1	Effect of Lifestyle, Aging, and Phytochemicals on the Onset of Neurological Disorders	1
1.1	Introduction.....	1
1.2	Factors Influencing the Onset of Stroke and Neurodegenerative Diseases	3
1.2.1	Effect of Natural and Processed Food on Human Health	4
1.2.2	Effect of Soft Drinks on Human Health.....	5
1.2.3	Effect of Diet on Stroke and Neurodegenerative Diseases	8
1.2.4	Effect of Genetic and Environmental Factors on Stroke and Neurodegenerative Diseases	11
1.3	Effect of Exercise on Stroke and Neurodegenerative Diseases	13
1.4	Effect of Aging on Human Brain	14
1.5	Bioavailability, Side Effects, and Safety of Phytochemicals	18
1.6	Mechanism Associated with Beneficial Effects of Phytochemicals on Human Brain	19
1.7	Conclusion	21
	References.....	22
2	Beneficial Effects of Extra Virgin Olive Oil (n-9 Fatty Acids) on Neurological Disorders	31
2.1	Introduction.....	31
2.2	Chemical Composition and Biochemical Activities of Components of Olive Oil	32
2.2.1	Bioavailability and Metabolism of Olive Oil Components	36

2.2.2	Biochemical Effects of Olive Oil Phenolic Compound on Heart.....	38
2.2.3	Biochemical Effects of Olive Oil Phenolic Compound on the Brain.....	43
2.3	Effect of Oleic Acid on Neurological Disorders.....	46
2.3.1	Beneficial Effects of Olive Oil Components in Alzheimer Disease	47
2.3.2	Beneficial Effects of Olive Oil Components on Hypoxic Injury	49
2.3.3	Beneficial Effects of Olive Oil Components on Atherosclerosis.....	49
2.3.4	Beneficial Effects of Olive Oil Components on Brain Tumor.....	50
2.4	Conclusion	50
	References.....	51
3	Beneficial Effects of Flaxseed Oil (n-3 Fatty Acids) on Neurological Disorders.....	57
3.1	Introduction.....	57
3.2	Absorption of α -Linolenic Acid in the Gut and Transport into the Brain	58
3.2.1	Metabolic Fate of ALA	60
3.2.2	Metabolic Fate of EPA.....	62
3.2.3	Metabolic Fate of DHA.....	64
3.2.4	Possible Adverse Effects of ALA Consumption	64
3.2.5	Possible Adverse Effects of EPA and DHA Consumption.....	64
3.3	Roles of n-3 Fatty Acids in the Brain.....	66
3.3.1	Roles of ALA in the Brain	66
3.3.2	Roles of EPA in the Brain	68
3.3.3	Roles of DHA in the Brain.....	69
3.4	Effect of ALA on Neurological Disorders	70
3.4.1	Effect of ALA on Ischemic Injury.....	70
3.4.2	Effect of ALA on Spinal Cord Trauma	72
3.4.3	Effect of ALA on Alzheimer Disease.....	73
3.4.4	Effect of ALA on Dementia	74
3.4.5	Effect of ALA on Major Depressive Disorders.....	74
3.5	Conclusion	75
	References.....	75
4	Beneficial Effects of Flavonoids on Neurological Disorders.....	83
4.1	Introduction.....	83
4.2	Bioavailability and Metabolism of Flavonoids in the Brain.....	87
4.3	Biochemical Effects of Flavonoids	89
4.3.1	Antioxidant Properties of Flavonoids	91
4.3.2	Anti-inflammatory Properties of Flavonoids	92

4.3.3	Regulation of Enzymes by Flavonoids	93
4.3.4	Effect of Flavonoids on Transcription Factors.....	95
4.3.5	Flavonoids and Endothelial Cell Dysfunction	97
4.3.6	Effect of Flavonoids on Memory	98
4.3.7	Effects of Flavonoids on Microglial Cells	99
4.3.8	Modulation of Immunity by Flavonoids	99
4.4	Effect of Flavonoids on Neurological Disorders	100
4.4.1	Flavonoids and Alzheimer Disease	101
4.4.2	Flavonoids and Stroke.....	103
4.4.3	Flavonoids and Parkinson Disease.....	105
4.4.4	Flavonoids and Multiple Sclerosis.....	106
4.5	Harmful Effects of Flavonoids.....	107
4.6	Conclusion	108
	References.....	108
5	Beneficial Effects of Green Tea Catechins	
	on Neurological Disorders	117
5.1	Introduction.....	117
5.2	Bioavailability and Metabolism of Green Tea	
	Catechins in the Brain.....	120
5.3	Beneficial Effects of Green Tea Catechins in the Brain.....	122
5.3.1	Antioxidant Properties of Green Tea Catechins.....	123
5.3.2	Anti-inflammatory Properties of Green Tea Catechins	127
5.3.3	Antitumor Properties of Green Tea Catechins	128
5.3.4	Antiobesity Properties of Green Tea Catechins	129
5.4	Effects of Green Tea Catechins on Neurological Disorders	130
5.4.1	Effect of Green Tea Catechins in Animal Models	
	of Brain Ischemia.....	130
5.4.2	Effect of Green Tea in Animal Models	
	of Traumatic Brain Injury	131
5.4.3	Effect of Green Tea Catechins in Animal Models	
	of Alzheimer Disease	132
5.4.4	Effect of Green Tea Catechins in Animal Models	
	of Parkinson Disease.....	134
5.4.5	Effect of Green Tea Catechins in Animal Models	
	of Amyotrophic Lateral Sclerosis	136
5.4.6	Effect of Green Tea Catechins on EAE.....	136
5.4.7	Effect of Green Tea on Prion Diseases	138
5.5	Side Effects of Green Tea	139
5.5.1	Anxiolytic Effects of Green Tea.....	139
5.5.2	Hypoglycemic Effects of Green Tea.....	140
5.5.3	Hypochromic Effects of Green Tea.....	140
5.5.4	Liver and Kidney Failure and Green Tea.....	140
5.6	Conclusion	141
	References.....	142

6	Beneficial Effects of Curcumin on Neurological Disorders.....	151
6.1	Introduction.....	151
6.2	Bioavailability of Curcumin in the Brain.....	153
6.3	Molecular Targets of Curcumin	156
6.3.1	Transcription Factors as a Target for Curcumin.....	160
6.3.2	Effect of Curcumin on Enzyme Activities and Neurochemical Processes.....	166
6.3.3	Effect of Curcumin on Biochemical Processes in the Brain	166
6.4	Therapeutic Importance of Curcumin in Neurological Disorders	171
6.4.1	Curcumin and Alzheimer Disease.....	172
6.4.2	Curcumin and Dementia	175
6.4.3	Curcumin and Parkinson Disease	175
6.4.4	Curcumin and Prion Diseases	176
6.4.5	Curcumin and Multiple Sclerosis.....	177
6.4.6	Curcumin and Ischemic Injury.....	178
6.4.7	Curcumin and Traumatic Brain Injury	180
6.4.8	Curcumin and Spinal Cord Injury	181
6.4.9	Curcumin and Epilepsy	182
6.4.10	Curcumin and Depression.....	183
6.4.11	Curcumin and Tardive Dyskinesia	185
6.4.12	Curcumin and Kainic Acid Neurotoxicity	186
6.5	Side Effects of Curcumin.....	186
6.6	Conclusion	187
	References.....	188
7	Beneficial Effects of Resveratrol on Neurological Disorders	199
7.1	Introduction.....	199
7.2	Metabolism and Bioavailability of Resveratrol in the Brain	202
7.3	Biological Activities of Resveratrol.....	203
7.3.1	Effect of Resveratrol on Transcription Factors	204
7.3.2	Regulation of Neuroinflammation by Resveratrol	206
7.3.3	Regulation of Oxidative Stress by Resveratrol.....	208
7.3.4	Effect of Resveratrol and Other Wine Polyphenols on Angiogenesis.....	210
7.3.5	Effect of Resveratrol on Silent Information Regulator.....	212
7.3.6	Regulation of Cell Cycle Progression by Resveratrol	214
7.4	Beneficial Effects of Resveratrol on Neurological Disorders.....	214
7.4.1	Beneficial Effects of Resveratrol on Ischemia/ Reperfusion Injury	216
7.4.2	Beneficial Effects of Resveratrol on Traumatic Brain Injury.....	218
7.4.3	Beneficial Effects of Resveratrol on Spinal Cord Injury	219

7.4.4	Beneficial Effects of Resveratrol on Epilepsy	220
7.4.5	Beneficial Effects of Resveratrol on Alzheimer Disease	220
7.4.6	Beneficial Effects of Resveratrol on Parkinson Disease	223
7.4.7	Beneficial Effects of Resveratrol on Other Neurodegenerative Diseases.....	226
7.4.8	Beneficial Effects of Resveratrol in Kainic Acid Neurotoxicity	227
7.5	Conclusion	227
	References.....	228
8	Beneficial Effects of <i>Ginkgo biloba</i> in Neurological Disorders.....	237
8.1	Introduction.....	237
8.2	Bioavailability of <i>Ginkgo biloba</i> in the Brain.....	238
8.3	Neurochemical Effects of EGb 761	241
8.3.1	EGb 761 and Lipid Peroxidation	241
8.3.2	EGb 761 and Transcription Factors	242
8.3.3	EGb 761 and Gene Expression	243
8.3.4	EGb 761 and Mitochondrial Dysfunction.....	245
8.3.5	EGb 761 and Memory Formation and Consolidation.....	247
8.3.6	EGb 761 and Antiapoptotic Effects	248
8.3.7	EGb 761 and Thickening of Aorta	248
8.4	EGb 761 and Neurological Disorders	249
8.4.1	Egb 761 and Stroke.....	251
8.4.2	EGb 761 and Alzheimer Disease	252
8.4.3	EGb 761 and Parkinson Disease	254
8.4.4	EGb 761 and Huntington Disease.....	255
8.4.5	EGb 761 and Prion Diseases.....	256
8.4.6	EGb 761 and Dementia.....	257
8.4.7	EGb 761 and Depression	258
8.4.8	EGb 761 and Attention-Deficit Disorder/ Attention-Deficit/Hyperactivity Disorder	260
8.4.9	EGb 761 and Autism.....	260
8.4.10	EGb 761 and Migraine Headache	261
8.5	Side Effects of EGb 761.....	261
8.6	Conclusion	262
	References.....	262
9	Beneficial Effects of Garlic Components on Neurological Disorders	271
9.1	Introduction.....	271
9.2	Bioavailability of Garlic Constituents in the Brain.....	273
9.3	Biological Effects of Garlic Components	274
9.3.1	Antioxidant Effects of Garlic Constituents	275
9.3.2	Antiinflammatory Effects of Garlic Constituents.....	277

9.3.3	Antitumor Effects of Garlic Constituents.....	279
9.3.4	Antifungal Effects of Garlic Constituents.....	279
9.3.5	Immune System Enhancing Effects of Garlic Constituents	280
9.3.6	Cholesterol Lowering Properties of Garlic Constituents	280
9.3.7	Memory Retention and Garlic Constituents.....	281
9.4	Hydrogen Sulfide and Garlic	281
9.5	Adverse Effects of Garlic.....	284
9.6	Effects of Garlic Constituents and Neurological Disorders.....	286
9.6.1	Garlic Constituents and Ischemic Injury.....	287
9.6.2	Garlic Constituents and Alzheimer Disease.....	288
9.6.3	Garlic Constituents and Parkinson Disease.....	291
9.6.4	Effect of Garlic Constituents in Animal Model of Huntington Disease.....	292
9.6.5	Effect of Garlic Constituents on Depression.....	292
9.7	Conclusion	293
	References.....	294
10	Beneficial Effects of Propolis on Neurological Disorders	301
10.1	Introduction.....	301
10.2	Chemical Composition and Biological Activities of Propolis.....	302
10.3	Bioavailability of Propolis Components in the Brain	307
10.4	Beneficial Effects of Propolis Components on Neurological Disorders	309
10.4.1	Beneficial Effects of Propolis Components in Ischemic Injury	311
10.4.2	Beneficial Effects of Propolis Components in Spinal Cord Injury.....	312
10.4.3	Beneficial Effects of Propolis Components in Epilepsy.....	313
10.4.4	Beneficial Effects of Propolis Components in Parkinson Disease	313
10.4.5	Beneficial Effects of Propolis Components in Alzheimer Disease.....	314
10.4.6	Beneficial Effects of Propolis Components on Experimental Allergic Encephalomyelitis.....	315
10.4.7	Beneficial Effects of Propolis Components in Anxiety	315
10.5	Challenges and Side Effects of Propolis.....	316
10.6	Conclusion	316
	References.....	317

11	Perspective and Direction for Future Research on Phytochemicals in Neurological Disorders	323
11.1	Introduction	323
11.2	Problems Associated with the Use of Phytochemicals for Human Health.....	324
11.3	Molecular Mechanisms Associated with Beneficial Effects of Phytochemicals.....	328
11.4	Unresolved Issues Associated with Therapeutic Use of Phytochemicals.....	333
11.5	Challenges for Studies on Therapeutic Use of Phytochemicals in Neurological Disorders	334
11.6	Conclusion	335
	References.....	336
	Index.....	341

Phytochemicals, Signal Transduction, and Neurological Disorders

Farooqui, A.A.

2012, XXIV, 351 p. 89 illus., 35 in color., Hardcover

ISBN: 978-1-4614-3803-8
