

MHD Flows in Compact Astrophysical Objects

Accretion, Winds and Jets

Bearbeitet von
V.S. Beskin

1. Auflage 2012. Taschenbuch. xviii, 425 S. Paperback

ISBN 978 3 642 26177 0

Format (B x L): 15,5 x 23,5 cm

Gewicht: 682 g

[Weitere Fachgebiete > Physik, Astronomie > Astronomie: Allgemeines > Astrophysik](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung [beck-shop.de](#) ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Introduction	1
1 Hydrodynamical Limit—Classical Problems of Accretion and Ejection	5
1.1 Astrophysical Introduction—Accretion onto Compact Objects	6
1.1.1 Accretion Disks	6
1.1.2 Standard Model	10
1.1.3 ADAF, ADIOS, etc.	13
1.2 Main Properties of Transonic Hydrodynamical Flows	15
1.2.1 Basic Equations	15
1.2.2 Spherically Symmetric Flow	17
1.2.3 Potential Plane Flow	21
1.3 Nonrelativistic Axisymmetric Stationary Flows	28
1.3.1 Basic Equations	28
1.3.2 Mathematical Intermezzo—the Covariant Approach	30
1.3.3 Two-Dimensional Flow Structure	31
1.3.4 Bondi–Hoyle Accretion	40
1.3.5 Outflow from a Slowly Rotating Star	44
1.4 Axisymmetric Stationary Flows in the Vicinity of a Black Hole	53
1.4.1 Physical Intermezzo— $(3 + 1)$ -Splitting in the Kerr Metric	53
1.4.2 Basic Equations	57
1.4.3 Exact Solutions	63
1.4.4 Bondi–Hoyle Accretion—The Relativistic Regime	66
1.4.5 Accretion onto a Slowly Rotating Black Hole	69
1.4.6 Accretion of Matter with Small Angular Momentum	71
1.4.7 Thin Transonic Disk	77
1.5 Conclusion	88
2 Force-Free Approximation—The Magnetosphere of Radio Pulsars	89
2.1 Astrophysical Introduction	89
2.2 Basic Physical Processes	93
2.2.1 Vacuum Approximation	93
2.2.2 Particle Generation in the Strong Magnetic Field	98
2.2.3 Magnetosphere Structure	101

2.3	Secondary Plasma Generation	105
2.3.1	“Inner Gap”	105
2.3.2	Neutron Star Surface	110
2.3.3	Propagation of γ -Quanta in the Superstrong Magnetic Field	111
2.3.4	General Relativity Effects	112
2.3.5	Particle Generation in the Magnetosphere	114
2.3.6	“Hollow Cone” Model	116
2.3.7	Secondary Plasma Generation—“Outer Gap”	120
2.4	Pulsar Equation	120
2.4.1	Force-Free Approximation. The Magnetization Parameter	120
2.4.2	Integrals of Motion	122
2.4.3	Grad–Shafranov Equation	125
2.4.4	Mathematical Intermezzo—Quasistationary Formalism	128
2.5	Energy Losses of Radio Pulsars	131
2.5.1	Current Loss Mechanism	131
2.5.2	Slowing Down of Inclined and Orthogonal Rotators	135
2.6	Magnetosphere Structure	143
2.6.1	Exact Solutions	143
2.6.2	Magnetosphere Structure with Longitudinal Currents	162
2.6.3	Magnetosphere Models	169
2.7	Conclusion	175
3	Force-Free Approximation—The Black Hole Magnetosphere	177
3.1	Astrophysical Introduction—The Central Engine in Active Galactic Nuclei	177
3.1.1	Possible Mechanisms of Black Hole Formation	177
3.1.2	Nature of Activity and Variability	180
3.1.3	Magnetized Accretion Disk	181
3.1.4	Regular Magnetic Field Generation	183
3.2	Basic Equations	186
3.2.1	$(3 + 1)$ -Splitting for the Electromagnetic Field	186
3.2.2	“No Hair” Theorem	188
3.2.3	Vacuum Approximation	191
3.2.4	Force-Free Grad–Shafranov Equation in the Kerr Metric	196
3.2.5	Particle Generation	201
3.3	Energy Release Mechanism	203
3.3.1	Blandford–Znajek Process	203
3.3.2	Physical Intermezzo—Black Hole Thermodynamics	207
3.4	Black Hole Magnetosphere Structure	210
3.4.1	General Properties	210
3.4.2	Exact Solutions	211
3.4.3	Magnetosphere Models	219
3.5	Conclusion	224

4	Full MHD Version—General Properties	227
4.1	Physical Introduction—Magnetohydrodynamic Waves	227
4.2	Relativistic Flows in the Kerr Metric	232
4.2.1	Integrals of Motion	232
4.2.2	Singular Surfaces	237
4.2.3	Grad–Shafranov Equation	241
4.3	Special Cases	244
4.3.1	Nonrelativistic Flows	244
4.3.2	Anisotropic Pressure	248
4.4	General Properties	252
4.4.1	Some Useful Relations	252
4.4.2	Alfvén Surface	256
4.4.3	Fast Magnetosonic Surface—Relativistic Flows	258
4.4.4	Fast Magnetosonic Surface—Nonrelativistic Flows	266
4.4.5	Behavior of the Solution at Large Distances	272
4.4.6	Behavior of the Solution in the Vicinity of the Horizon	279
5	Full MHD Version—Particle Acceleration and Collimation	285
5.1	Astrophysical Introduction	285
5.1.1	Radio Pulsars	285
5.1.2	Active Galactic Nuclei	289
5.1.3	Young Stellar Objects	293
5.1.4	Microquasars, Cosmological Gamma-Bursts, etc.	296
5.2	Cylindrical Flows	298
5.2.1	Cylindrical Jets—The Force-Free Approximation	298
5.2.2	Relativistic Jets	303
5.2.3	Nonrelativistic Jets	319
5.2.4	General Properties and Application	325
5.3	Cold Quasimonopole Outflows	327
5.3.1	Relativistic Slowly Rotating Outflows	327
5.3.2	Relativistic Outflows with Differential Rotation	331
5.3.3	Nonrelativistic Slowly Rotating Outflows	334
5.3.4	Relativistic Fast-Rotating Outflow	336
5.3.5	Relativistic Outflow in the Parabolic Magnetic Field	342
5.3.6	General Properties	346
5.4	Black Hole Magnetosphere	347
5.4.1	Slowly Rotating Black Hole Surrounded by a Thin Disk	347
5.4.2	Slowly Rotating Black Hole Surrounded by a Rotating Shell	355
5.5	Other Methods	360
5.5.1	Analysis of the Algebraic Relations	360
5.5.2	Self-Similar Solutions	364
5.5.3	Computational Results	371
5.6	Conclusion	379

6 Conclusion	381
A From Euler to Grad–Shafranov—The Simplest Way	385
B Nonrelativistic Force-Free Grad–Shafranov Equation	387
C Part-Time Job Pulsars	389
D Special Functions	391
D.1 Legendre Polynomials	391
D.2 Bessel Functions	392
D.3 Hypergeometric Function	393
E List of Symbols	395
References	401
Index	423
