<i>Preface</i>	xi
<i>Contributors</i>	xiii
1 Introduction to Dense Phase Carbon Dioxide Technology	1
Giovanna Ferrentino and Murat O. Balaban	
2 Thermodynamics of Solutions of CO₂ with Effects of Pressure and Temperature	5
Sara Spilimbergo and Ireneo Kikic	
2.1 Introduction	5
2.2 Thermodynamics of liquid–vapour phase equilibria	6
2.2.1 Calculation of γ	10
2.2.2 Calculation of ϕ	13
2.2.3 Calculation of the liquid–vapour phase equilibria	20
2.3 Application to CO ₂ –H ₂ O system model	24
2.3.1 Non-electrolyte models	24
2.3.2 Electrolyte models	26
2.4 Thermodynamics of solid–vapour equilibria	28
2.5 List of symbols	31
3 Experimental Measurement of Carbon Dioxide Solubility	37
Giovanna Ferrentino, Thelma Calix, Massimo Poletto, Giovanna Ferrari, and Murat O. Balaban	
3.1 Introduction	37
3.2 Solubility of carbon dioxide in water	38
3.2.1 Definition and brief review of early studies	38
3.2.2 Physical properties associated with the phase diagram of carbon dioxide	41
3.2.3 Effect of pressure and temperature on carbon dioxide solubility in water	42
3.3 Experimental methods for carbon dioxide solubility measurement	45
3.3.1 Analytical methods	46
3.3.2 Synthetic methods	55
3.4 Review of experimental results	58
3.5 Conclusions	66

4	Effects of Dense Phase Carbon Dioxide on Vegetative Cells	67
	Osman Erkmén	
4.1	Introduction	67
4.2	Gases used for inactivating microorganisms	68
4.3	Effect of DPCD on vegetative microorganisms	69
4.3.1	Effect of DPCD on bacterial cells	69
4.3.2	Effect of DPCD on vegetative forms of fungi, pests and viruses	73
4.4	Factors affecting the sensitivity of microorganisms to DPCD	74
4.4.1	Effect of CO ₂ physical states	75
4.4.2	Effect of temperature and pressure	75
4.4.3	Effect of CO ₂ concentration	76
4.4.4	Effect of agitation	77
4.4.5	Effect of water content	77
4.4.6	Effect of pressurization and depressurization rates	78
4.4.7	Effect of pressure cycling	79
4.4.8	Effect of microbial type	79
4.4.9	Effect of initial microbial number	80
4.4.10	Effect of physical and chemical properties of suspension	80
4.4.11	Effect of culture conditions and growth phases	81
4.4.12	Injured microorganisms	82
4.4.13	Effect of combination processes	83
4.4.14	Effect of type of system	83
4.4.15	Treatment time and inactivation kinetics	84
4.5	Mechanisms of microbial inactivation by DPCD	85
4.5.1	Solubilization of CO ₂ under pressure into suspension	87
4.5.2	Cell membrane modification	88
4.5.3	Cytoplasmic leakage	88
4.5.4	Intracellular pH decrease	89
4.5.5	Key enzyme inactivation	90
4.5.6	Inhibitory effect of molecular CO ₂ and HCO ₃ ⁻ on metabolism	90
4.5.7	Intracellular precipitation and electrolyte imbalance	91
4.5.8	Extraction of vital cellular constituents	91
4.5.9	Physical cell rupture	92
4.6	Characterization of CO ₂ states and survival curves	93
4.7	Quantifying inactivation	96
4.8	Conclusions	96
5	Effects of Dense Phase Carbon Dioxide on Bacterial and Fungal Spores	99
	Patricia Ballestra	
5.1	Introduction	99
5.2	Inactivation of bacterial spores by DPCD	101
5.2.1	Effect of temperature	101

5.2.2	Effect of pressure	104
5.2.3	Effect of pH and a_w of the treatment medium	105
5.2.4	Susceptibility of different bacterial spores	105
5.2.5	Effects of combination treatments	106
5.2.6	Mechanisms of bacterial spore inactivation	107
5.3	Inactivation of fungal spores by DPCD	109
5.4	Conclusion	112
6	Effects of DPCD on Enzymes	113
	Murat O. Balaban	
6.1	Introduction	113
6.2	Effects of gas bubbling	118
6.3	Alteration of the protein structure	118
6.4	Studies with multiple enzymes	119
6.5	Effects on specific enzymes	120
6.5.1	Alpha-amylase	120
6.5.2	Acid protease	121
6.5.3	Alkaline protease	121
6.5.4	Glucosylase	122
6.5.5	Lipase	122
6.5.6	Pectinesterase (PE)	124
6.5.7	Pectin methyl esterase (PME)	125
6.5.8	Polyphenol oxidase (PPO)	126
6.5.9	Tyrosinase	129
6.5.10	Lipoxygenase	130
6.5.11	Peroxidase	131
6.5.12	Alkaline phosphatase	133
6.5.13	Myrosinase	133
6.5.14	Hydrolases	134
6.6	Conclusions and suggestions	134
7	The Kinetics of Microbial Inactivation by Carbon Dioxide under High Pressure	135
	Maria G. Corradini and Micha Peleg	
7.1	Introduction	135
7.2	The survival curve	137
7.2.1	Primary models	137
7.2.2	Secondary models – the effect of pressure alone	141
7.2.3	The temperature effect and that of other auxiliary factors	143
7.2.4	Dynamic treatments	144
7.3	Application of the models to published experimental data	147
7.3.1	Primary model derivation	147
7.4	Concluding remarks	151
7.5	List of symbols	154

8 Applications of DPCD to Juices and Other Beverages	157
Murat O. Balaban and Xiaojun Liao	
8.1 Introduction	157
8.2 Juices processed with DPCD	158
8.2.1 Orange juice	158
8.2.2 Apple juice	162
8.2.3 Mandarin juice	164
8.2.4 Grapefruit juice	164
8.2.5 Watermelon juice	165
8.2.6 Coconut water	166
8.2.7 Guava puree	167
8.2.8 Grape juice	167
8.2.9 Pear	170
8.2.10 Carrot	170
8.2.11 Carrot juice	171
8.2.12 Peach	171
8.2.13 Kiwi	172
8.2.14 Melon	172
8.3 Other beverages processed with DPCD	173
8.3.1 Beer	173
8.3.2 Kava kava	173
8.3.3 Jamaica beverage	174
8.4 Conclusions	175
9 Use of Dense Phase Carbon Dioxide in Dairy Processing	177
Giovanna Ferrentino and Giovanna Ferrari	
9.1 Introduction	177
9.2 Carbon dioxide in milk	178
9.3 Enzymes and microorganisms in milk	178
9.4 Application of carbon dioxide to milk	180
9.4.1 Carbon dioxide addition to raw milk	180
9.4.2 Carbon dioxide addition during thermal pasteurization of milk	183
9.4.3 Effect of carbon dioxide addition on sensory properties of milk	184
9.4.4 Dense phase carbon dioxide process	185
9.5 Application of carbon dioxide for enzyme inactivation	186
9.6 Application of carbon dioxide to cottage cheese production	188
9.7 Application of carbon dioxide to yogurt and fermented products	189
9.8 Application of carbon dioxide to casein production	190
9.8.1 Casein properties	190
9.8.2 Casein production by high-pressure carbon dioxide	191

9.8.3	Comparison between continuous and batch systems for casein production by carbon dioxide	194
9.8.4	Economic comparison between high-pressure carbon dioxide and a conventional process for casein production	196
9.9	Conclusions	198
10	Particle Engineering by Dense Gas Technologies Applied to Pharmaceuticals	199
	Neil R. Foster, Raffaella Mammucari, Luu Thai Danh, and Wen Hui Teoh	
10.1	Introduction	199
10.2	Dense gas as a solvent	201
10.2.1	Rapid expansion of supercritical solutions	201
10.2.2	Rapid expansion of supercritical solutions with a solid solvent	206
10.2.3	Rapid expansion of supercritical solutions with a nonsolvent	206
10.2.4	Particles from gas-saturated solutions	207
10.3	Dense gases as antisolvents	208
10.3.1	Gas antisolvent process	209
10.3.2	Aerosol solvent extraction system	211
10.3.3	Solution-enhanced dispersion by supercritical fluids	216
10.3.4	Atomized rapid injection for solvent extraction	218
10.4	SCFs as co-solvents	220
10.4.1	Depressurisation of an expanded liquid organic solvent	220
10.5	Dense gases as aerosolisation aids (spray-drying assistance)	221
10.5.1	Carbon dioxide-assisted nebulisation with a bubble dryer	221
10.5.2	Supercritical fluid assisted atomisation	224
10.6	Conclusion	225
11	Industrial Applications Using Supercritical Carbon Dioxide for Food	227
	James T.C. Yuan and John S. Novak	
11.1	Overview	227
11.2	Past development	228
11.3	Mechanism of microbial inactivation	229
11.3.1	Effect of other gases on microbial inactivation	229
11.4	scCO ₂ commercialization activities	230
11.5	Porocrit process	230
11.5.1	Impact on juice quality	232

11.5.2	Impact on nutrient values	233
11.5.3	Impact on microbial inactivation	233
11.5.4	Impact on microbial inactivation for solid foods	236
11.5.5	scCO ₂ processing efficiencies	237
11.6	Conclusions	237
12	Outlook and Unresolved Issues	239
	Luc Van Ginneken, Linsey Garcia-Gonzalez, Kathy Elst, and Frank Devlieghere	
12.1	Introduction	239
12.2	Unresolved issues	242
12.2.1	Inactivation mechanism of DPCD	242
12.2.2	Food quality and storage	250
12.2.3	Target foods	252
12.2.4	Process equipment and intellectual property	254
12.2.5	Fouling, cleaning, and disinfecting	259
12.2.6	Occurrence of DPCD-resistant mutants	261
12.2.7	Industrial implementation and process economics	262
12.3	Future outlook and conclusions	263
12.4	Acknowledgements	264
