

## Contents

**Preface** XI

**List of Contributors** XIII

**Introduction** 1

**1 The Significance of Heterocycles for Pharmaceuticals and Agrochemicals** 3

*Clemens Lamberth and Jürgen Dinges*

1.1 Introduction 3

1.2 Heterocycles as Framework of Biologically Active Compounds 4

1.3 Fine-Tuning the Physicochemical Properties with Heterocycles 6

1.4 Heterocycles as Prodrugs 6

1.5 Heterocycles as Peptidomimetics 7

1.6 Heterocycles as Isosteric Replacement of Functional Groups 8

1.7 Heterocycles as Isosteric Replacement of Alicyclic Rings 11

1.8 Heterocycles as Isosteric Replacement of other Heterocyclic Rings 13

References 16

**Part I Herbicides** 21

**2 Triazine Herbicides** 23

*Andrew J.F. Edmunds*

2.1 Introduction 23

2.2 History 23

2.3 Synthesis 27

2.4 Mode of Action 31

2.4.1 Point Mutation in psbA Gene 33

2.4.2 Glutathione Conjugation 33

2.4.3 Metabolic Resistance 34

2.5 Biological Activity 34

2.6 Structure–Activity Relationships 34

References 37

- 3 Pyrimidinyl and Triazinylsulfonyleurea Herbicides 39**  
*Mary Ann Hanagan and Atul Puri*
- 3.1 Introduction 39
- 3.2 History 39
- 3.2.1 Propyrisulfuron 41
- 3.2.2 Metazosulfuron 41
- 3.3 Synthesis 41
- 3.4 Mode of Action 45
- 3.5 Biological Activity 46
- 3.6 Structure–Activity Relationship 47
- References 48
- 4 Acetohydroxyacid Synthase Inhibiting Triazolopyrimidine Herbicides 51**  
*Timothy C. Johnson, Richard K. Mann, Paul R. Schmitzer, and Roger E. Gast*
- 4.1 Introduction 51
- 4.2 History 51
- 4.3 Synthesis 53
- 4.4 Mode of Action 55
- 4.5 Biological Activity 56
- 4.6 Structure–Activity Relationship 57
- References 59
- 5 HPPD-Inhibiting Benzoylpyrazole Herbicides 61**  
*Matthias Witschel*
- 5.1 Introduction 61
- 5.2 History 61
- 5.3 Synthesis 62
- 5.4 Mode of Action 64
- 5.5 Biological Activity 66
- 5.6 Structure–Activity Relationship 66
- References 68
- 6 Pyridyloxyphenoxypropionate Herbicides: Inhibitors of Acetyl-CoA Carboxylase 69**  
*William G. Whittingham*
- 6.1 Introduction 69
- 6.2 History 69
- 6.3 Synthesis 71
- 6.4 Mode of Action 73
- 6.5 Biological Activity 75
- 6.6 Structure–Activity Relationships 76
- References 80

- 7 Imidazolinone Herbicides 83**  
*Dale Shaner*
- 7.1 Introduction 83  
7.2 History 83  
7.3 Synthesis 85  
7.4 Mode of Action 86  
7.5 Biological Activity 86  
7.6 Structure–Activity Relationship 88  
References 89
- 8 Protoporphyrinogen-IX-Oxidase-Inhibiting Uracil Herbicides 91**  
*George Theodoridis*
- 8.1 Introduction 91  
8.2 History 91  
8.3 Synthesis 92  
8.4 Mode of Action 94  
8.5 Biological Activity 94  
8.6 Structure–Activity Relationship 97  
References 100
- Part II Fungicides 103**
- 9 Benzimidazole Fungicides 105**  
*Laura Quaranta*
- 9.1 Introduction 105  
9.2 History 105  
9.3 Synthesis 108  
9.4 Mode of Action 110  
9.5 Biological Activity 112  
9.6 Structure–Activity Relationship 114  
References 116
- 10 Morpholine Fungicides for the Treatment of Powdery Mildew 119**  
*Clemens Lamberth*
- 10.1 Introduction 119  
10.2 History 119  
10.3 Synthesis 120  
10.4 Mode of Action 122  
10.5 Biological Activity 123  
10.6 Structure–Activity Relationship 124  
References 126
- 11 Sterol Biosynthesis Inhibiting Triazole Fungicides 129**  
*Paul Worthington*
- 11.1 Introduction 129

- 11.2 History 129
- 11.3 Synthesis 134
- 11.4 Mode of Action 138
- 11.5 Biological Activity 140
- 11.6 Structure–Activity Relationship 141
- References 143
  
- 12 Methionine Biosynthesis-Inhibiting Anilinopyrimidine Fungicides 147**  
*Clemens Lamberth*
- 12.1 Introduction 147
- 12.2 History 147
- 12.3 Synthesis 148
- 12.4 Mode of Action 150
- 12.5 Biological Activity 151
- 12.6 Structure–Activity Relationship 151
- References 153
  
- 13 Phenylpyrrole Fungicides 155**  
*Clemens Lamberth*
- 13.1 Introduction 155
- 13.2 History 155
- 13.3 Synthesis 156
- 13.4 Mode of Action 158
- 13.5 Biological Activity 158
- 13.6 Structure–Activity Relationship 160
- References 161
  
- 14 Broad-Spectrum Fungicidally Active Pyrimidinyldioxy Strobilurins Inhibiting the Respiratory Chain 163**  
*Clemens Lamberth*
- 14.1 Introduction 163
- 14.2 History 163
- 14.3 Synthesis 165
- 14.4 Mode of Action 165
- 14.5 Biological Activity 168
- 14.6 Structure–Activity Relationship 169
- References 173
  
- 15 Pyrazole Carboxamide Fungicides Inhibiting Succinate Dehydrogenase 175**  
*Harald Walter*
- 15.1 Introduction 175
- 15.2 History 175
- 15.3 Synthesis 177
- 15.4 Mode of Action 183

- 15.5 Biological Activity 185
- 15.5.1 The Foliar Pyrazole Carboxamides 185
- 15.5.2 The Seed Treatment Pyrazole Carboxamides 186
- 15.6 Structure–Activity Relationships 187
- Acknowledgements 191
- References 191

### **Part III Insecticides 195**

#### **16 Avermectin Insecticides and Acaricides 197**

*Thomas Pitterna*

- 16.1 Introduction 197
- 16.2 History 197
- 16.3 Synthesis 199
- 16.4 Mode of Action 201
- 16.5 Biological Activity 202
- 16.6 Structure–Activity Relationship 204
- References 206

#### **17 Pyridine and Thiazole-Containing Insecticides as Potent Agonists on Insect Nicotinic Acetylcholine Receptors 209**

*Peter Jeschke*

- 17.1 Introduction 209
- 17.2 History 209
- 17.3 Synthesis 211
- 17.4 Mode of Action 214
- 17.5 Biological Activity 215
- 17.6 Structure–Activity Relationship 217
- References 221

#### **18 Pyrazole and Pyrimidine Acaricides and Insecticides Acting as Inhibitors of Mitochondrial Electron Transport at Complex I 225**

*Ottmar Franz Hüter*

- 18.1 Introduction 225
- 18.2 History 225
- 18.3 Synthesis 227
- 18.4 Mode of Action 229
- 18.5 Biological Activity 230
- 18.6 Structure–Activity Relationship 230
- References 236

#### **19 Phenylpyrazole-Containing Fiprole Insecticides 239**

*Stefan Schnatterer*

- 19.1 Introduction 239
- 19.2 History 239
