

Calcium signalling

Approaches and Findings in the Heart and Blood

Bearbeitet von
Lars Kaestner

1. Auflage 2012. Taschenbuch. xii, 239 S. Paperback

ISBN 978 3 642 34616 3

Format (B x L): 16,8 x 24 cm

Gewicht: 433 g

[Weitere Fachgebiete > Medizin > Human-Medizin, Gesundheitswesen > Biomedizin, medizinische Forschung, evidenzbasierende Medizin](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Content

I Summary

1	Introduction	2
2	Direct evidence - the digital approach ..	3
3	Fluorescence-based visualisation	4
3.1	Calcium sensors	4
3.2	Spatio-temporal considerations	5
3.3	Confocal scanning techniques	6
3.4	Further optical sectioning techniques	8
3.5	Super-resolution imaging techniques	12
4	Aequorin-based measurements	14
5	Measurement of calcium transport across membranes	15
5.1	Flux measurements	15
5.2	The patch-clamp technique	15
6	Molecular biology based approaches ..	17
6.1	Determination of molecular identities	17
6.2	Antibody-based techniques	17
6.3	Genetic manipulation	17
7	Manipulation of calcium	19
7.1	Pharmacological manipulation	19
7.2	Optical manipulation	19
7.3	Combined approaches	19
8	Calcium-induced function	21
8.1	The concept of calcium-induced function	21
8.2	Cardiac contraction	21
8.3	Red blood cell aggregation	21
9	Calcium signalling in cardiac myocytes	24
10	Calcium signalling in red blood cells ...	26
11	Perspective	29
11.1	References	29

II Calcium Signalling Methodology

12	Non-linear and ultra high-speed imaging for explorations of the murine and human heart	36
12.1	Introduction	36
12.2	Methodology	37
12.3	Results	39
12.4	Discussion	42
12.5	Conclusion	43
12.6	References	43
13	A system for optical high resolution screening of electrical excitable cells	45
13.1	Introduction	45
13.2	Materials and methods	46
13.3	Results and discussion	48
13.4	Conclusion	57
13.5	References	57
14	Concepts for optical high content screens of excitable primary isolated cells	59
14.1	Introduction	59
14.2	Methodology	59
14.3	Results	61
14.4	Discussion	64
14.5	Conclusion	65
14.6	References	65
15	A primary culture system for sustained expression of a calcium sensor in preserved adult rat ventricular myocytes	67
15.1	Introduction	67
15.2	Methods	68
15.3	Results	71
15.4	Discussion	80
15.5	References	82

16	Calcium imaging of individual erythrocytes: Problems and approaches	83
16.1	Introduction	83
16.2	Material and methods	84
16.3	Results	84
16.4	Discussion	89
16.5	References	90

III Calcium Signalling in Cardiac Myocytes

17	Reduced Cardiac L-Type Ca^{2+} Current in $\text{Ca}_v\beta_2^{-/-}$ Embryos Impairs Cardiac Development and Contraction With Secondary Defects in Vascular Maturation	94
17.1	Introduction	94
17.2	Materials and Methods	95
17.3	Results	96
17.4	Discussion	103
17.5	References	105
18	Overexpression of junctin causes adaptive changes in cardiac myocyte Ca^{2+} signaling	107
18.1	Introduction	107
18.2	Methods	108
18.3	Results	109
18.4	Discussion	114
18.5	References	118
19	Remodelling of Ca^{2+} handling organelles in adult rat ventricular myocytes during longterm culture ..	121
19.1	Introduction	121
19.2	Material and methods	122
19.3	Results	123
19.4	Discussion	130
19.5	References	133

20	Functional and morphological preservation of adult ventricular myocytes in culture by sub-micromolar cytochalasin D supplement	135
20.1	Introduction	135
20.2	Material and methods	136
20.3	Results	137
20.4	Discussion	146
20.5	References	148

IV Calcium Signalling in Red Blood Cells

21	The non-selective voltage-activated cation channel in the human red blood cell membrane: reconciliation between two conflicting reports and further characterisation	152
21.1	Introduction	152
21.2	Experimental	153
21.3	Results	154
21.4	Discussion	158
21.5	Conclusion	159
21.6	References	160
21.7	Appendix: A Calculation of the channel open probability to explain the residual Ca^{2+} influx	160
22	Ion channels in the human red blood cell membrane: Their further investigation and physiological relevance	162
22.1	Introduction	162
22.2	Experimental	162
22.3	Results and discussion	163
22.4	References	165
23	Prostaglandin E_2 activates channel-mediated calcium entry in human erythrocytes: An indication for a blood clot formation supporting process	166
23.1	Introduction	166
23.2	Material and methods	166

23.3	Results and discussion	167	28.5	Research perspective	230
23.4	References	169	28.6	References	231
24	Functional NMDA receptors in rat erythrocytes	171		Subject Index	235
24.1	Introduction	171			
24.2	Materials and Methods	172			
24.3	Results	175			
24.4	Discussion	182			
24.5	References	185			
25	Stimulation of human red blood cells leads to Ca²⁺-mediated intercellular adhesion	187			
25.1	Introduction	187			
25.2	Materials and methods	188			
25.3	Results	191			
25.4	Discussion	195			
25.5	References	197			
26	Lysophosphatidic acid induced red blood cell aggregation in vitro	200			
26.1	Introduction	200			
26.2	Material and methods	201			
26.3	Results and discussion	202			
26.4	Conclusion	206			
26.5	References	208			
27	Regulation of phosphatidylserine exposure in red blood cells	210			
27.1	Introduction	210			
27.2	Materials and Methods	211			
27.3	Results	213			
27.4	Discussion	218			
27.5	Conclusion	220			
27.6	References	220			
28	Cation Channels in Erythrocytes - Historical and Future Perspective	223			
28.1	Introduction	223			
28.2	The discovery of cation channels in erythrocytes: from flux-measurements to electrophysiology	224			
28.3	Classification and properties of channels achieved by the patch-clamp technique	226			
28.4	Towards the molecular identity of the channels	229
