About This Report	vii
About the Workshop Sponsors	ix
Acknowledgments	x
I Executive Summary	1
II Introduction and Process	6
III Human Needs (Water, Food, and Health)	12
Figure 1: Earth's Water Balance	15
Table 1: Water Consumption by Energy Type in the United States	16
IV Infrastructure (Transportation, Housing, and Urban Design)	23
Figure 1: The Brooklyn Bridge: An Example of a Pioneering and Sustained Urban Infrastructure	25
Figure 2: The Los Angeles Airport "Theme Building": Melding Art, Architecture, and Air Transport	28
V The Resource Cycle	30
V(A). Energy	30
Figure 1: Carbon Abatement Wedges	33
Figure 2: Populations Without Electricity Access	34
V(B). Mineral Resources	37
Figure 3: Expansion of the Scope of Concern about Mineral Supply	39

Figure 4: Assessing How a Mine Project Can Contribute to Sustainable Development	40
Table 1: Five Dimensions of Mineral Availability	41
Figure 5: The Scope of Material Stewardship Encompasses Process and Product Stewardship	42
Table 2: Opportunities for Research and Development in the Minerals Sector	43
V(C). Materials and Recycling	46
VI Human Resources	52
VII Linking Technologies to Resources	61
Figure 1: Technology and Resources Matrix	62
VIII The Path Forward	66
Appendix A: List of Delegates	68
Appendix B: References and Recommended Readings	70
Appendix C: Summary of Sector-Specific Advances	77
