Preface

xi

Section 1 – Preconception and conception

1	Assisted conception	1
2	Ovarian hyperstimulation syndrome	3
3	Anaesthesia before conception or confirmation of pregnancy	5

Section 2 – Pregnancy

I – Procedures in early/mid-pregnancy

4	Ectopic pregnancy	7
5	Evacuation of retained products of conception	9
6	Termination of pregnancy	11
7	Cervical suture (cerclage)	12
8	Incidental surgery in the pregnant patient	14
9	Intrauterine surgery	16

II – Normal pregnancy and delivery

10	Anatomy of the spine and peripheral nerves	19
11	Physiology of pregnancy	27
12	Antenatal care	31
13	Aortocaval compression	34
14	Gastric function and feeding in labour	35
15	Drugs and pregnancy	37
16	Placental transfer of drugs	40
17	Prescription and administration of drugs by midwives	42
18	Local anaesthetics	44
19	Normal labour	46
20	Intrapartum fetal monitoring	51
21	Pain of labour	54
22	Epidural analgesia for labour	56
23	Epidural test doses	61
24	Combined spinal–epidural analgesia and anaesthesia	64
25	Spinal analgesia	67
26	Spinal and epidural opioids	69
27	Inhalational analgesic drugs	72
28	Systemic analgesic drugs	74
29	Non-pharmacological analgesia	76

vi	Contents	
	III – Operative delivery and third stage	
30	Instrumental delivery	81
31	Caesarean section	83
32	Spinal anaesthesia for caesarean section	88
33	Epidural anaesthesia for caesarean section	91
34	General anaesthesia for caesarean section	95
35	Cricoid pressure	99
36	Failed and difficult intubation	101
37	Awake intubation	105
38	Removal of retained placenta and perineal suturing	106
39	Postoperative analgesia	108
	IV – Anaesthetic problems	
40	Bloody tap	113
41	Dural puncture	114
42	Postdural puncture headache	116
43	Epidural blood patch	119
44	Extensive regional blocks	121
45	Inadequate regional analgesia in labour	124
46	Backache	127
47	Horner's syndrome and cranial nerve palsy	128
48	Peripheral nerve lesions following regional anaesthesia	130
49	Spinal cord lesions following regional anaesthesia	133
50	Arachnoiditis	135
51	Cauda equina syndrome	137
52	Opioid-induced pruritus	138
53	Shivering	139
54	Aspiration of gastric contents	140
55	Awareness	144
56	Air embolism	147
	V – Problems confined to obstetrics	
57	Induction and augmentation of labour	149
58	Oxytocic and tocolytic drugs	151
59	Premature labour, delivery and rupture of membranes	154
60	Malpresentations and malpositions	156
61	External cephalic version	158
62	Multiple pregnancy	160
63	Trial of scar	161
64	Under-age pregnancy and advanced maternal age	163
65	Placenta praevia	165
66	Placental abruption	168
67	Prolapsed cord	170
68	Fetal distress	172

Table of Contents

[More information](#)

	Contents	vii
69	Shoulder dystocia	174
70	Intrauterine death	176
71	Uterine inversion	178
72	Major obstetric haemorrhage	179
73	Postpartum haemorrhage	182
74	Collapse on labour ward	185
75	Maternal cardiopulmonary resuscitation	186
76	Amniotic fluid embolism	189
77	Cholestasis of pregnancy (obstetric cholestasis)	190
78	Acute fatty liver of pregnancy	192
79	HELLP syndrome	194
80	Hypertension, pre-eclampsia and eclampsia	196
81	Magnesium sulphate	202
82	Hyperemesis gravidarum	205
83	Maternal mortality	207
VI – Problems not confined to obstetrics		
84	Allergic reactions	211
85	Cardiovascular disease	213
86	Arrhythmias	216
87	Pulmonary oedema	218
88	Cardiomyopathy	220
89	Coarctation of the aorta	223
90	Prosthetic heart valves	225
91	Congenital heart disease	227
92	Pulmonary hypertension and Eisenmenger's syndrome	230
93	Ischaemic heart disease	233
94	Endocrine disease	235
95	Diabetes mellitus	236
96	Anaemia and polycythaemia	240
97	Deep-vein thrombosis and pulmonary embolism	241
98	Thrombophilia	244
99	Coagulopathy	246
100	Von Willebrand's disease and haemophilia	248
101	Disseminated intravascular coagulation	251
102	Thrombocytopenia	253
103	Lymphoma and leukaemia	256
104	Haemoglobinopathies	258
105	Connective tissue disorders	261
106	Rheumatoid arthritis	264
107	Cervical spine disorders	266
108	Kyphoscoliosis	267
109	Low back pain	269
110	Neurological disease	272
111	Meningitis	274
112	Acute post-infective peripheral neuropathy (Guillain-Barré syndrome)	276

viii	Contents	
113	Past history of neurological trauma	277
114	Benign intracranial hypertension	279
115	Intracranial tumour	280
116	Cerebrovascular accident	282
117	Epilepsy	285
118	Convulsions	286
119	Migraine	288
120	Multiple sclerosis	289
121	Myasthenia gravis	291
122	Spina bifida	293
123	Respiratory disease	295
124	Asthma	296
125	Cystic fibrosis	298
126	Pulmonary fibrosis	299
127	Sarcoidosis	300
128	Acute lung injury (acute respiratory distress syndrome)	302
129	Pneumonia	303
130	Sepsis	307
131	Hepatitis	310
132	Herpes simplex infection	312
133	HIV infection	314
134	Malaria in pregnancy	316
135	Pyrexia during labour	318
136	Migrants/disadvantaged women	320
137	Psychiatric disease	322
138	Substance abuse	325
139	Obesity	328
140	Renal failure	331
141	Steroid therapy	333
142	Trauma in pregnancy	335
143	Malignant disease	336
144	Transplantation	338
145	Critical care in pregnancy	341
146	Invasive monitoring	343
VII – The neonate		
147	Neonatal assessment	347
148	Neonatal physiology and pharmacology	350
149	Neonatal resuscitation	352
150	Perinatal mortality	355
Section 3 – Puerperium and after		
151	Drugs and breastfeeding	359
152	Follow-up	361
153	Maternal satisfaction	363

Section 4 – Organisational aspects

154	Antenatal education	365
155	Audit	367
156	Labour ward organisation	369
157	Midwifery training	371
158	Consent	372
159	Medicolegal aspects	376
160	Record keeping	379
161	Minimum standards, guidelines and protocols	381
162	Risk management	384
163	Post-crisis management	386
164	Research on labour ward	388
165	Obstetric anaesthetic organisations	390
166	Vital statistics	392
167	Historical aspects of obstetric analgesia and anaesthesia	394

Index
