1	Existence for Parabolic–Elliptic Degenerate Diffusion Problems	1
1.1	Well-Posedness for the Cauchy Problem with Fast Diffusion	3
1.1.1	Hypotheses for the Parabolic–Elliptic Case	3
1.1.2	Functional Framework	5
1.1.3	Approximating Problem	11
1.1.4	Existence for the Approximating Problem	14
1.1.5	Convergence of the Approximating Problem	24
1.1.6	Construction of the Solution	36
1.1.7	Numerical Results	40
1.2	Well-Posedness for the Cauchy Problem with Very Fast Diffusion	44
1.3	Existence of Periodic Solutions in the Parabolic–Elliptic Degenerate Case	47
1.3.1	Solution Existence on the Time Period $(0, T)$	48
1.3.2	Solution Existence on $\mathbb{R}_+$	53
1.3.3	Longtime Behavior of the Solution to a Cauchy Problem with Periodic Data	54
1.3.4	Numerical Results	55
2	Existence for Diffusion Degenerate Problems	57
2.1	Well-Posedness for the Cauchy Problem with Fast Diffusion	57
2.1.1	Functional Framework and Time Discretization Scheme	59
2.1.2	Stability of the Discretization Scheme	62
2.1.3	Convergence of the Discretization Scheme	68
2.1.4	Uniqueness	76
2.1.5	Error Estimate	77
2.1.6	Numerical Results	79

2.2	Existence of Periodic Solutions in the Diffusion	
	Degenerate Case	82
2.2.1	Asymptotic Behavior at Large Time	87
2.2.2	Numerical Results	90
3	Existence for Nonautonomous Parabolic–Elliptic	
	Degenerate Diffusion Equations	91
3.1	Statement of the Problem and Functional Framework	91
3.2	The Approximating Problem	94
3.3	Well-Posedness for the Nonautonomous Cauchy	
	Problem	98
3.3.1	Numerical Results	107
4	Parameter Identification in a Parabolic–Elliptic	
	Degenerate Problem	109
4.1	Statement of the Problem	109
4.2	The Approximating Control Problem	112
4.2.1	Existence in the Approximating State System	113
4.2.2	Existence of the Approximating Optimal	
	Control	114
4.3	The Approximating Optimality Condition	117
4.3.1	The First Order Variations System	117
4.3.2	The Dual System	120
4.3.3	The Necessary Optimality Condition	121
4.4	Convergence of the Approximating Control Problem	123
4.5	An Alternative Approach	126
4.5.1	The Approximating Problem ($\tilde{P}_\varepsilon$)	128
4.5.2	Numerical Results	132
	References	135
	List of Symbols	141
	Index	143
