
CONTENTS

<i>Foreword</i> by Dr M. S. Swaminathan	<i>page</i> xiii
<i>Acknowledgements</i>	xv
<i>Preface to paperback edition</i>	xvii
1 The historical background	1
1.1 The period before Christ	2
1.2 The period after Christ	4
1.3 Elephants captured during the nineteenth and twentieth centuries	8
2 Status and distribution of the Asian elephant	10
2.1 Indian sub-continent	11
2.1.1 <i>Southern India</i>	11
2.1.2 <i>Central India</i>	15
2.1.3 <i>Northwestern India and Nepal</i>	16
2.1.4 <i>Northeastern India and Bhutan</i>	17
2.1.5 <i>Bangladesh</i>	18
2.2 Continental Southeast Asia	18
2.2.1 <i>China</i>	18
2.2.2 <i>Burma</i>	18
2.2.3 <i>Thailand</i>	20
2.2.4 <i>Laos, Kampuchea and Vietnam</i>	22
2.2.5 <i>Malaysia</i>	22
2.3 Island Asia	24
2.3.1 <i>Sri Lanka</i>	24
2.3.2 <i>Andaman islands (India)</i>	26
2.3.3 <i>Sumatra (Indonesia)</i>	26
2.3.4 <i>Borneo (Malaysia and Indonesia)</i>	28

viii	<i>Contents</i>	
2.4	Summary of population estimates	29
2.5	Conservation issues	32
2.5.1	<i>Exploitation of habitat</i>	32
2.5.2	<i>Shifting cultivation</i>	32
2.5.3	<i>Spread of agriculture</i>	33
2.5.4	<i>Hydro-electric and irrigation dams</i>	34
2.5.5	<i>Capture of elephants</i>	35
2.5.6	<i>Hunting of elephants</i>	35
2.5.7	<i>Crop raiding and manslaughter by elephants</i>	36
2.5.8	<i>Political unrest and war</i>	37
2.5.9	<i>Legal and administrative inadequacies</i>	37
3	The main study area and study methods	39
3.1	The study area	40
3.1.1	<i>Hydrology</i>	40
3.1.2	<i>Climate</i>	42
3.1.3	<i>Land-use pattern</i>	43
3.1.4	<i>Vegetation types</i>	44
3.1.5	<i>Mammals</i>	50
3.1.6	<i>The people</i>	53
3.2	Study methods	54
3.2.1	<i>Registration of elephants</i>	54
3.2.2	<i>Density estimates in different zones</i>	54
3.2.3	<i>Ageing techniques</i>	54
3.2.4	<i>Observations on feeding</i>	55
3.2.5	<i>Primary production of grass</i>	56
3.2.6	<i>Herbivore biomass and grass consumption</i>	56
3.2.7	<i>Damage to trees</i>	57
3.2.8	<i>Damage to crops</i>	57
3.2.9	<i>Chemical analysis</i>	58
3.2.10	<i>Collection of records</i>	58
4	Movement and habitat utilization	60
4.1	Elephant densities and seasonal distribution patterns	60
4.2	Movement pattern of different clans	62
4.3	Home range sizes and factors influencing them	63
4.4	Inter-annual differences in movement pattern	65
4.5	A long-term perspective on elephant movement patterns	65
4.6	Seasonal use of habitat types	66
4.7	Movement in relation to foraging and availability of water	67

<i>Contents</i>	ix
5 Feeding and nutrition	69
5.1 The plants and parts eaten	69
5.2 Proportions of browse and grass in the diet	71
5.3 Proportions of different browse plants in the diet	74
5.4 Quantity of forage consumed	78
5.5 Drinking	79
5.6 Nutrition and foraging	80
5.6.1 <i>Anatomy and physiology</i>	81
5.6.2 <i>Palatability and nutritive value of foods</i>	82
5.6.3 <i>Plant secondary compounds</i>	84
5.6.4 <i>Browse and grass in the optimal diet</i>	85
6 Impact on the vegetation and carrying capacity	86
6.1 Primary production of grasses	87
6.2 Biomass of mammalian herbivores and grass consumption	89
6.3 Impact on woody vegetation	91
6.4 Inter-specific competition, resource limitation and carrying capacity	97
6.5 Elephant–vegetation interaction and ecosystem dynamics	99
7 Crop raiding by elephants	108
7.1 The crops cultivated	108
7.2 The crops consumed and patterns of feeding	111
7.3 Frequency and seasonality of raiding	114
7.4 Group sizes of raiding elephants	116
7.4.1 <i>Mean monthly raiding sizes of bulls and herds in villages</i>	116
7.4.2 <i>Frequency of unit group sizes</i>	119
7.5 Quantity consumed from crop fields	120
7.5.1 <i>Rate of foraging in crop fields</i>	120
7.5.2 <i>Quantity and proportion of crops in the diet</i>	120
7.6 Quantity of crops damaged and the economic loss	123
7.7 Methods to deter elephants, and their behavioural responses	125
7.8 Crop raiding in rain forest habitats	126
7.9 Causes of crop raiding	130
7.9.1 <i>Raiding in relation to movement patterns</i>	131
7.9.2 <i>Competition for water</i>	131
7.9.3 <i>Reduction and fragmentation of natural habitat</i>	132
7.9.4 <i>Degradation of habitat</i>	133
7.9.5 <i>Palatability and nutritive value of crops</i>	133

8	Manslaughter by elephants	135
8.1	The people killed	135
8.2	The elephants responsible	136
8.3	Circumstances of encounter	137
8.4	Causes of aggression	140
9	Habitat manipulation by people	143
9.1	Reduction in habitat area and fragmentation	143
9.2	Shifting cultivation	144
9.3	Extraction of plant products	145
9.3.1	<i>Timber felling</i>	145
9.3.2	<i>Bamboo extraction</i>	147
9.3.3	<i>Grass extraction</i>	149
9.3.4	<i>Minor forest produce collection</i>	149
9.4	Grazing by domestic livestock	150
9.5	Fire	151
9.6	Forest plantations	154
9.7	Food availability in primary versus secondary rain forest	157
9.8	Carrying capacity of primary versus secondary vegetation	157
9.9	Creation of water reservoirs	159
9.9.1	<i>The Parambikulam – Aliyar Project in southern India</i>	160
9.9.2	<i>The Mahaweli Ganga Development Project in Sri Lanka</i>	160
10	Elephant slaughter by people	165
10.1	Elephant populations susceptible to poaching	165
10.2	Causes of death in elephants	166
10.3	Number, age frequency and mean tusk weight of poached elephants	168
10.4	The people responsible	169
10.5	Poaching and the ivory trade in India	171
11	Population dynamics	174
11.1	Age and sex structure	175
11.2	Fertility	177
11.2.1	<i>Age at first and last calving</i>	177
11.2.2	<i>Birth rate and the mean calving interval</i>	179
11.3	Mortality	182
11.3.1	<i>Numbers found dead in the field</i>	183
11.3.2	<i>Life-table from ages at death</i>	185

<i>Contents</i>	<i>xi</i>
11.3.3 <i>Instantaneous mortality rate from the standing age distribution</i>	186
11.4 <i>Population modelling</i>	188
11.4.1 <i>Trends in population growth</i>	189
11.4.2 <i>Trends in age distribution</i>	191
11.4.3 <i>Trends in the adult sex ratio</i>	193
11.4.4 <i>Possible effect of a disparate adult sex ratio on fertility</i>	195
11.4.5 <i>A test of the validity of the model: predicted and observed trends in the proportion of adult males</i>	197
11.5 <i>Demographic condition of the population</i>	197
12 Conservation and management	202
12.1 <i>Conservation of the elephant</i>	202
12.1.1 <i>Minimum viable population size</i>	202
12.1.2 <i>Minimum viable area and habitat integrity</i>	205
12.1.3 <i>Maintenance of habitat quality</i>	208
12.1.4 <i>Reduction of poaching</i>	210
12.1.5 <i>Captive breeding programmes</i>	210
12.2 <i>Protection of human interests</i>	211
12.2.1 <i>Elephant-proof barriers</i>	211
12.2.2 <i>Discouraging and chasing elephants</i>	214
12.2.3 <i>Culling, capture and translocation of elephants</i>	215
12.2.4 <i>Agricultural planning</i>	218
12.2.5 <i>Social security schemes</i>	218
<i>Appendices</i>	
I <i>Estimation of seasonal elephant densities by ground transects</i>	219
II <i>Growth relationships and field methods of ageing elephants</i>	224
III <i>Nutritive value of food plants</i>	227
IV <i>Population viability analysis</i>	230
<i>References</i>	234
<i>Index</i>	244
