

Contents

1	Introduction to Averaging	1
1.1	Averaging for Ordinary Differential Equations	1
1.1.1	Averaging for Globally Lipschitz Systems	1
1.1.2	Averaging for Locally Lipschitz Systems	4
1.2	Stochastic Averaging	7
1.2.1	Averaging for Stochastic Perturbation Process	7
1.2.2	Averaging for Stochastic Differential Equations	8
2	Introduction to Extremum Seeking	11
2.1	Motivation and Recent Revival	11
2.2	Why Stochastic Extremum Seeking?	12
2.3	A Brief Introduction to Stochastic Extremum Seeking	13
2.3.1	A Basic Deterministic ES Scheme	14
2.3.2	A Basic Stochastic ES Scheme	15
2.3.3	A Heuristic Analysis of a Simple Stochastic ES Algorithm	16
3	Stochastic Averaging for Asymptotic Stability	21
3.1	Problem Formulation	21
3.2	Main Theorems	22
3.2.1	Uniform Strong Ergodic Perturbation Process	22
3.2.2	ϕ -Mixing Perturbation Process	26
3.3	Proofs of the Theorems	29
3.3.1	Proofs for the Case of Uniform Strong Ergodic Perturbation Process	29
3.3.2	Proofs for the Case of ϕ -Mixing Perturbation Process	36
3.4	Examples	51
3.4.1	Perturbation Process Is Asymptotically Periodic	51
3.4.2	Perturbation Process Is Almost Surely Exponentially Stable	52
3.4.3	Perturbation Process Is Brownian Motion on the Unit Circle	54
3.5	Notes and References	55

4	Stochastic Averaging for Practical Stability	57
4.1	General Stochastic Averaging	57
4.1.1	Problem Formulation	57
4.1.2	Statements of General Results on Stochastic Averaging	61
4.2	Proofs of the General Theorems on Stochastic Averaging	64
4.2.1	Proof of Lemma 4.1	64
4.2.2	Proof of Approximation Result (4.22) of Theorem 4.1	65
4.2.3	Preliminary Lemmas for the Proof of Approximation Result (4.23) of Theorem 4.1	66
4.2.4	Proof of Approximation Result (4.23) of Theorem 4.1	69
4.2.5	Proof of Theorem 4.2	70
4.2.6	Proof of (4.45)	72
4.3	Discussions of the Existence of Solution	74
4.4	Notes and References	78
5	Single-parameter Stochastic Extremum Seeking	79
5.1	Extremum Seeking for a Static Map	81
5.2	Stochastic Extremum Seeking Feedback for General Nonlinear Dynamic Systems	86
5.3	Notes and References	93
6	Stochastic Source Seeking for Nonholonomic Vehicles	95
6.1	Vehicle Model and Problem Statement	96
6.2	Stochastic Source Seeking Controller	96
6.3	Stability Analysis	98
6.4	Convergence Speed	103
6.5	Simulations and Dependence on Design Parameters	107
6.5.1	Basic Simulations	107
6.5.2	Dependence of Annulus Radius ρ on Parameters	108
6.6	Dependence on Damping Term d_0	108
6.6.1	No Damping ($d_0 = 0$)	108
6.6.2	Effect of Damping ($d_0 > 0$)	110
6.7	Effect of Constraints of the Angular Velocity and Design Alternatives	112
6.7.1	Effect of Constraints of the Angular Velocity	112
6.7.2	Alternative Designs	112
6.8	System Behavior for Elliptical Level Sets	116
6.9	Notes and References	117
7	Stochastic Source Seeking with Tuning of Forward Velocity	121
7.1	The Model of Autonomous Vehicle	121
7.2	Search Algorithm and Convergence Analysis	122
7.3	Simulation	126
7.4	Notes and References	127
8	Multi-parameter Stochastic Extremum Seeking and Slope Seeking	129
8.1	Multi-input Stochastic Averaging	129

8.2	Multi-parameter Stochastic ES for Static Maps	132
8.2.1	Algorithm for Multi-parameter Stochastic ES	132
8.2.2	Convergence Analysis	134
8.3	Stochastic Gradient Seeking	138
8.3.1	Single-parameter Stochastic Slope Seeking	138
8.3.2	Multi-parameter Stochastic Gradient Seeking	142
8.4	Notes and References	146
9	Stochastic Nash Equilibrium Seeking for Games with General Nonlinear Payoffs	147
9.1	Problem Formulation	148
9.2	Stochastic Nash Equilibrium Seeking Algorithm	149
9.3	Proof of the Algorithm Convergence	152
9.4	Numerical Example	155
9.5	Notes and References	159
10	Nash Equilibrium Seeking for Quadratic Games and Applications to Oligopoly Markets and Vehicle Deployment	161
10.1	N -Player Games with Quadratic Payoff Functions	161
10.1.1	General Quadratic Games	161
10.1.2	Symmetric Quadratic Games	166
10.2	Oligopoly Price Games	167
10.3	Multi-agent Deployment in the Plane	169
10.3.1	Vehicle Model and Local Agent Cost	169
10.3.2	Control Design	170
10.3.3	Stability Analysis	172
10.3.4	Simulation	178
10.4	Notes and References	178
11	Newton-Based Stochastic Extremum Seeking	181
11.1	Single-parameter Newton Algorithm for Static Maps	181
11.2	Multi-parameter Newton Algorithm for Static Maps	185
11.2.1	Problem Formulation	185
11.2.2	Algorithm Design and Stability Analysis	186
11.3	Newton Algorithm for Dynamic Systems	188
11.4	Simulation	197
11.5	Notes and References	199
	Appendix A Some Properties of p-Limit and p-Infinitesimal Operator .	201
	Appendix B Auxiliary Proofs for Section 3.2.2	203
	References	215
