

Contents

<i>List of Contributors</i>	page vii
<i>Preface</i>	xvii
1 Energy metabolism and phylogenetic diversity of sulphate-reducing bacteria	1
<i>Rudolf K. Thauer, Erko Stackebrandt and W. Allan Hamilton</i>	
2 Molecular strategies for studies of natural populations of sulphate-reducing microorganisms	39
<i>David A. Stahl, Alexander Loy and Michael Wagner</i>	
3 Functional genomics of sulphate-reducing prokaryotes	117
<i>Ralf Rabus and Axel Strittmatter</i>	
4 Evaluation of stress response in sulphate-reducing bacteria through genome analysis	141
<i>J. D. Wall, H. C. Bill Yen and E. C. Drury</i>	
5 Response of sulphate-reducing bacteria to oxygen	167
<i>Henrik Sass and Heribert Cypionka</i>	
6 Biochemical, proteomic and genetic characterization of oxygen survival mechanisms in sulphate-reducing bacteria of the genus <i>Desulfovibrio</i>	185
<i>Alain Dolla, Donald M. Kurtz, Jr., Miguel Teixeira and Gerrit Voordouw</i>	
7 Biochemical, genetic and genomic characterization of anaerobic electron transport pathways in sulphate-reducing <i>Delta proteobacteria</i>	215
<i>Inês A. C. Pereira, Shelley A. Haveman and Gerrit Voordouw</i>	

8	Dissimilatory nitrate and nitrite ammonification by sulphate-reducing eubacteria	241
	<i>José J. G. Moura, Pablo Gonzalez, Isabel Moura and Guy Fauque</i>	
9	Anaerobic degradation of hydrocarbons with sulphate as electron acceptor	265
	<i>Friedrich Widdel, Florin Musat, Katrin Knittel and Alexander Galushko</i>	
10	Sulphate-reducing bacteria from oil field environments and deep-sea hydrothermal vents	305
	<i>Bernard Ollivier, Jean-Luc Cayol and Guy Fauque</i>	
11	The sub-seafloor biosphere and sulphate-reducing prokaryotes: their presence and significance	329
	<i>R. John Parkes and Henrik Sass</i>	
12	Ecophysiology of sulphate-reducing bacteria in environmental biofilms	359
	<i>Satoshi Okabe</i>	
13	Bioprocess engineering of sulphate reduction for environmental technology	383
	<i>Piet N. L. Lens, Marcus Vallero and Giovanni Esposito</i>	
14	Bioremediation of metals and metalloids by precipitation and cellular binding	405
	<i>Simon L. Hockin and Geoffrey M. Gadd</i>	
15	Enzymatic and genomic studies on the reduction of mercury and selected metallic oxyanions by sulphate-reducing bacteria	435
	<i>Mireille Bruschi, Larry L. Barton, Florence Goulhen and Richard M. Plunkett</i>	
16	Sulphate-reducing bacteria and their role in corrosion of ferrous materials	459
	<i>Iwona B. Beech and Jan A. Sunner</i>	
17	Anaerobic metabolism of nitroaromatic compounds and bioremediation of explosives by sulphate-reducing bacteria	483
	<i>Raj Boopathy</i>	
18	Sulphate-reducing bacteria and the human large intestine	503
	<i>George T. Macfarlane, John H. Cummings and Sandra Macfarlane</i>	
	<i>Index</i>	523

The colour plate section can be found between pages 238 and 239
