

Passerine Migration

Stopovers and Flight

Bearbeitet von
Nikita Chernetsov

1. Auflage 2012. Buch. xii, 184 S. Hardcover
ISBN 978 3 642 29019 0
Format (B x L): 15,5 x 23,5 cm
Gewicht: 461 g

Weitere Fachgebiete > Chemie, Biowissenschaften, Agrarwissenschaften >
Wirbeltiere (Vertebrata) > Vögel (Ornithologie)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1	Introduction	1
1.1	General Introduction to Migratory Movements of Birds	1
1.2	Ultimate Factors that Govern Migration	4
1.3	Aims of the Study	5
1.4	The Main Terminology	6
	References	7
2	Stopover Duration	13
2.1	Methods of Estimating Stopover Duration	13
2.1.1	Minimum Stopover Length Estimates	13
2.1.2	Capture-Mark-Recapture Models: Estimating the Expected Stopover Duration	14
2.1.3	Estimating the Proportions of ‘Transients’ and ‘Non-Transients’	17
2.1.4	Method of Elevated Mist-Nets	18
2.1.5	Radio-Tagging	20
2.2	Estimates Based on Re-Encounters of Marked Birds	21
2.2.1	Biased Estimates: Migratory Stopovers, Postfledging Movements, and Moults	21
2.2.2	Reliable Capture-Mark-Recapture Estimates of Stopover Duration	22
2.2.3	Estimates Based on Resightings	26
2.3	Estimates Based on Radio-Tagging	28
2.4	Within-Species Variance in Stopover Duration: ‘Transients’ and ‘Non-Transients’	29
2.5	Concluding Remarks	31
	References	31

3	Fuel Deposition Rate and Energy Efficiency of Stopovers	37
3.1	Energy Stores of Migrants	37
3.2	Methods of Estimating Fuel Deposition Rate	38
3.2.1	FDR Estimates From Recaptures	38
3.2.2	FDR Estimates From Mass Change of First Captures	40
3.2.3	FDR Estimates From Blood Metabolites	41
3.3	Empirical FDR Values	42
3.3.1	The Mean and Maximum Values Observed	42
3.3.2	Case Study: The European Robin on the Courish Spit	43
3.3.3	FDR Estimates From Blood Metabolites Analysis	45
3.4	Factors that Influence FDR	46
3.4.1	Effect of Initial Fuel Stores	46
3.4.2	Progress of Season	46
3.4.3	Competition	47
3.4.4	Food Availability	48
3.5	Low Initial FDR: Artefact or Real Phenomenon?	49
3.5.1	Methodological Issues	49
3.5.2	Physiological and Ecological Constraints	50
	References	52
4	Optimal Migration Theory	59
4.1	General Remarks	59
4.2	Time Minimisation	61
4.3	Minimisation of Energy Cost of Migration	64
4.4	Predation Risk Minimisation	65
4.5	Basic Equations	66
4.6	Concluding Remarks	70
	References	71
5	Habitat Selection and Use by Passerine Migrants	75
5.1	Introductory Remarks	75
5.2	Scales of Habitat Selection at Stopover	76
5.3	Role of Individual Experience	77
5.4	Termination of Migratory Flights	78
5.5	Search for Home Range and Settling	84
5.5.1	Range and Pattern of Morning Movements	84
5.5.2	Search and Settling Time	85
5.5.3	Coastal Effect: Are Movements of Migrants Age-Related?	86
5.5.4	Broad Movements Throughout Stopover	87
5.6	Habitat Exploitation	89
5.6.1	Non-Random Habitat Use	89
5.6.2	Factors that Govern Habitat Selection by Migrants	90
5.6.3	The Importance of Landscape Context	92

5.7	Fuel Deposition in Oases	94
5.8	Fuel Deposition on Islands	96
	References	97
6	Spatial Behaviour at Stopovers.	105
6.1	Introductory Remarks.	105
6.2	Range and Direction of Daytime Movements of Nocturnal Migrants	106
6.3	Restricted Home Ranges Versus Broad Movements: Visual Observations and Recapture Analysis.	110
6.3.1	Visual Observations and Their Limitations.	110
6.3.2	Analysis of Recaptures and Its Limitations.	111
6.4	Spatial Behaviour at Stopovers: Radio-Tracking Data	116
6.4.1	Technical Parameters of Radio-Tracking and Data Analysis	116
6.4.2	Case Study: European Robin	118
6.4.3	Spatial Behaviour of Other Songbird Migrants	122
6.5	Is Spatial Behaviour Condition-Dependent?	125
6.5.1	Radio-Tracking Data	125
6.5.2	Analysis of Recaptures of European Robins.	126
6.6	Spatial Behaviour of Songbird Migrants at Stopover and Spatial Distribution of Food	127
	References	130
7	Temporal Pattern and Energy Cost of Migratory Flight	135
7.1	Time of Nocturnal Migratory Departures	135
7.1.1	Current Concept of Time Window of Departures	135
7.1.2	Visual Observations and Capture Data that Do Not Fit the Current Concept	136
7.1.3	Nocturnal Departures of Radio-Tagged Songbirds.	140
7.1.4	Impact of Weather on Departure Time	143
7.2	Body Mass and Fuel Stores at Nocturnal Migratory Departure	144
7.3	Departures of Lean Birds and Nocturnal Reverse Flights	147
7.4	Is Departure Time Condition-Dependent?	148
7.5	Time of Ceasing Migratory Flight	150
7.6	Arrival Body Mass	151
7.7	Flight Power Estimates.	152
	References	154
8	Migratory Flights and Stopovers: Organisation of Migration.	159
8.1	The Importance of Fuel Deposition Rate	159
8.2	Factors that Govern Departure Decisions	160
8.3	Series of Migratory Flights and Waves of Passage	163

8.4	Spring Versus Autumn Migration	165
8.5	Annual Movements of a Typical Long-Distance Passerine Nocturnal Migrant	166
8.6	Conclusions	169
8.7	Perspectives of Research of Stopover Ecology and Behaviour of Passerines	172
	References	173
Index		181
