Preface	ix
1 Introduction to the Theory of Elastic Waves	1
1.1 Elastic Waves	1
1.1.1 Longitudinal Waves (Compressional/Pressure/Primary/P Waves)	2
1.1.2 Shear Waves (Transverse/Secondary/S Waves)	2
1.1.3 Rayleigh Waves	3
1.1.4 Love Waves	4
1.1.5 Lamb Waves	4
1.2 Basic Definitions	5
1.3 Bulk Waves in Three-Dimensional Media	10
1.3.1 Isotropic Media	10
1.3.2 Christoffel Equations for Anisotropic Media	12
1.3.3 Potential Method	14
1.4 Plane Waves	15
1.4.1 Surface Waves	16
1.4.2 Derivation of Lamb Wave Equations	17
1.4.3 Numerical Solution of Rayleigh–Lamb Frequency Equations	26
1.4.4 Distribution of Displacements and Stresses for Various Frequencies of Lamb Waves	29
1.4.5 Shear Horizontal Waves	32
1.5 Wave Propagation in One-Dimensional Bodies of Circular Cross-Section	35
1.5.1 Equations of Motion	35
1.5.2 Longitudinal Waves	36

1.5.3	Solution of Pochhammer Frequency Equation	39
1.5.4	Torsional Waves	42
1.5.5	Flexural Waves	43
	References	45
2	Spectral Finite Element Method	47
2.1	Shape Functions in the Spectral Finite Element Method	53
2.1.1	Lobatto Polynomials	54
2.1.2	Chebyshev Polynomials	56
2.1.3	Laguerre Polynomials	60
2.2	Approximating Displacement, Strain and Stress Fields	62
2.3	Equations of Motion of a Body Discretised Using Spectral Finite Elements	67
2.4	Computing Characteristic Matrices of Spectral Finite Elements	72
2.4.1	Lobatto Quadrature	75
2.4.2	Gauss Quadrature	76
2.4.3	Gauss–Laguerre Quadrature	78
2.5	Solving Equations of Motion of a Body Discretised Using Spectral Finite Elements	81
2.5.1	Forcing with an Harmonic Signal	82
2.5.2	Forcing with a Periodic Signal	83
2.5.3	Forcing with a Nonperiodic Signal	84
	References	92
3	Three-Dimensional Laser Vibrometry	93
3.1	Review of Elastic Wave Generation Methods	94
3.1.1	Force Impulse Methods	94
3.1.2	Ultrasonic Methods	94
3.1.3	Methods Based on the Electromagnetic Effect	97
3.1.4	Methods Based on the Piezoelectric Effect	98
3.1.5	Methods Based on the Magnetostrictive Effect	102
3.1.6	Photothermal Methods	103
3.2	Review of Elastic Wave Registration Methods	104
3.2.1	Optical Methods	106
3.3	Laser Vibrometry	109
3.4	Analysis of Methods of Elastic Wave Generation and Registration	114
3.5	Exemplary Results of Research on Elastic Wave Propagation Using 3D Laser Scanning Vibrometry	116
	References	121

Contents

vii

4	One-Dimensional Structural Elements	125
4.1	Theories of Rods	125
4.2	Displacement Fields of Structural Rod Elements	127
4.3	Theories of Beams	133
4.4	Displacement Fields of Structural Beam Elements	135
4.5	Dispersion Curves	141
4.6	Certain Numerical Considerations	143
4.6.1	Natural Frequencies	144
4.6.2	Wave Propagation	147
4.7	Examples of Numerical Calculations	155
4.7.1	Propagation of Longitudinal Elastic Waves in a Cracked Rod	156
4.7.2	Propagation of Flexural Elastic Waves in a Rod	158
4.7.3	Propagation of Coupled Longitudinal and Flexural Elastic Waves in a Rod	162
	References	164
5	Two-Dimensional Structural Elements	167
5.1	Theories of Membranes, Plates and Shells	167
5.2	Displacement Fields of Structural Membrane Elements	169
5.3	Displacement Fields of Structural Plate Elements	175
5.4	Displacement Fields of Structural Shell Elements	181
5.5	Certain Numerical Considerations	184
5.6	Examples of Numerical Calculations	189
5.6.1	Propagation of Elastic Waves in an Angle Bar	189
5.6.2	Propagation of Elastic Waves in a Half-Pipe Aluminium Shell	192
5.6.3	Propagation of Elastic Waves in an Aluminium Plate	195
	References	198
6	Three-Dimensional Structural Elements	201
6.1	Solid Spectral Elements	202
6.2	Displacement Fields of Solid Structural Elements	202
6.2.1	Six-Mode Theory	202
6.2.2	Nine-Mode Theory	203
6.3	Certain Numerical Considerations	204
6.4	Modelling Electromechanical Coupling	208
6.4.1	Assumptions	213
6.4.2	Linear Constitutive Equations	213
6.4.3	Basic Equations of Motion	214

viii	Contents
6.4.4	Static Condensation 215
6.4.5	Inducing Waves 216
6.4.6	Recording Waves 216
6.4.7	Electrical Boundary Conditions 216
6.5	Examples of Numerical Calculations 220
6.5.1	Propagation of Elastic Waves in a Half-Pipe Aluminium Shell 220
6.5.2	Propagation of Elastic Waves in an Isotropic Plate – Experimental Verification 222
6.6	Modelling the Bonding Layer 227
	References 230
7	Detection, Localisation and Identification of Damage by Elastic Wave Propagation 233
7.1	Elastic Waves in Structural Health Monitoring 235
7.2	Methods of Damage Detection, Localisation and Identification 247
7.2.1	Energy Addition Method 253
7.2.2	Phased Array Method 255
7.2.3	Methods Employing Continuous Registration of Elastic Waves within the Analysed Area 263
7.2.4	Damage Identification Algorithms 266
7.3	Examples of Damage Localisation Methods 269
7.3.1	Localisation Algorithms Employing Sensor Networks 269
7.3.2	Algorithms Based on Full Field Measurements of Elastic Wave Propagation 275
	References 288
Appendix:	<i>EWavePro</i> Software 295
A.1	Introduction 295
A.2	Theoretical Background and Scope of Applicability (Computation Module) 296
A.3	Functional Structure and Software Environment (Pre- and Post-Processors) 298
A.4	Elastic Wave Propagation in a Wing Skin of an Unmanned Plane (UAV) 312
A.5	Elastic Wave Propagation in a Composite Panel 320
	References 333
Index	335
