INTRODUCTION 1

1 RESEARCH AND ANALYSIS FOR REAL-WORLD APPLICATIONS 8

Catherine M. Banks

1.1 Introduction and Learning Objectives, 8
1.1.1 Learning Objectives, 10
1.2 Background, 10
1.3 M&S Theory and Toolbox, 13
1.3.1 Simulation Paradigms, 15
1.3.2 Types of Modeling, 16
1.3.3 Modeling Applications, 17
1.4 Research and Analysis Methodologies, 18
Case Study: A Methodology for M&S Project Progression, 20
Summary, 23
Key Terms, 24
Exercises, 25
References, 25

2 HUMAN BEHAVIOR MODELING: A REAL-WORLD APPLICATION 26

John A. Sokolowski

2.1 Introduction and Learning Objectives, 26
2.2 Background and Theory, 27
2.2.1 Classical Decision Theory, 27
2.2.2 Naturalistic Decision Making, 31

COPYRIGHTED MATERIAL

2.2.3 Recognition-Primed Decision Model, 33
2.2.4 Military Decision Making, 37
2.2.5 Computational Techniques for Implementing the CJTF Decision Process, 40
2.2.6 Summary of the State-of-the-Art, 53
Case Studies, 54
Summary, 81
Key Terms, 82
Exercises, 83
References, 83
Appendix: A Decision Scenario and Associated Data, 88

3 TRANSPORTATION 93

R. Michael Robinson

3.1 Introduction and Learning Objectives, 93
3.2 Background, 94
3.3 Theory, 95
3.3.1 Simulation Levels, 95
3.3.2 Traffic Analysis Zones, 97
3.3.3 The Four-Step Model, 98
3.3.4 Method of Successive Averages, 102
3.3.5 Volume Delay Functions, 105
3.3.6 Dynamic Traffic Assignment, 108
3.4 Transportation Modeling Applications, 113
3.4.1 Traffic Demand Models, 113
3.4.2 Public Transportation Models, 114
3.4.3 Freight Modeling, 117
3.4.4 Evacuation Simulations, 121
Summary, 124
Key Terms, 125
Exercises, 126
References, 126
Further Reading, 127

4 HOMELAND SECURITY RISK MODELING 129

Barry C. Ezell

4.1 Introduction and Learning Objectives, 129
4.2 Background, 131
4.2.1 Bioterrorism Risk Assessment 2006, 132
4.2.2 Estimating Likelihood of Terrorist Events, 133
4.2.3 Risk Assessed as a Function of Threat, Vulnerability, and Consequence, 135

4.3 Theory and Applications in Risk Modeling, 136
4.3.1 Philosophical Considerations, 137
4.3.2 Ontology and Epistemology, 138
4.3.3 Issues and Implications for the Risk Analyst, 138
4.3.4 Philosophical Considerations Summary, 141
4.3.5 System Principals and Applications for the Risk Analyst, 142
4.3.6 Factors in Developing a Risk Assessment Study Plan, 143
4.3.7 Scope and Bound in a Risk Study: Constraints, Limitations, and Assumptions, 145
4.3.8 Well-Known Challenge in Homeland Security Studies, 146
4.4 Elements of a Study Plan, 147
4.5 Modeling Paradigms, 148
4.5.1 Simple Verses Complex Methodologies, 148
4.5.2 Quantitative and Qualitative Designs, 148
4.5.3 Modeling Approaches and Examples, 150
4.5.4 Verification and Validation for Risk Models, 156
Case Studies, 157
Summary, 161
Key Terms, 161
Exercises, 161
References, 162
Further Reading, 164

5 OPERATIONS RESEARCH 165

Andrew J. Collins and Christine S.M. Currie

5.1 Introduction and Learning Objectives, 165
5.2 Background, 166
5.2.1 OR Techniques, 168
5.3 Theory, 169
5.3.1 Problem Structuring Methods, 169
5.3.2 Queuing Theory, 175
5.3.3 Decision Analysis, 179
5.3.4 Game Theory, 182
5.3.5 Optimization, 186
5.4 Modeling Paradigms, 192
Case Studies, 193
Summary, 199
Key Terms, 201
Exercises, 202

References, 204
Further Reading, 206

6 Business Process Modeling 207

Rafael Diaz, Joshua G. Behr, and Mandar Tulpule

6.1 Introduction and Learning Objectives, 207
6.2 Background, 207
6.3 Discrete-Event Simulation, 214
6.3.1 Introduction, 214
6.3.2 Fundamentals, 215
6.3.3 Queuing System Model Components, 218
6.3.4 Time Advance Mechanism, 219
6.3.5 Simulation Flowchart, 220
6.4 Discrete-Event Simulation Case Study, 221
6.4.1 Introduction, 222
6.4.2 Background, 222
6.4.3 Research Question, 223
6.4.4 Overview of Optimization Model, 224
6.4.5 The Simulation Model, 225
6.4.6 Experimental Setting, 225
6.4.7 Simulation Parameterization and Execution, 226
6.4.8 Weigh Zones and Product Reassignment, 226
6.4.9 Results, 226
6.5 System Dynamics Simulation, 227
6.5.1 Introduction, 227
6.5.2 Fundamentals, 228
6.5.3 The Stock and Flow Diagrams, 229
6.5.4 Model Calibration, 231
6.5.5 Model Testing, 233
6.5.6 Population Modeling Exercise, 233
6.5.7 Application of System Dynamics, 235
6.5.8 Background, 235
6.5.9 Research Question, 238
6.5.10 Dynamic Hypothesis, 238
6.5.11 Causal Loop Diagram, 238
6.5.12 Stock and Flow Model, 239
6.5.13 Simulation and Results, 240
6.5.14 Conclusions, 244
6.6 Monte Carlo Simulation, 244
6.6.1 Introduction, 244
6.6.2 Fundamentals, 245
6.6.3 Probability Theory and Monte Carlo, 247

6.6.4 Central Limit Theorem, 247
6.6.5 Three-Sigma Rule, 247
6.6.6 Monte Carlo Case Study, 249
6.6.7 Research Question, 250
6.6.8 Model Parameters, 250
6.6.9 Simulation Procedure, 250
6.6.10 Estimating Profit, 251
6.6.11 Excel Implementation, 253
6.6.12 Outcomes, 253
6.6.13 Conclusions, 254
Summary, 255
Key Terms, 255
Review Questions, 256
References, 257

7 A Review of Mesh Generation for Medical Simulators **261**
Michel A. Audette, Andrey N. Chernikov, and Nikos P. Chrisochoides

7.1 Introduction and Learning Objectives, 261
7.2 Background—A Survey of Relevant Biomechanics and Open-Source Software, 263
7.2.1 Architecture of an Interactive Medical Simulator, 263
7.2.2 Mechanics of Tissue Manipulation in Medical Simulation, 264
7.2.3 Mechanics of Tissue Cutting and Resection in Medical Simulation, 269
7.2.4 Open-Source Resources in Medical Simulation, 269
7.3 Theory—The Impact of Element Quality and Size on Simulation, 272
7.4 Modeling Paradigms—Methods for Mesh Generation, 276
7.4.1 Structured Tetrahedral Mesh Generation, 276
7.4.2 Unstructured Tetrahedral Mesh Generation, 276
7.4.3 Octree-Based Unstructured Tetrahedral Mesh Generation, 279
7.4.4 Delaunay Unstructured Tetrahedral Mesh Generation, 280
7.4.5 Advancing Front Unstructured Tetrahedral Mesh Generation, 284
7.4.6 Optimization-Based Unstructured Tetrahedral Mesh Generation, 284

7.4.7 Unstructured Surface Mesh Generation, 285
Case Studies, 289
Summary, 291
Key Terms, 292
Acknowledgments, 293
Exercises, 293
References, 294

8 MILITARY INTEROPERABILITY CHALLENGES 298

Saikou Y. Diallo and José J. Padilla

8.1 Introduction and Learning Objectives, 298
8.2 Background, 299
8.2.1 Overview, 300
8.2.2 State of the Art in Interoperability, 300
8.2.3 Levels of Interoperability, 302
8.2.4 Current Approaches to Interoperation, 303
8.3 Theory, 305
8.3.1 Data Models, 306
8.3.2 A Relational Model of Data in M&S Systems, 307
Case Study: Live Virtual Constructive Simulation Environments, 311
8.4 Live Virtual Constructive, 311
8.5 LVC Examples, 315
8.6 Distributed Simulation Engineering and Execution Process (DSEEP), 316
8.7 LVC Architecture Framework (LVCAF), 320
8.8 Simulation Systems, 322
Summary, 323
Key Terms, 324
Exercises, 325
References, 325
