34
3.3.1 Short Product Life Cycles	35
3.3.2 Hypercompetition and Disruptive Innovations	36
3.3.3 Intangible Assets	36
3.3.4 Information Goods	37

3.3.5	Nonrivalry	37
3.3.6	Property Right Protection	37
3.3.7	Peculiar Cost Structure	38
3.3.8	Supply-Side Economies of Scale	39
3.3.9	Information Overload and Trust	39
3.3.10	Startup Companies	39
3.3.11	Network Effects	40
3.3.12	Reconsideration of Characteristics of Software Markets.....	40
4	Reconsideration of Valuation in Software Markets	43
4.1	Reconsideration of Traditional Investment Valuation	43
4.1.1	Reconsideration of the Asset Value Approach	43
4.1.2	Reconsideration of the Market Value Approach	44
4.1.3	Reconsideration of the Discounted Cash Flow Approaches	44
4.2	Reconsideration of Real Options Approaches for Valuation in Software Markets.....	46
4.3	Reconsideration of Option Pricing Models for Valuation in Software Markets.....	48
4.3.1	Analytical Solution Methods.....	50
4.3.2	Analytical Approximation Methods	50
4.3.3	Lattice Approaches	51
4.3.4	Finite Difference Methods	52
4.3.5	Numerical Integration	52
4.3.6	Simulations	52
4.3.7	Comparison of Option Pricing Models	53
4.4	Parametrization of Real Option Models.....	55
4.5	Specification of the Volatility	56
4.6	Specification of the Underlying	58
4.6.1	Probability Distributions	58
4.6.2	Stochastic Processes for Valuation in Software Markets.....	59
4.7	Challenges of Valuations in Software Markets	62
Part III	Modeling Network Effects in Software Markets	
5	Network Economics in Software Markets	67
5.1	Principles of Network Economics	67
5.2	Typologies of Network Effects in Software Markets	70
5.2.1	Direct and Indirect Network Effects	70
5.2.2	Application, User, and System Effects	71
5.3	Properties of Network Effects in Software Markets	72
5.3.1	Feedback Loops	72
5.3.2	Hysteresis, Startup Problem and Critical Mass	73
5.3.3	Excess Momentum	74

5.3.4	Market Instability and Serial Monopolies	75
5.3.5	Compatibility	75
5.3.6	Multiple Market Equilibria	76
5.3.7	Multiple Product Generations	76
5.3.8	Pareto-Inferior Market Results	76
5.3.9	Competition For and In Software Markets	77
5.4	Empirical Evidence of Network Effects in Software Markets	78
5.5	Network Effects in Selected Software Market Segments	80
5.5.1	Network Effects in Enterprise Resource Planning	80
5.5.2	Network Effects in Electronic Data Interchange	81
5.5.3	Network Effects in Office Suites	81
5.5.4	Network Effects in Social Network Services	82
5.5.5	Comparison of Software Market Segments	83
5.6	Reconsideration of Valuation in Modern Software Markets	83
6	Customer-Equity Valuation in Software Markets	85
6.1	Principles of Customer Equity Valuation	85
6.1.1	Revenue Parameter in CLV Models	86
6.1.2	Cost Parameter in CLV Models	87
6.1.3	Retention Rate Parameter in CLV Models	88
6.2	DCF Customer Equity Model	88
6.2.1	Generic Customer Lifetime Value	89
6.2.2	Individual Customer Lifetime Value	89
6.2.3	Value of Initial Customer Cohort	89
6.2.4	Total Customer Equity	90
6.2.5	Customer-Based Corporate Value	90
6.2.6	Discussion of the DCF CEV-Model	90
6.3	Real Options Customer Equity Model	91
6.3.1	Inverse Mean Reversion Model	92
6.3.2	Customer Equity Model	93
6.3.3	Numerical Example of Customer Value	94
6.3.4	Discussion of the ROV CEV-Model	96
6.4	Reconsideration of Customer Equity Valuation	96
7	Adoption and Diffusion Models for Software Markets	97
7.1	Software Diffusion Models	97
7.1.1	Fundamental Diffusion Models	98
7.1.2	Markov Matrix Diffusion Model	100
7.2	Software Adoption Models	106
7.2.1	Technology Acceptance Model	107
7.2.2	Standardization Models	108
7.3	Reconsideration of Software Adoption and Diffusion Models	111

8	Network Effects Valuation Framework	
	For Software Markets	115
8.1	The Network Effects Valuation Framework	115
8.2	Corporate and Software Market Analysis	116
8.2.1	Structure of Software Market	116
8.2.2	Value Driver of Software Companies	117
8.2.3	Cost Structure Analysis	119
8.3	Software Market Model	120
8.3.1	Scale and Scope of the Software Market Model	121
8.3.2	Implementation of the Software Market Model	122
8.3.3	Simulation of the Software Market Development	124
8.3.4	Derivation of Data for Valuations in Software Markets	125
8.4	Software Company Valuation Model	126
8.4.1	Identification of Main Sources of Uncertainty	127
8.4.2	Selection of Option Pricing Model	128
8.4.3	Determination of Valuation Parameters	128
8.4.4	Calculation of Option Values	129
8.5	Sensitivity Analysis	130
9	Reconsideration of Network Effects in Software Markets	131
Part IV Modeling Customer Networks from a Complex Networks Perspective		
10	Complex Networks Theory	135
10.1	Principles of Complex Networks Research	135
10.2	Relevant Properties of Complex Networks	137
10.2.1	Fundamentals of Complex Networks Theory	138
10.2.2	Degree, Indegree, Outdegree	139
10.2.3	Degree Distribution	139
10.2.4	Network Centrality and Structural Equivalence	140
10.2.5	Network Connectivity	140
10.2.6	Traversivity, Clustering and Density	141
10.2.7	Assortative Mixing Patterns	142
10.2.8	Degree Correlations	143
10.2.9	Giant Component	143
10.3	Prototypical Network Topologies	144
10.3.1	Random Graph Networks	144
10.3.2	Small-World Networks	145
10.3.3	Scale-Free Networks	147
10.4	Evolution of Complex Networks	148
10.4.1	Cumulative Advantage Model	149
10.4.2	Preferential Attachment Model	149

10.5	Processes on Complex Networks	151
10.5.1	Epidemiology	152
10.5.2	Percolation and Phase Transitions	154
10.6	Derivation of Complex Networks Research Hypotheses	156
11	Complex Networks Adoption and Diffusion Simulator	159
11.1	Object-Oriented Software Engineering	159
11.2	Object-Oriented Requirements Analysis	160
11.2.1	Network Generation	161
11.2.2	Customer Adoption Rule	162
11.2.3	Network Visualization	163
11.2.4	Data Storage and Exchange	164
11.2.5	Extended Program Features	164
11.3	Object-Oriented Design	165
11.3.1	Design Patterns	165
11.4	Object-Oriented Implementation	166
11.4.1	Network Topology	167
11.4.2	Adoption Rule	168
11.4.3	Simplifications in the First Step	170
11.4.4	Package Structure of the Implementation	170
11.4.5	Package <i>network.statistics</i>	172
11.4.6	Package <i>technology</i>	173
11.4.7	Package <i>simulator</i>	175
11.5	Reconsideration of the Simulator	176
12	Complex Networks Analysis of Customer Networks	179
12.1	Diffusion Dynamics in Varying Network Topologies	179
12.1.1	Hypothesis on Diffusion Dynamics In Varying Network Topologies	179
12.1.2	Analysis of Diffusion Dynamics In Varying Network Topologies	180
12.1.3	Reconsideration of Diffusion Dynamics In Varying Network Topologies	197
12.2	Scaling Properties of Complex Customer Networks	198
12.2.1	Hypothesis on Scaling Properties of Complex Customer Networks	198
12.2.2	Analysis of Scaling Properties in Software Markets	198
12.2.3	Reconsideration of Scaling Properties of Complex Customer Networks	205
12.3	Network Topologies of Complex Customer Networks in Software Markets	205
12.3.1	Hypothesis on the Topology of Customer Networks in Software Markets	206

12.3.2	Analysis of the Topology of Customer Networks in Software Markets	206
12.3.3	Reconsideration of Topology of Customer Networks in Software Markets	209
12.4	Contributions to Customer Network-Centric Valuation	209
12.4.1	Hypothesis on Contributions to Customer Network-Centric Valuation	209
12.4.2	Analysis of Contributions to Customer Network-Centric Valuation	210
12.4.3	Reconsideration of Contributions to Customer Network-Centric Valuation	218
12.5	Social vs. Natural Scientific Networks	219
12.5.1	Hypothesis on Social vs. Natural Scientific Networks	219
12.5.2	Analysis of Social vs. Natural Scientific Networks	219
12.5.3	Reconsideration of Social vs. Natural Scientific Networks	221
12.6	Reconsideration of the Complex Networks Analysis of Customer Networks	221
13	Complex Networks Framework for Valuation in Software Markets	223
13.1	The Complex Networks Valuation Framework	223
13.2	Corporate and Software Market Analysis	225
13.2.1	Structure of Software Markets	226
13.2.2	Value Driver of Software Companies	227
13.2.3	Cost Structure Analysis	230
13.3	Complex Networks Software Market Model	231
13.3.1	Scale and Scope of the Complex Networks Software Market Model	231
13.3.2	Topology of the Complex Customer Networks	232
13.3.3	Implementation of the Complex Networks Software Market Model	233
13.3.4	Simulation of the Software Market Development	236
13.3.5	Derivation of Complex Network Data for Valuations in Software Markets	236
13.4	Complex Networks Software Company Valuation Model	238
13.4.1	Identification of Main Sources of Uncertainty	238
13.4.2	Selection of Option Pricing Model	239
13.4.3	Determination of Valuation Parameters	239
13.4.4	Calculation of Option Values	240
13.5	Sensitivity Analysis	240

14 Reconsideration of Complex Customer Networks in Software Markets	243
Part V Summary, Implications, Limitations, and Outlook	
15 Summary of Findings	247
15.1 Main Findings	247
15.2 Insights on Valuation in Modern Software Markets	249
15.3 Insights on Modeling Network Effects in Software Markets	250
15.4 Insights on Modeling Customer Networks from a Complex Networks Perspective	251
15.5 Reconsideration of Findings	252
16 Implications of Results	255
16.1 Implications for Management	255
16.1.1 Implications for Strategic Management	255
16.1.2 Implications For Marketing Strategies	258
16.1.3 Implications For Turnaround Strategies	267
16.2 Implications for Financial Sponsors	269
16.2.1 Business Plan Analysis	270
16.2.2 Critical Mass Turnaround Financing Opportunities	270
16.2.3 Business Identification Tools	271
16.3 Implications for Research	272
16.3.1 Interdisciplinary Implications for Research	272
16.3.2 Implications for Financial Research	273
16.3.3 Implications for Network Economic Research	273
16.3.4 Implications for Complex Networks Research	274
17 Research Limitations	277
17.1 General Limitations	277
17.2 Limitations of Financial Research	278
17.3 Limitations of Complex Networks Research	278
18 Research Outlook	281
18.1 Financial Research Opportunities	281
18.1.1 Opportunities in Investment Valuation	281
18.1.2 Opportunities in Behavioral Finance	282
18.1.3 Opportunities for Empirical Financial Research	282
18.2 Complex Networks Research Opportunities	283
18.2.1 Heterogeneous Economic Agents	283
18.2.2 Network Generation	284
18.2.3 Network Evolution	284
18.2.4 Nature of Social Networks	284

18.2.5 Complex Systems Theory	285
18.3 Reconsideration of the Research Outlook	285
19 Executive Summary	287
Bibliography	289
Index of Keywords	307

Valuation of Network Effects in Software Markets

A Complex Networks Approach

Kemper, A.

2010, XVII, 309 p. 59 illus., Hardcover

ISBN: 978-3-7908-2366-0
