

Recent Developments in Modeling and Applications in Statistics

Bearbeitet von
Paulo Eduardo Oliveira, Maria da Graça Temido, Carla Henriques, Maurizio Vichi

1. Auflage 2012. Buch. xxii, 270 S. Hardcover

ISBN 978 3 642 32418 5

Format (B x L): 15,5 x 23,5 cm

Gewicht: 602 g

[Weitere Fachgebiete > Mathematik > Stochastik > Mathematische Statistik](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Part I Sampling and Modeling

Using Latent Variables in Model Based Clustering: An E-Government Application	3
Isabella Morlini	
1 Introduction	3
2 Estimation of the Latent Variables Scores	4
3 An E-Government Application	7
References	11
Cross-Lagged Structural Equation Models vs Latent Growth Curve Models: A Study of Material Deprivation in Portugal with ICOR	13
Paula C.R. Vicente and Maria de Fátima Salgueiro	
1 Introduction	13
2 The Data	14
3 Methodology	15
3.1 Cross-Lagged Structural Equation Models	15
3.2 Latent Growth Curve Models.....	16
4 Results	18
5 Discussion	19
References	20
A Finite Mixture Approach to Uncover the Heterogeneity in the Relationship Between Visit Motivation and Activity Preferences	21
Catarina Marques, Elizabeth Reis, and João Menezes	
1 Introduction	21
2 The Influence of Visit Motivation on Activity Preferences	22
3 Model Specification	24
4 Methodology	24
5 Results	25
6 Conclusion.....	28
References	28

An Application of Structural Equation Modeling of Test Dispositional Optimism as Mediator or Moderator in Quality of Life in Patients with Chronic Disease	31
Estela Vilhena, José Luís Pais Ribeiro, Isabel Silva, Luísa Pedro, Rute Meneses, Helena Cardoso, António Martins da Silva, and Denisa Mendonça	
1 Introduction	32
2 Methods	32
2.1 Participants and Procedure	32
2.2 Measures	33
2.3 Statistical Analysis	33
2.4 Results	34
3 Conclusions	37
References	37
Longitudinal Modeling of Job Satisfaction Using Portuguese Data from the European Community Household Panel	39
Maria de Fátima Salgueiro and Patrícia Serra	
1 Introduction	39
2 The Data	40
3 Latent Growth Curve Models with Multiple Indicators	42
4 Results for the Proposed LGCM	44
5 Conclusion	46
References	46
Estimation of Underrepresented Strata in Preelection Polls: A Comparative Study	47
João Figueiredo and Pedro Campos	
1 Introduction	48
2 Methods for Dealing with Underrepresented Strata	48
2.1 Aggregation of Preelection Polls	49
2.2 Multilevel Regression	50
2.3 Empirical Best Linear Unbiased Predictor	52
3 Data and Methodology	53
4 Results	54
5 Conclusions	56
6 Future Work	56
References	57
Medication and Polymedication in Portugal	59
Alexandra Pinto, Teresa Rodrigues, Jorge Mendes, Fernando Bação, and Victor Lobo	
1 Introduction	60
2 Objectives	60

3	Material and Methods	61
3.1	NHS	61
3.2	Statistical Analysis	61
4	Results	62
4.1	Prescribed and Non-prescribed Drug Consumption	62
4.2	Medication and Polymedication	62
4.3	Drug Consumption Profile by Sex	63
4.4	Drug Consumption Profile by Age	63
4.5	Drug Consumption Profile by Age and Sex	63
4.6	Consumption and Polymedication Profile by Region	64
4.7	Kinds of Drugs Consumed.....	65
4.8	Kinds of Drugs Consumed per Region.....	67
5	Conclusions	67
	References	67

Part II Estimation

Improved Shape Parameter Estimation in a Discrete Weibull Model.....	71
P. Araújo Santos and M.I. Fraga Alves	
1 Introduction	71
2 Estimation Methods	72
3 Improved Shape Parameter Estimation	74
4 Simulations	74
5 Empirical Application	77
References	79

DPOT Methodology: An Application to Value-at-Risk	81
M.I. Fraga Alves and P. Araújo Santos	
1 Introduction	81
2 A Duration-Based POT Method	83
2.1 Empirical Motivation	83
2.2 DPOT Model	84
3 Comparative Study	85
4 Final Remarks	87
References	87

Estimation of the Extremal Index Function in Case of Asymptotically Independent Markov Chains and Its Application to Stock Market Indices	89
Alexandra Ramos and Anthony Ledford	
1 Introduction	89
2 Fitting a Markov Model to the Tails of the Stationary Time Series	90
3 Within-Clusters Behaviour at Extreme Levels	91
4 Application to Simulated Data from Gaussian Processes	93
5 Application to Financial Data.....	94
References	96

Generated Covariates in Nonparametric Estimation: A Short Review	97
Enno Mammen, Christoph Rothe, and Melanie Schienle	
1 Introduction	97
2 Examples	98
2.1 Simultaneous Nonparametric Equation Models Without Additivity	98
2.2 Simultaneous Nonparametric Equation Models with Additivity	100
2.3 Marginal Treatment Effects	101
2.4 Further Examples	102
3 Nonparametric Regression with Nonparametrically Generated Covariates	103
References	105
A Generator of Heavy-Tailed Search Trees	107
Alda Carvalho and Carlos Santos	
1 Introduction	107
2 The “Wallis Forest”	108
3 The General Model	111
4 Final Remarks	112
References	112
Part III Extremes	
Adaptive PORT-MVRB Estimation of the Extreme Value Index	117
M. Ivette Gomes and Lgia Henriques-Rodrigues	
1 Introduction	117
2 PORT EVI Estimation	118
3 MVRB EVI Estimation	119
3.1 A Few Comments on the Asymptotic Behaviour of MVRB EVI Estimators	121
4 Adaptive PORT-MVRB EVI Estimation	121
5 An Application to Burned Areas	123
5.1 MVRB EVI Estimation of Burned Areas	123
5.2 PORT-MVRB EVI Estimation for the Burned Areas	124
References	124
A Note on the Port Methodology in the Estimation of a Shape Second-Order Parameter	127
L. Henriques-Rodrigues and M. Ivette Gomes	
1 Introduction and Scope of This Chapter	127
2 Technical Results Related to the PORT Methodology	129
3 The New Class of PORT- ρ Estimators	133
References	136

A Class of Semi-parametric Probability Weighted Moment Estimators...	139
Frederico Caeiro and M. Ivette Gomes	
1 Introduction	139
2 Estimators Under Study	140
3 Asymptotic Properties	142
4 Finite Sample Behaviour: Small-Scale Simulation Study	145
References	147
Third Order Conditions and Max-semistability	149
Sandra Dias and Maria da Graça Temido	
1 Introduction	149
2 First and Second Order Conditions	150
3 Third Order Condition	151
References	156
Part IV Testing Statistical Hypothesis	
Generalized p Values and Random p Values When the Alternative to Uniformity Is a Mixture of a Beta(1,2) and Uniform	159
M.F. Brillhante	
1 Introduction	159
2 Generalized p Values with Alternative in the Class X_m	160
3 Random p Values and Fisher's Method with Alternative in the Class X_m	164
4 Conclusions	167
References	167
The Block-Matrix Sphericity Test: Exact and Near-Exact Distributions for the Test Statistic	169
Filipe J. Marques, Carlos A. Coelho, and Paula Marques	
1 Introduction	170
2 The Decomposition of the Test Null Hypothesis	170
3 The l.r.t. Statistic, λ^* , and the h -th Null Moment of λ^*	171
4 The c.f. of $W = -\log \lambda^*$	172
4.1 Factorizations of the c.f.'s of $W_1 = -\log \lambda_a^*$ and $W_2 = -\log \lambda_{b a}^*$	173
5 Near-Exact Distributions for W and λ^*	174
6 Numerical Studies	175
7 Conclusions	176
References	177
Extensions of Dorfman's Theory	179
Rui Santos, Dinis Pestana, and João Paulo Martins	
1 Introduction	179
2 Dorfman's Theory	180

3	The Inclusion of Errors in the Tests Results	181
3.1	Sensitivity and Specificity in Compound Tests	181
3.2	Sensitivity and Specificity in Dorfman's Methodology	182
4	The Number of Bacteria	184
4.1	Sensitivity and Specificity	185
5	Dealing with Subpopulations	187
6	Conclusion	188
	References	188

Part V Models with Stochastic Differential Equations

Prediction for Individual Growth in a Random Environment	193
---	------------

Patrícia A. Filipe, Carlos A. Braumann, Nuno M. Brites,
and Carlos J. Roquete

1	Introduction	193
2	Classic Regression vs Stochastic Differential Equations	194
3	Confidence Intervals for Prediction	198
3.1	Simulation	198
3.2	Delta Method	198
4	Conclusion	200
	References	201

A Note on (Dis)Investment Options and Perpetuities Under CIR Interest Rates	203
--	------------

Manuela Larguinho, José Carlos Dias, and Carlos A. Braumann

1	Introduction	203
2	Optimal Entry and Exit Decisions Under CIR Interest Rates	205
2.1	CIR General Claims	205
2.2	CIR Perpetuity	205
2.3	Complementary Functions	206
2.4	Boundary and First Order Conditions	208
3	Numerical Analysis	209
3.1	Perpetuities	209
3.2	Entry and Exit Problem	209
4	Conclusion	211
	References	211

Stochastic Runge–Kutta Schemes for Discretization of Hysteretic Models	213
---	------------

Pedro Vieira, Paula Milheiro de Oliveira, and Álvaro Cunha

1	Introduction	214
2	Discretization Schemes	215
3	Moments of the Response of Hysteretic Models	215
4	Numerical Results	217
5	Conclusions	221
	References	222

Part VI Stochastic Processes

Misleading Signals in Simultaneous Schemes for the Mean Vector and Covariance Matrix of a Bivariate Process	225
Patrícia Ferreira Ramos, Manuel Cabral Morais, António Pacheco, and Wolfgang Schmid	
1 Introduction	226
2 Simultaneous Schemes for Bivariate Processes	226
2.1 Output Process and Simultaneous Schemes	227
2.2 Probability of a Misleading Signal	230
2.3 Numerical Results	230
3 Concluding Remarks	233
References	234
On the Finite Dimensional Laws of Threshold GARCH Processes	237
Esmeralda Gonçalves, Joana Leite, and Nazaré Mendes-Lopes	
1 Introduction	237
2 Bounds for the Distribution Function of $(X_1^+, -X_1^-, \dots, X_n^+, -X_n^-)$	239
3 Bounds for the Distribution Function of $(X_1, \dots, X_n)$	242
4 Application to Control Charts	246
5 Conclusions	247
References	247
Modelling the Duration of Multihop Paths in Mobile Ad Hoc Networks	249
Gonçalo Jacinto, Nelson Antunes, and António Pacheco	
1 Introduction	250
2 Multihop Path Model	251
3 Mean Path Duration	254
4 Numerical Results	256
5 Conclusion	259
References	259
Risk Measures and Stochastic Orders Using Integrals of Distorted Quantile Functions	261
Miguel Mendes and Ignacio Cascos	
1 Introduction	261
2 Risk Measures	262
3 Stochastic Orders	266
References	269
