<i>List of Contributors</i>	ix
<i>Preface</i>	xi
<i>Acknowledgements</i>	xiii

1 Introduction	1
General Introduction	2
Epidemiology	6
Prevalence of Oral Leukoplakia	7
Prevalence of Oral Erythroplakia	8
Prevention	8
Treatment Strategies	9
Terminology	9
Summary	11
References	12
2 Form and Function of the Oral Mucosa	13
Introduction	14
Applied Anatomy of the Oral Cavity	14
Function of the Oral Mucosa	17
Microanatomy of the Oral Mucosa	17
Regional Variation of the Oral Mucosa	19
Oral Epithelial Cell Kinetics	23
Oral Epithelial Cell Proliferative Activity	25
Anatomical Site Predilection for Oral Carcinogenesis	29
Summary	29
References	30
3 Oral Carcinogenesis	31
Introduction	32
Oral Cancer and Precancer	33
The 'Progression Model' for Oral Cancer	36
Aetiology and Risk Factors	38
Patient and Risk Factor Profiling	44
Summary	45
References	46
4 Clinical Presentation of Oral Precancer	48
Introduction	49
Clinical Terminology	49

Precancerous (Premalignant) Lesions	51
Precancerous (Premalignant) Conditions	63
Syphilis	70
Multiple Lesion Disease	71
Summary	73
References	73
5 Diagnostic Methods	75
Introduction	76
Screening	76
Clinical Examination Techniques	77
Diagnostic Aids in Precancer Diagnosis	84
Brush Biopsy and Exfoliative Cytology	88
Clinical Diagnosis in Practice	91
Summary	91
References	91
6 Pathological Aspects of Oral Precancer	93
Introduction	94
Biopsy Techniques	94
Role of the Pathologist	96
Histopathological Features of Oral Potentially	
Malignant Disorders	97
Grading of Dysplasia	99
Limitations in Conventional Pathological Techniques	104
Summary	105
References	105
7 Management of Oral Precancer	107
Introduction	108
Risk Factor Modification	109
Observation Versus Intervention	111
Medical Treatment	112
Surgical Treatment	113
Combined Treatment Modalities	134
Patient Follow Up and Surveillance	134
Summary	135
References	136
8 Clinical Outcome	138
Introduction	139
Clinical Outcome Studies	139
Patient Cohort Studies	141
Definitions of Clinical Outcome	142
Newcastle Patient Cohort Studies	145
Patient Follow Up	149
Prediction of Clinical Outcome	150
Summary	155
References	155

9 Malignant Transformation and Oral Cancer Development	156
Introduction	157
Risk of Progression to Oral Carcinoma	158
Malignant Transformation Versus Oral Cancer Development	161
Interventional Laser Surgery and Oral Cancer Prevention	163
Newcastle 10-Year Follow-Up Study	164
High- and Low-Risk Patients	165
Clinical Signs of Oral Squamous Cell Carcinoma	165
Diagnosis and Management of ‘Unexpected Malignancy’	167
Prognosis for the ‘Transformed’ Patient	168
Summary	168
References	169
10 The Future	170
Introduction	171
Prevention of Oral Precancer	172
Early Diagnosis of Potentially Malignant Disease	174
Interventional Management Strategies in the Future	175
Individualised Patient Treatments: Biomarkers and Targeted Chemoprevention	178
Future Research Directions	179
Summary	183
References	184
11 Case Histories	186
Introduction	187
Case 1: Diagnosis of Unexpected Malignancy	187
Case 2: Multiple Lesion Disease Responding to Conservative Management	189
Case 3: Multiple Lesion Disease Requiring Repeated Laser Treatments	191
Case 4: Proliferative Verrucous Leukoplakia	192
Case 5: Localised Oral Lichenoid Reaction	194
Case 6: Multiple Oral Lichenoid Reactions	195
Case 7: Widespread Dysplastic Oral Lichenoid Lesions	196
Case 8: An Immunosuppressed Patient	198
Case 9: Chronic Hyperplastic Candidosis	199
Case 10: Tobacco-Associated Hyperkeratosis	201
Case 11: Malignant Transformation in Longstanding Non-Erosive Lichen Planus	203
Summary	205
12 Conclusions	207
Oral Cancer	208
Potentially Malignant Disorders	208
Clinical Management	208
