

# Progress in Polymers in Concrete

Selected, peer reviewed papers from the 14th International Congress on Polymers in Concrete (ICPIC 2013), April 17-20, 2013, Shanghai, China

von  
Ru Wang, Zhenghong Yang

1. Auflage

Progress in Polymers in Concrete – Wang / Yang

schnell und portofrei erhältlich bei [beck-shop.de](http://beck-shop.de) DIE FACHBUCHHANDLUNG

Thematische Gliederung:

Technologie der Kunststoffe und Polymere

Trans Tech Publications 2013

Verlag C.H. Beck im Internet:

# Table of Contents

## Preface, Sponsors and Committees

## Keynote Papers

<b>Sustainable Concrete; Is Nanotechnology the Future of Concrete Polymer Composites?</b> L. Czarnecki	3
<b>Synergies between Polymers and Cement Concrete Providing Opportunities for Sustainable Construction</b> D. Van Gemert	12
<b>Application of PC and PMC in Industry and Industrial Environment</b> D.W. Fowler	21
<b>Recent Trends in Research and Development Activities of Polymer-Modified Paste, Mortar and Concrete in Japan</b> Y. Ohama and O. Masahiro	26
<b>Remodeling of Deteriorated Irrigation Aqueducts Using Precast Polymer Concrete Flume</b> K.S. Yeon, M. Kawakami, Y.S. Choi, J.Y. Hwang, S.H. Min and J.H. Yeon	35
<b>Report from 13<sup>th</sup> ICPIC and 7<sup>th</sup> ASPIC: New Trends on Concrete-Polymer Composites</b> J.B. Aguiar, H. Özkul and S. Cunha	45
<b>Recent Research on Polymer-Modified Cement Mortar in China</b> R. Wang, X.X. Shi and P.M. Wang	57
<b>Driving Forces Concrete-Polymer Composites</b> L. Czarnecki, H. Özkul and R. Wang	68

## Chapter 1: Materials, Mix Proportion Design and Properties of Concrete-Polymer Composites

<b>Novel Core-Shell Hybrid Polymers Designed as Dual Functional Additives for Concrete</b> T. Pavlitschek, M. Gretz and J. Plank	77
<b>The Study of a New Synthesis Method of Isoamyl Enol Polyoxyethylene Ether and its Compatibility on Cement</b> L.G. Xiao, C.Y. Yan and S.T. Zhang	84
<b>The Preparation and Characterization of Redispersible Polymer Powder with Core-Shell Structure</b> J. Xu, Z.J. Feng, L.F. Fu and B.C. Zheng	88
<b>Novel Epoxy-Silica Hybrid Adhesives for Concrete and Structural Materials: Properties and Durability Issues</b> M. Frigione, F. Lionetto, L. Mascia and A. Antonacci	94
<b>Impact of Silane and Siloxane Based Hydrophobic Powder on Cement-Based Mortar</b> V. Spaeth, J.P. Lecomte, M.P. Delplancke, J. Orłowski and T. Büttner	100
<b>Preparation and Properties of a New Polymer-Modified Cement Mortar Containing Iron Tailings Sand</b> L.G. Xiao, G. Liu, S. Feng and S.T. Zhang	107
<b>Experimental Investigation on Mix Design and Mechanical Properties of Polymer (Latex) Modified Concrete</b> F. Nabavi, S. Nejadi and B. Samali	112
<b>Hard and Soft: Principles of Polymer-Impregnated Concrete Using Elastomers</b> O. Weichold and U. Antons	118
<b>Strength Development Characteristics and Economic Efficiency of Low Temperature Cured Acrylic Polymer Concrete: The Effect of Additive Type</b> K.S. Yeon, Y.S. Choi, M. Kawakami, I.B. Seung and J.H. Yeon	124
<b>Influence of Temperature on the Hydration Heat of Polymer Modified Mortars</b> S.F. Liu, S.J. Guo and P.M. Wang	130

<b>The Effects of Moisture and Temperature Variations on the Long Term Durability of Polymer Concrete</b>	
R. Barbosa, K.K. Hansen, B. Grelk and E. Wibholm	136
<b>Influence of Acidic Environments on Cement and Polymer-Cement Concretes Degradation</b>	
J.J. Sokołowska, P. Woyciechowski and G. Adamczewski	144
<b>Durability of Polyester Resin Concrete in Different Chemical Solutions</b>	
M. Jamshidi, M. Alizadeh, M. Salar and A. Hashemi	150
<b>Experimental Behaviour of Polyvinyl-Alcohol Modified Concrete</b>	
D.A.S. Sclofani and L. Contrafatto	155
<b>Damping Properties of EVA Modified Cement Pastes</b>	
Z.L. Zhang, P.M. Wang and J.G. Wu	161
<b>Properties of Polyacrylic Ester Latex Modified Cement Mortar</b>	
Z.P. Sun, D.M. Ye, L.F. Fu, B.C. Zheng, Z.J. Feng and M. Chen	166
<b>Bond Strength of Polymer Cement Slurry-Coated Rebar Using EVA Latex in Cement Concrete</b>	
Y.K. Jo, S.H. Jeong and W.K. Kim	175
<b>Effect of Cyclic Exposure of Chemicals on Compressive Strength of Polyester Resin Based Polymer Concrete</b>	
M. Jamshidi, M.J. Ghasemi and A. Hashemi	185
<b>Effect of Polymer Additive on Gas Permeability Coefficient of Concrete</b>	
B. Chmielewska	191
<b>Study on the Load-Deformation Behavior of Modified Cement Concrete</b>	
A. Flohr and A. Dimmig-Osburg	198
<b>Properties of Polymer Modified Concrete in Fresh and Hardened State</b>	
I. Ion, J. Barroso Aguiar, N. Angelescu and D. Stanciu	204
<b>Waterproof Performance of Polymer-Modified Cement Mortar</b>	
R. Wang, D.X. Ma and P.M. Wang	213
<b>Physical Properties of Polyester Polymer Concrete Composite Using RCSS Fine Aggregate</b>	
E.H. Hwang, J.M. Kim and S.G. Park	219
<b>The Engineering Properties of Unsaturated Polyester Polymer Concrete Used the Spherical Steel Slag Fine Aggregate</b>	
J.M. Kim, E.G. Kwak, C.H. Lee and S.K. Lee	229
<b>Strength of Porous Polymer Concrete and Growth Properties of Plant within Planting Polymer Block Using Unsaturated Polyester Resin</b>	
C.Y. Sung and Y.I. Kim	235
<b>Effects of Redispersible EVA and E/VL/VC Powders on Properties of Decorative Mortar</b>	
H.M. Zhu, P.M. Wang, G.F. Zhang and R. Wang	241
<b>Influence of White Cement Content on the Performance of Decorative Mortar in the Presence of Microemulsion</b>	
R. Wang, L. Wang, P.M. Wang and G. Xu	249
<b>Influence of Adding Encapsulated Phase Change Materials in Aerial Lime Based Mortars</b>	
S. Cunha, J.B. Aguiar, V. Ferreira and A. Tadeu	255
<b>Research on the Water Repellency of Inorganic Insulation Mortar</b>	
W. Guan, B.H. Ye, L.Q. Zhao and J.Q. Xuan	262
<b>Possibilities of Using Waste Diatomaceous Earth for Polymer-Modified Mortar</b>	
N. Žižková and R. Drochytka	266
<b>Research on the Fatigue Behavior of Cement Asphalt Mortar Exposed to Water</b>	
F.Z. Wang, J. Yang, S.G. Hu, Y.H. Zhang and Y.P. Liu	274
<b>Evaluation of Rut Resistance of Polymer-Modified Asphalt Concretes</b>	
S.G. Kim, S.J. Lee, S.J. Lee and K.W. Kim	282

## **Chapter 2: Polymer Modification Mechanism**

<b>Evolution in Modeling Cement Hydration and Polymer Hardening in Polymer-Cement Concrete</b>	
D. Van Gemert and A. Beeldens	291
<b>Measuring the Effectiveness of Hydrophobic Layers Using a Non-Destructive Method</b>	
U. Antons, O. Weichold and M. Raupach	298

<b>Polymers for Concrete Modification – Interactions and Application Properties</b> J. Pakusch, S.X. Wang and S. Iyer	303
<b>Fluid Transport Mechanisms in Portland Cement Mortar Modified with PVA and Nano Montmorillonite</b> T.M. Piqué, L. Fernandez Luco and A. Vázquez	311
<b>Film Formation of a Non-Ionic Ethylene-Vinyl Acetate Latex Dispersion in Cement Pore Solution</b> T. Pavlitschek, Y. Jin and J. Plank	316
<b>Effect of Ca<sup>2+</sup> Ions on the Film Formation of an Anionic Styrene/n-Butylacrylate Latexpolymer in Cement Pore Solution</b> T. Pavlitschek, M. Gretz and J. Plank	322
<b>Influence of SBR Latex on the Formation of C-S-H in C<sub>3</sub>S Paste</b> X.B. Yue and R. Wang	329
<b>Influences of Superplasticizer on the Interaction between Latex Particles and Cement Grains</b> D.D. Han, J.M. Li, W.D. Chen and S.Y. Zhong	335
<b>Some Aspects about Adsorption of Polymer on Cement Grain</b> S.Y. Zhong, D.D. Han and J.M. Li	341
<b>Dispersion and Absorption of SBR Latex in the System of Mono-Dispersed Cement Particles in Water</b> X.X. Shi, R. Wang and P.M. Wang	347
<b>Thermodynamics of the Polymer-Concrete Interface</b> H.Z. He, Y.L. Cui and M.L. Shi	354
<b>UIR-Scanner Potential to Defect Detection in Concrete</b> A. Garbacz, T. Piotrowski, K. Zalegowski and G. Adamczewski	359

### Chapter 3: Application of Concrete-Polymer Composites

<b>Innovations Based on PCC</b> A. Dimmig-Osburg	369
<b>Rehabilitation of Deteriorated Agricultural Waterways due to Polymer Cement Mortar</b> M. Kawakami, K.S. Yeon, Y. Seong Kim, J.Y. Hwang and F. Omata	378
<b>Development of Continuous-Type Mixer for Improvement of Workability and Quality of Polymer Cement Mortar</b> K.S. Bae, S.M. Choi and S.G. Oh	384
<b>Development of a New Polymercement Waterproofing Screed with Secondary Materials</b> L. Taranza and R. Drochytka	391
<b>Durability of Polymer Modified Repair Mortars on Concrete Structures</b> I.L. Tchetgnia Ngassam, S. Marceau and T. Chaussadent	397
<b>Strategies for Optimizing Mineral Corrosion Protection Mortars Used in a Sea-Water Environment</b> H. Weicken and L. Lohaus	403
<b>A Study of Effectiveness of Fiber Reinforced Polymer (FRP) System on the Performance of Concrete Beams and Columns</b> J.P. Lu and S. Wijaya	409
<b>Review on Application of Polymer Concrete in Singapore</b> J.P. Lu	416
<b>Jobs, Prosperity, and World Peace through Polymer Concrete</b> M. Gunasekaran	426
<b>Needed Research for Further Enhancing the Dielectric Properties of Polymer Concrete</b> M. Gunasekaran	430

### Chapter 4: Special Aspects of Polymers in Concrete

<b>Polycarboxylate-Lignosulfonate Copolymerized High Performance Water Reducing Agent: Preparation and Application</b> Z.P. Sun, L. Zhao, X.R. Huang, H. Yang and L.L. Shui	435
--	-----

---

<b>Fractionated and Recombined Casein Superplasticizer in Self-Leveling Underlayments</b> H. Bian and J. Plank	443
<b>The Adsorption of Superplasticizers on Cement Particles and its Relation with Dispersibility</b> Z.M. Wang, Y.L. Wang and M.Z. Lan	449
<b>Discussion on the Performance and the Reduction of Shrinkage Induced by Polycarboxylate Superplasticizer</b> Z.M. Wang, F. Lu, Z.C. Lu, H.Q. Li and X. Liu	456
<b>Determination of Molecular Weight and Distribution of Polycarboxylate Superplasticizer by Triple Detection GPC</b> Z.C. Lu, Z.M. Wang, F. Lu and H.Q. Li	461
<b>Influence of Polymer and Fiber on the Properties of Special Plaster Mortar for Aerated Concrete</b> L.G. Xiao, G. Liu, C.Y. Yan and X.X. Xu	466
<b>Flexure Behaviour the Concrete Beams Reinforcement with Polymer Materials</b> N. Kabashi, C. Krasniqi and A. Muriqi	472
<b>Flexural Toughness of Concrete with High Performance Polymers</b> C.S. Chin and R.Y. Xiao	480
<b>Effect of Cross Sectional Shape of Polypropylene Fibers on Flexural Toughness of Composites and Fiber-to-Cement Matrix Adhesion</b> Z. Behdoui, M. Jamshidi, M. Latifi and M. Halvaei	485
<b>Fracture Properties of Curauá Fibers Reinforced Polymer Mortars</b> J.M.L. Reis	490
<b>Performance of Low Modulus Fibers in Engineered Cementitious Composites (ECCs): Flexural Strength and Pull out Resistance</b> M. Halvaei, M. Jamshidi, M. Latifi and Z. Behdoui	495
<b>Influences of Processing and Testing Conditions on Flexural Behavior of Fiber-Reinforced Polymer-Modified Cement Mortar</b> W.D. Chen and S.Y. Zhong	502
<b>Effects of Calcium Contents in Class C Fly Ash Geopolymer</b> X.L. Guo, H.S. Shi, M.S. Lin and W.J. Dong	508
<b>Polymer Based Treatments Applied on Recycled Concrete Aggregates</b> V. Spaeth and A. Djerbi Tegguer	514
<b>Effect of Introducing Recycled Polymer Aggregate on the Properties of C-PC Composites</b> J.J. Sokołowska, T. Piotrowski, A. Garbacz and P. Kowalik	520
<b>Permeability and Porosity on Lightweight Mortars Fabricated with Polyamide Powder Wastes</b> J. Gadea, M.A. Salas, S. Gutiérrez-González, A. Rodríguez, M. Horgnies and V. Calderón	527
<b>Manufacture of Lime Mortars for Restoration with Addition of Polyamide Powder Waste</b> J. Garabito, A. Rodríguez, S. Gutierrez and V. Calderón	532
<b>Manufacture of Masonry Mortars with Melamine Powder Waste and Melamine Paper from the Manufacture of Agglomerated Particle Boards</b> A. Rodríguez, V. Calderón, S. Gutierrez, J. Gadea, J. Garabito and C. Junco	538
