<b>1</b>	<b>Primary Prevention of Genetic Disorders and Place of Preimplantation Diagnosis</b> . . . . .	1
	References . . . . .	8
<b>2</b>	<b>Approaches to Preimplantation Diagnosis</b> . . . . .	11
2.1	Obtaining Biopsy Material . . . . .	13
2.1.1	Polar Body Diagnosis . . . . .	14
2.1.2	Pre-embryonic Genetic Diagnosis (PEGD) . . . . .	15
2.1.3	Preconception Testing for Paternally Derived Mutations by Sperm Duplication . . . . .	23
2.1.4	Development of Artificial Human Gametes In Vitro . . . . .	24
2.1.5	Embryo Biopsy . . . . .	25
2.2	Single-Cell Genetic Analysis . . . . .	27
2.2.1	DNA Analysis . . . . .	27
2.2.2	FISH Analysis . . . . .	30
2.2.3	Microarray Analysis . . . . .	37
	References . . . . .	40
<b>3</b>	<b>Preimplantation Diagnosis for Single-Gene Disorders</b> . . . . .	45
3.1	Autosomal-Recessive Diseases . . . . .	59
3.2	Autosomal-Dominant Disorders . . . . .	69
3.3	X-Linked Disorders . . . . .	77
3.4	Homozygous or Double Heterozygous Recessive Conditions . . . . .	89
3.5	Conditions with no Available Direct Mutation Testing . . . . .	94
3.6	De Novo Mutations . . . . .	101
3.7	Late-Onset Disorders with Genetic Predisposition . . . . .	112
3.7.1	Inherited Predisposition to Cancer . . . . .	112
3.7.2	Alzheimer Disease . . . . .	127
3.7.3	Inherited Cardiac Diseases . . . . .	130
3.8	Blood Group Incompatibility . . . . .	140
3.9	Congenital Malformations . . . . .	143
3.10	Dynamic Mutations . . . . .	153
3.11	Overall Experience of PGD for Mendelian Disorders . . . . .	159
	References . . . . .	167
<b>4</b>	<b>PGD for HLA Typing</b> . . . . .	171

4.1	Fanconi Anemia – World’s First PGD for HLA Typing . . . . .	171
4.2	Thalassemia . . . . .	173
4.3	Immunodeficiencies . . . . .	178
4.4	Preimplantation HLA Matching Without PGD . . . . .	191
4.5	Limitations and Future Prospects of PGD for HLA Typing . . . . .	194
4.6	Practical Implications of PGD for HLA Typing . . . . .	200
	References . . . . .	202
<b>5</b>	<b>Preimplantation Diagnosis for Chromosomal Disorders . . . . .</b>	<b>205</b>
5.1	First Polar Body Morphological Grading as Possible Potential Means for Preselecting Viable Oocytes . . . . .	206
5.2	Aneuploidy in Human Oocytes . . . . .	211
5.2.1	Testing for Both Meiosis I and Meiosis II Errors Required for PGD of Aneuploidies . . . . .	211
5.2.2	Inconsistency Between Aneuploidy Types Predicted by PB1 and Detected by Cleavage-Stage Testing . . . . .	218
5.2.3	Complex Errors and Aneuploidy Rescue in Female Meiosis . . . . .	220
5.2.4	Chromosome-Specific Meiotic Error Origin and Its Impact on Embryo Viability . . . . .	223
5.2.5	Mitotic Errors in Cleaving Embryos in Relation to Meiosis Errors . . . . .	224
5.2.6	PCR-Based Aneuploidy Testing in Cleaving Embryos . . . . .	227
5.2.7	Practical Relevance of Autosomal Monosomy Detection . . . . .	228
5.2.8	Uniparental Disomies . . . . .	231
5.2.9	Impact of PB Testing in Detection and Avoidance of Aneuploid Embryos for Transfer . . . . .	232
5.3	Chromosomal Rearrangements . . . . .	233
5.3.1	Polar Body Approach . . . . .	234
5.3.2	Blastomere Nuclear Conversion by Fusion with Mouse Oocytes . . . . .	235
5.3.3	Chemical Conversion Method . . . . .	236
	References . . . . .	254
<b>6</b>	<b>Clinical Outcome of Preimplantation Genetic Diagnosis . . . . .</b>	<b>259</b>
6.1	Safety of PGD . . . . .	259
6.2	Diagnostic Accuracy of PGD . . . . .	260
6.3	Reproductive Outcome of PGD . . . . .	261
6.4	Controversy in Assessing Clinical Outcome of Preimplantation Aneuploidy Testing . . . . .	262
