

Contents

Part I Recent Advances in Understanding and Imaging the Molecular and Genetic Basis of Vascular Diseases

- 1 The Molecular Biology and Genetics of Aneurysms** 3
Helena Kuivaniemi, Gerard Tromp, David J. Carey,
and James R. Elmore
- 2 The Molecular Biology and Treatment of Systemic
Vasculitis in Children.....** 35
Despina Eleftheriou and Paul A. Brogan
- 3 Recent Insights into the Molecular and Cellular
Contributions to Venous Thrombosis.....** 71
Peter K. Henke, Jose A. Diaz, Daniel D. Myers Jr.,
and Thomas W. Wakefield
- 4 The Ubiquitin Proteasome System in Endothelial
Cell Dysfunction and Vascular Disease** 103
Najeeb A. Shirwany and Ming-Hui Zou
- 5 Molecular Imaging of Vascular Inflammation, Atherosclerosis,
and Thrombosis.....** 129
Dan Jane-Wit and Mehran M. Sadeghi

Part II The Therapeutic Potential of Angiogenesis, Nanomedicine, and Endothelial Progenitor Cells in the Treatment of Vascular Disease

- 6 Molecular Regulation of Vasculogenesis and Angiogenesis:
Recent Advances and Future Directions** 169
George E. Davis

7 Therapeutic Angiogenesis for Critical Limb Ischemia: Complex Mechanisms and Future Challenges	207
Yihai Cao	
8 Modulating the Proliferative Response to Treat Restenosis After Vascular Injury	227
Vicente Andrés, José Javier Fuster, Carlos Silvestre Roig, and Rainer Wessely	
9 Cardiovascular Nanomedicine: Challenges and Opportunities	249
Biana Godin, Ye Hu, Saverio La Francesca, and Mauro Ferrari	
10 Endothelial Progenitor Cells in the Treatment of Vascular Disease	283
Gareth J. Padfield	
Index	329

Molecular and Translational Vascular Medicine

(Eds.) J. W. Homeister; M. S. Willis

2012, XIV, 335 p. 42 illus., 36 in color., Hardcover

ISBN: 978-1-61779-905-1
