Author biographies	vii
1 Introduction	1
The history of COPD	1
What are the goals of therapy in COPD?	2
What is achievable in primary care?	4
Can COPD be managed successfully in primary care?	4
A more positive attitude to COPD	5
The palliative care approach	5
2 Epidemiology, risk factors and pathophysiology	7
Definitions	7
Epidemiology	9
Social costs	9
Risk factors	12
Pathology of COPD	15
Asthma and COPD	21
Physiology	22
Co-morbidities	24
Assessment	24
3 The clinical consultation	31
Introduction	31
The interview	32
Information giving	39
Prognosis	40
Summary	41

4	Management strategies	43
	Anti-smoking measures	43
	Bronchodilators	45
	Exacerbations and the use of antibiotics in COPD	47
	Vaccination of patients with COPD	48
	Oxygen	50
	Corticosteroids	51
	Combination inhalers	52
	Other drug therapies	52
	Non-invasive ventilation	53
	Pulmonary rehabilitation	53
	Nurse-led strategies	54
	Lung volume reduction	54
	Lung transplantation	55
5	Palliative care in COPD	57
	Symptom burden	58
	Advance Care Planning for COPD patients in the UK	59
	Discussing Advance Care Planning	61
	Symptom control	64
	Non-pharmacological interventions	70
	The future of palliative care in COPD	72
6	The future of COPD	75
	New bronchodilators	75
	More effective smoking cessation	76
	The problem of corticosteroid resistance in COPD	78
	New treatments for COPD	81
	Biomarkers of COPD	85
	Routes of drug delivery	86
	Non-pharmacological treatments	86
	Integrated care	87
	COPD in the developing world	87
	Conclusions	89
