

Contents

1 Advancement in Evolutionary Theories	1
1.1 History of Evolution	1
1.1.1 Punctuated Equilibrium	2
1.1.2 Who Coined the Punctuated Equilibrium Theory?	3
1.1.3 Proponents and Opponents of the Punctuated Equilibrium Model	4
1.1.4 Speculations: If PE Is True, Then What Caused Species to Remain Stable for Such a Long Period of Time Despite Environmental Changes?	5
1.2 Some Competing Ideas on How Evolution Works	6
1.3 Gap in the Fossil Record	7
1.4 Processes Behind Evolution	8
1.5 Tempo and Mode of Evolution	10
1.6 A Case Study on Brachiopods	13
References	14
 2 Evolutionary Change: A Case Study of Extinct Brachiopod Species	 17
2.1 Introduction	18
2.1.1 Hypotheses	20
2.2 Geological Background	20
2.3 Materials and Methods	21
2.4 Results	27
2.5 Discussion	31
2.5.1 Qualitative and Quantitative Recognition of Taxa	31
2.5.2 Punctuated Equilibrium Hypothesis	32
2.5.3 Phyletic Gradualism Hypothesis	34
2.5.4 Tempo and Mode of Evolution	34
2.5.5 Morphology and Environment	36
2.6 Conclusions	38
References	39

3 Comparative Trends in Evolution Across Correlated Geological Strata	43
3.1 Introduction	43
3.2 Geologic Setting	44
3.2.1 Biostratigraphy	45
3.2.2 Traverse Group Stratigraphy	47
3.3 Methods	49
3.4 Results and Discussion	50
3.4.1 Comparison of the Michigan Basin with the Appalachian Basin	51
3.5 Conclusions	53
References	53
4 Evolution in the Fossil Record	55
4.1 Significance of Timescale in Evolutionary Studies	55
4.2 Evolution in Extinct Species	55
References	56
About the Authors	57
