

Contents

<i>List of contributors</i>	<i>page</i> vii
<i>Preface</i>	ix
Part I Observational facts relating to discrete sources	1
1 The state of cosmology	3
<i>G. Burbidge</i>	
2 The redshifts of galaxies and QSOs	17
<i>E. M. Burbidge and G. Burbidge</i>	
3 Accretion discs in quasars?	37
<i>J. Sulentic</i>	
Part II Observational facts relating to background radiation	47
4 CMB observations and consequences	49
<i>F. Bouchet</i>	
5 Abundances of light nuclei	69
<i>K. Olive</i>	
6 Evidence for an accelerating Universe or lack of?	76
<i>A. Blanchard</i>	
Part III Standard cosmology	85
7 Cosmology, an overview of the standard model	87
<i>F. Bernardeau</i>	
8 What are the building blocks of our Universe?	101
<i>K. C. Wali</i>	
Part IV Large-scale structure	109
9 Observations of large-scale structure	111
<i>V. de Lapparent</i>	
10 Reconstruction of large-scale peculiar velocity fields	123
<i>R. Mohayaee, B. Tully and U. Frisch</i>	

vi	<i>Contents</i>	
	Part V Alternative cosmologies	137
11	The quasi-steady-state cosmology <i>J. V. Narlikar</i>	139
12	Evidence for iron whiskers in the Universe <i>N. C. Wickramasinghe</i>	152
13	Alternatives to dark matter: MOND + Mach <i>D. Roscoe</i>	164
14	Anthropic principle in cosmology <i>B. Carter</i>	173
	Part VI Evidence for anomalous redshifts	181
15	Anomalous redshifts <i>H. C. Arp</i>	183
16	Redshifts of galaxies and QSOs: The problem of redshift periodicities <i>G. Burbidge</i>	197
17	Statistics of redshift periodicities <i>W. Napier</i>	207
18	Local abnormal redshifts <i>J.-C. Pecker</i>	217
19	Gravitational lensing and anomalous redshifts <i>J. Surdej, J.-F. Claeskens and D. Sluse</i>	223
	Part VII Panel discussion	235
20	Panel discussion <i>G. Burbidge, A. Blanchard, M. Disney, F. Bertola</i>	237
21	General discussion	248
22	Concluding remarks <i>J. V. Narlikar</i>	261
	<i>Index</i>	264
