Contents

Preface

1. Foundation
   1.1 Managing Information as a Strategic Resource .................................. 1
   1.2 Key Concepts of Information Systems ............................................. 2
   1.3 Information Systems Competence for Managers ............................... 4
   1.4 Critical Issues of Information Systems Management ......................... 5
   1.5 Emerging Trends and Future Directions ......................................... 13
   1.6 Summary ................................................................................. 23
   Bibliography ............................................................................. 24

2. Information Systems for Competitive Advantages .................................. 27
   2.1 Competitive Strategies .............................................................. 27
   2.2 Value chain .............................................................................. 30
   2.3 Business Eco-systems and Co-operation (Competition & Cooperation) .. 31
   2.4 Innovation Strategy .................................................................... 32
   2.5 Summary ................................................................................. 38
   Bibliography ............................................................................. 39

3. Information Systems Planning and Evaluation ..................................... 41
   3.1 Strategic Alignment of Information Systems Plan with Business Strategy 41
   3.2 Measuring the Success of Information Systems Initiatives/Investments .. 45
   3.3 Financially Justifying Information Systems Investments .................... 46
4. Developing and Implementing Information Systems 53

4.1 Systems Analysis and Design 53
4.2 Project management, Change Management and Risk Management 58
4.3 Internal Development, Outsourcing, Acquisition and Use of Application Service Providers 62
4.4 Summary 65

Bibliography 65

5. Managing Organization’s Knowledge Resources 67

5.1 Data, Information and Knowledge 67
5.2 Database, Data Warehouse and Data Mining 68
5.3 The Phenomenon of Big Data 72
5.4 Knowledge Management and Knowledge Management Systems 76
5.5 Summary 80

Bibliography 81

6. Managing Infrastructure for Information Systems 85

6.1 Hardware and Software Management 85
6.2 Networks and Telecommunications Management 90
6.3 Wireless Communication 93
6.4 Management challenges 94
6.5 Summary 106

Bibliography 106

7. Using Information Systems for Enhancing Internal Operation 109

7.1 Functional and Cross-functional Information Systems 109
7.2 Enterprise Resource Planning Systems 111
7.3 Summary 118

Bibliography 118
8. Using Information Systems for Improving External Relations 121
   8.1 Customer Relationship Management Systems .................. 121
   8.2 Supply Chain Management Systems .............................. 131
   8.3 Summary .................................................... 136
   Bibliography .................................................... 136

   9.1 Enabling the Organization-Decision Making ..................... 139
   9.2 Information Systems for Decision Support ...................... 141
   9.3 Business Intelligence/Business Analytics ...................... 145
   9.4 Management Challenges ....................................... 147
   9.5 Summary .................................................... 148
   Bibliography .................................................... 148

10. Information Systems Operation Management 149
    10.1 Enterprise Information Systems Operation Management ....... 149
    10.2 Outsourcing ................................................ 158
    10.3 Global Information Systems Operation Management ........... 162
    10.4 Summary .................................................... 164
    Bibliography .................................................... 165
