<i>Contributing authors</i>	page ix	4.5 Exercises	42
<i>Forewords</i>	xi		
<i>Preface</i>	xiii	5 Model building	43
		5.1 Modelling approaches	43
1 Introduction	1	5.2 Model selection	46
1.1 Floods: natural processes and (un)natural disasters	1	5.3 Model implementation	48
1.2 Definitions	1	5.4 Conclusions and perspectives	50
1.3 Flood inundation modelling	4	5.5 Exercises	51
1.4 Climate and floods	4	6 Model evaluation	52
1.5 Problems addressed by this book	6	6.1 Concepts	52
		6.2 Performance measures	52
		6.3 Calibration and validation	55
		6.4 Uncertainty analysis	57
		6.5 Conclusions and perspectives	59
		6.6 Exercises	59
<b>Part I Theory</b>		7 Model outputs	61
2 Theoretical background: steady flow <i>with contributing author: Luigia Brandimarte</i>	11	7.1 Mapping model results	61
2.1 Uniform flow	11	7.2 Deterministic floodplain mapping	63
2.2 Subcritical and supercritical flows	11	7.3 Probabilistic floodplain mapping	63
2.3 Water surface profiles	15	7.4 Deterministic versus probabilistic	65
2.4 Backwater computation	18	7.5 Conclusions and perspectives	66
2.5 Exercises	19	7.6 Exercises	66
3 Theoretical background: unsteady flow <i>with contributing author: Ioana Popescu</i>	21		
3.1 Introduction	21	<b>Part III Applications</b>	
3.2 Navier–Stokes equations	21	8 Urban flood modelling	69
3.3 Saint-Venant equations	24	<i>with contributing authors: Jeffrey C. Neal, Paul D. Bates and Timothy J. Fewtrell</i>	
3.4 Kinematic wave model	26	8.1 Introduction	69
3.5 Diffusive model	27	8.2 Requirements for hydraulic modelling of urban floods	69
3.6 Fully dynamic model	28	8.3 Test case	71
3.7 Conclusions	30	8.4 Discussion and conclusions	76
3.8 Exercises	30		
<b>Part II Methods</b>		9 Changes in flood propagation caused by human activities	78
4 Data sources	33	9.1 Introduction	78
4.1 Ground data	33	9.2 Test site and problem statement	79
4.2 Remote sensing data	34	9.3 Methods	80
4.3 Uncertainty	38		
4.4 Conclusions and perspectives	42		

9.4	Results	82	11	Evaluation of floodplain management strategies	89
9.5	Conclusions	82	11.1	Introduction	89
9.6	Exercises	83	11.2	Test site and problem statement	89
10	Changes of stage–discharge rating curves	85	11.3	Methods	91
10.1	Introduction	85	11.4	Results	91
10.2	Test site and problem statement	85	11.5	Discussion	95
10.3	Methods	86	11.6	Conclusions	96
10.4	Results	87		<i>References</i>	97
10.5	Conclusions	88		<i>Index</i>	103
