<b>1</b>	<b>Balance Equations</b> .....	1
1.1	Material Points .....	2
1.1.1	Summary .....	3
1.2	Densities for Content, Flow, and Production Rate .....	4
1.2.1	Densities .....	4
1.2.2	Current Densities .....	4
1.2.3	Production .....	5
1.2.4	Generic Balance Equation .....	6
1.2.5	Summary .....	7
1.3	Particle Numbers, Mass, and Electric Charge .....	8
1.3.1	Particle Numbers and Currents .....	8
1.3.2	Chemical Reactions .....	8
1.3.3	Mass .....	9
1.3.4	Electric Charge .....	10
1.3.5	Digression on Electromagnetism .....	11
1.3.6	Summary .....	12
1.4	Convection and Conduction .....	13
1.4.1	Conduction .....	13
1.4.2	Transformation Properties of Currents .....	14
1.4.3	Material Time Derivative .....	15
1.4.4	Specific Quantities .....	16
1.4.5	Summary .....	17
1.5	Linear and Angular Momentum .....	17
1.5.1	Stress and External Forces .....	17
1.5.2	Angular Momentum .....	18
1.5.3	Normal and Shear Forces .....	19
1.5.4	Summary .....	20
1.6	Energy and the First Law of Thermodynamics .....	20
1.6.1	Kinetic Energy .....	20
1.6.2	Potential Energy .....	21
1.6.3	Internal Energy .....	22

1.6.4	Digression on Time Reversal .....	23
1.6.5	First Law of Thermodynamics .....	24
1.6.6	Summary .....	26
1.7	Entropy and the Second Law of Thermodynamics.....	26
1.7.1	Thermodynamic Equilibrium .....	27
1.7.2	Balance Equation for Entropy .....	27
1.7.3	Second Law of Thermodynamics .....	29
1.7.4	Summary .....	30
<b>2</b>	<b>Material Equations .....</b>	<b>31</b>
2.1	Fluid Media .....	32
2.1.1	Incompressible Fluids .....	32
2.1.2	Ideal Gas.....	33
2.1.3	Newtonian Fluid Medium .....	34
2.1.4	Hydrodynamics .....	35
2.1.5	Aerodynamics .....	36
2.1.6	Summary .....	37
2.2	Solid Media .....	37
2.2.1	Strain .....	38
2.2.2	Hooke's Law .....	39
2.2.3	Structural Mechanics .....	40
2.2.4	Elastodynamics.....	42
2.2.5	Summary .....	42
2.3	Heat Conduction .....	42
2.3.1	Fourier's Law.....	43
2.3.2	More on Heat Conduction .....	44
2.3.3	Heat Equation .....	44
2.3.4	Summary .....	45
2.4	Diffusion .....	45
2.4.1	Diffusion Currents .....	46
2.4.2	Chemical Potential .....	46
2.4.3	Diffusion Equation .....	47
2.4.4	Digression on Open Systems .....	47
2.4.5	Summary .....	48
2.5	Charge Transport .....	49
2.5.1	The Electromagnetic Field in Matter.....	49
2.5.2	Contributions to the Electric Current Density .....	51
2.5.3	Ohm's Law .....	51
2.5.4	Summary .....	52
2.6	Thermoelectric Effects .....	52
2.6.1	Simultaneous Heat and Charge Transport .....	53
2.6.2	Forces and Fluxes .....	53
2.6.3	Kinetic Coefficients for Heat and Charge Transport .....	54
2.6.4	Summary .....	55

<b>3</b>	<b>Linear Response Theory</b> .....	57
3.1	Statistical Thermodynamics .....	57
3.1.1	Quantum Theory .....	57
3.1.2	Entropy .....	60
3.1.3	Equilibrium .....	61
3.1.4	Summary .....	63
3.2	Perturbations .....	63
3.2.1	Interaction Picture .....	63
3.2.2	Linear Response .....	65
3.2.3	Perturbation by Light .....	66
3.2.4	Susceptibility Tensor .....	67
3.2.5	Summary .....	68
3.3	Dispersion Relations .....	68
3.3.1	Causal Functions .....	69
3.3.2	Kramers-Kronig Relations .....	70
3.3.3	Summary .....	72
3.4	Fluctuations and Dissipation .....	72
3.4.1	Wiener-Khinchin Theorem .....	72
3.4.2	Kubo-Martin-Schwinger Formula .....	74
3.4.3	Callen-Welton Theorem .....	75
3.4.4	Interaction with an Electromagnetic Field .....	77
3.4.5	Summary .....	78
3.5	Onsager Relations .....	78
3.5.1	Time Reversal .....	79
3.5.2	Symmetries for Susceptibilities .....	80
3.5.3	Symmetries for Conductivities .....	82
3.5.4	Symmetries for Kinetic Coefficients .....	83
3.5.5	Summary .....	85
<b>4</b>	<b>Examples</b> .....	87
4.1	Archimedes' Principle .....	88
4.1.1	Erroneous Reasoning .....	89
4.1.2	Incompressible Fluid .....	90
4.1.3	Compressible Fluid .....	91
4.2	Beam Bending and Buckling .....	92
4.2.1	Beam Theory .....	92
4.2.2	Equilibrium .....	96
4.2.3	An Example .....	97
4.2.4	Buckling Instability .....	98
4.3	Bernoulli's Law .....	100
4.4	Brownian Motion .....	101
4.4.1	Einstein's Explanation .....	103
4.4.2	The Diffusion Coefficient .....	105
4.4.3	Langevin's Approach .....	106

- 4.5 Bulk and Surface Acoustic Waves in Solids..... 109
  - 4.5.1 Wave Equation ..... 109
  - 4.5.2 Bulk Acoustic Waves ..... 110
  - 4.5.3 Attenuation ..... 111
  - 4.5.4 Rayleigh Waves ..... 112
  - 4.5.5 More on SAW ..... 114
- 4.6 Crystal Optics ..... 115
  - 4.6.1 Susceptibility ..... 115
  - 4.6.2 Planar Waves ..... 116
  - 4.6.3 Optical Isotropy ..... 117
  - 4.6.4 Birefringence ..... 118
  - 4.6.5 Polarization Change Due to Birefringence ..... 119
  - 4.6.6 Absorption..... 120
  - 4.6.7 Dispersion ..... 121
- 4.7 Dielectric Planar Waveguides ..... 121
  - 4.7.1 TE Modes ..... 123
  - 4.7.2 TM Modes ..... 124
  - 4.7.3 Graded Index Waveguides ..... 125
  - 4.7.4 Slab Waveguides ..... 127
- 4.8 Elasticity Moduli ..... 129
  - 4.8.1 Strain and Stress ..... 129
  - 4.8.2 Uniaxial Stress ..... 130
  - 4.8.3 Hydrostatic Pressure ..... 131
  - 4.8.4 Torsion..... 132
  - 4.8.5 Examples: Steel and Rubber..... 133
- 4.9 Faraday Effect ..... 134
  - 4.9.1 Susceptibility and Onsager’s Relation ..... 134
  - 4.9.2 Rotation of the Polarization Vector ..... 135
  - 4.9.3 Drude Model ..... 137
  - 4.9.4 Optical Isolator ..... 139
  - 4.9.5 Yttrium Iron Garnet..... 140
- 4.10 Fourier’s Solution of a Heat Conduction Problem ..... 140
  - 4.10.1 Representation of a Periodic Function ..... 141
  - 4.10.2 Ordinary Instead of Partial Differential Equations ..... 141
  - 4.10.3 Initial Conditions..... 141
- 4.11 Hagen-Poiseuille Law ..... 142
  - 4.11.1 Exploiting Symmetry ..... 143
  - 4.11.2 Flux ..... 143
  - 4.11.3 Pump Power ..... 144
- 4.12 Ice Layer ..... 145
  - 4.12.1 Phase Transition Enthalpy ..... 145
  - 4.12.2 The Problem..... 146
  - 4.12.3 Crude Approximation..... 147
  - 4.12.4 Dimensionless Quantities..... 148
  - 4.12.5 The Exact Solution..... 149
  - 4.12.6 Discussion ..... 150

- 4.13 Metamaterials ..... 150
  - 4.13.1 Resonances ..... 151
  - 4.13.2 Wave Propagation ..... 152
  - 4.13.3 Normal Refraction ..... 153
  - 4.13.4 Refraction in a Backward Medium..... 155
  - 4.13.5 A New Type of Optical Microscope ..... 156
  - 4.13.6 Photonic Crystals ..... 157
- 4.14 Model Atmosphere ..... 159
  - 4.14.1 Adiabatic Process for a Diatomic Ideal Gas ..... 159
  - 4.14.2 Convection Neutral Atmosphere ..... 160
- 4.15 Natural Units ..... 162
  - 4.15.1 SI and Atomic Units ..... 162
  - 4.15.2 Remarks ..... 164
- 4.16 Ohm’s Law and Hall Effect ..... 165
  - 4.16.1 Drude Model ..... 166
  - 4.16.2 Onsager Relations ..... 167
  - 4.16.3 Hall Effect ..... 168
  - 4.16.4 Electro-Chemical Potential ..... 169
- 4.17 Optically Active Media ..... 169
  - 4.17.1 Spatial Dispersion ..... 170
  - 4.17.2 Optical Activity ..... 171
  - 4.17.3 Quartz ..... 172
  - 4.17.4 Natural Grape Sugar ..... 173
- 4.18 Pockels and Kerr Effect ..... 174
  - 4.18.1 Dielectric Susceptibility ..... 175
  - 4.18.2 Pockels Effect ..... 176
  - 4.18.3 Crystal Symmetry 3m ..... 176
  - 4.18.4 Symmetry Compatible Tensors ..... 177
  - 4.18.5 Digression on Orders of Magnitude ..... 179
  - 4.18.6 How Light Propagation is Affected ..... 180
  - 4.18.7 Kerr Effect ..... 181
- 4.19 Reactions and Diffusion ..... 182
  - 4.19.1 Gray-Scott Model ..... 183
  - 4.19.2 Similarity Considerations ..... 183
  - 4.19.3 Homogeneous Solutions ..... 184
  - 4.19.4 Pattern Formation ..... 186
  - 4.19.5 Further Remarks ..... 188
- 4.20 Reynold’s Number ..... 188
  - 4.20.1 Navier-Stokes Equation ..... 188
  - 4.20.2 Similarity Considerations ..... 189
  - 4.20.3 Laminar Flow and Turbulence ..... 190
- 4.21 Sound in Air ..... 190
  - 4.21.1 Wave Equation ..... 191
  - 4.21.2 Sound Generation ..... 193

4.22	Stokes' Law .....	196
4.22.1	The Problem .....	196
4.22.2	Vorticity and Stream Function .....	197
4.22.3	The Solution .....	199
4.22.4	Stoke's Formula .....	199
4.23	Stress Concentration .....	201
4.23.1	Circular Hole in a Thin Plate .....	201
4.23.2	Airy's Stress Function for Planar Problems .....	203
4.23.3	The Solution .....	203
4.23.4	Discussion .....	205
4.24	Surface Plasmon Polaritons .....	206
4.24.1	The Drude Model .....	206
4.24.2	Guided TM Mode .....	207
4.24.3	TE Polarization .....	210
4.25	Thermal Noise of a Resistor .....	210
4.25.1	Langevin Equation .....	211
4.25.2	Nyquist Formula .....	212
4.25.3	Remarks .....	214
4.26	Thomson, Seebeck and Peltier Effect .....	215
4.26.1	Solid Conductors .....	215
4.26.2	Charge and Heat Transport .....	216
4.26.3	Thomson Effect .....	217
4.26.4	Seebeck and Peltier Effect .....	218
4.27	Vibrating Strings and Membranes .....	219
4.27.1	Strings .....	219
4.27.2	Membranes .....	220
4.27.3	String Eigenmodes .....	221
4.27.4	Membrane Eigenmodes .....	225
4.28	White Dwarfs .....	228
4.28.1	The Model .....	229
4.28.2	Equation of State .....	229
4.28.3	Orders of Magnitude .....	231
4.28.4	Numerical Solution .....	231
4.28.5	Remarks .....	232
<b>A</b>	<b>Fields .....</b>	<b>235</b>
A.1	Covariance .....	236
A.1.1	Inertial Systems of Reference .....	236
A.1.2	Tensor Fields .....	238
A.2	Differentiating Fields .....	239
A.2.1	Time Derivative .....	239
A.2.2	Gradient .....	240
A.2.3	Divergence .....	240
A.2.4	Curl .....	240

A.3	Paths, Surfaces and Volumes .....	241
A.3.1	Paths .....	241
A.3.2	Surfaces .....	243
A.3.3	Volumes .....	246
A.4	Integrating Fields .....	247
A.4.1	Path Integrals .....	247
A.4.2	Surface Integrals .....	248
A.4.3	Volume Integrals .....	249
A.4.4	Stokes' and Gauss' Theorems .....	250
A.5	More on Fields .....	252
A.5.1	Densities and Current Densities .....	252
A.5.2	Time Derivatives .....	254
