Preface XI		
List of Contri	XIII	
Introduction	1	

1	The Significance of Heterocycles for Pharmaceuticals and Agrochemicals 3
	Clemens Lamberth and Jürgen Dinges
1.1	Introduction 3
1.2	Heterocycles as Framework of Biologically Active Compounds
1.3	Fine-Tuning the Physicochemical Properties with Heterocycles
1.4	Heterocycles as Prodrugs 6
1.5	Heterocycles as Peptidomimetics 7

1.7 Heterocycles as Isosteric Replacement of Alicyclic Rings Heterocycles as Isosteric Replacement of other Heterocyclic Rings 13 1.8 References 16

Heterocycles as Isosteric Replacement of Functional Groups 8

- Part I Neurological Disorders 21
- 2 Tropane-Based Alkaloids as Muscarinic Antagonists for the Treatment of Asthma, Obstructive Pulmonary Disease, and Motion Sickness 23 Michael L. Schulte and Craig W. Lindsley

- Introduction 23 2.1
- History 23 2.2

1.6

- Synthesis 25 2.3
- 2.4 Mode of Action 29
- 2.5 Structure-Activity Relationships 32 References 34

VI	Contents	
	3	Morphinone-Based Opioid Receptor Agonist Analgesics 37
		Stephanie M. Ng
	3.1	Introduction 37
	3.2	History 37
	3.3	Synthesis 40
	3.4	Mode of Action 43
	3.5	Structure–Activity Relationship 44
		References 48
	4	Barbituric Acid-Based GABA(A) Receptor Modulators for the Treatment of Sleep Disorder and Epilepsy and as Anesthetics 51 Ingo Janser and Romy Janser
	4.1	Introduction 51
	4.2	History 52
	4.2.1	Barbiturates in the Treatment of Sleep Disorders 55
	4.2.2	Barbiturates in the Treatment of Epilepsy 55
	4.2.3	Barbiturates as Anesthetics 56
	4.3	Synthesis 57
	4.4	Mode of Action 60
	4.5	Structure–Activity Relationship 62
	4.5.1	5,5-Disubstitution 62
	4.5.2	Substitution at the Nitrogens 63
		References 63
	5	Phenothiazine-Based Dopamine D ₂ Antagonists for the Treatment
		of Schizophrenia 65
		Cristiana A. Zaharia
	5.1	Introduction 65
	5.2	History 65
	5.3	Synthesis 70
	5.4	Mode of Action 72
	5.5	Structure–Activity Relationships 76
		References 77
	6	Arylpiperazine-Based 5-HT _{1A} Receptor Partial Agonists and 5-HT _{2A} Antagonists for the Treatment of Autism, Depression, Anxiety, Psychosis and Schizophrenia 81
		Irini Akritopoulou-Zanze
	6.1	Introduction 81
	6.2	History 81
	6.3	Synthesis 85
	6.4	Mode of Action 88
	6.5	Structure–Activity Relationship 89
		References 96

7	Arylpiperidine-Based Dopamine D ₂ Antagonists/5-HT _{2A} Antagonists for the Treatment of Autism, Depression, Schizophrenia, and Bipolar Disorder 99 Ying Wang
7.1	Introduction 99
7.2	History 99
7.3	Synthesis 106
7.4	Mode of Action 109
7.5	Structure–Activity Relationship 111
,	References 113
8	Dibenzazepine-Based Sodium Channel Blockers for the Treatment of Neuropathic Pain 115
	Derek W. Nelson
8.1	Introduction 115
8.2	History 115
8.3	Synthesis 119
8.4	Mode of Action 124
8.5	Structure–Activity Relationships 128
	References 130
	Part II Cardiovascular Diseases 135
9	Dihydropyridine-Based Calcium Channel Blockers for the Treatment of Angina Pectoris and Hypertension 137 Milan Bruncko
9.1	Introduction 137
9.2	History 139
9.3	Synthesis 141
9.4	Mode of Action 144
9.5	Structure–Activity Relationship 148
	References 149
10	Tetrazole-Based Angiotensin II Type 1 (AT ₁) Antagonists for the Treatment of Heart Failure and Congestive Hypertension 153 Edward C. Lawson, Brian C. Shook, and James C. Lanter
10.1	Introduction 153
10.2	History 154
10.3	Synthesis 157
10.4	Mode of Action 159
10.5	Structure–Activity Relationship 161
	References 163
