List of Figures	xiii
List of Tables	xv
List of Abbreviations	xvii
1. Introduction	1
1.1. Problem Statement	1
1.2. Research Objectives	3
1.3. Overview of Research Methodology	4
1.4. Study Organization	5
2. Theoretical Foundation	9
2.1. Information as the Fundamental Entity in the Information Systems Discipline	9
2.1.1. Definition of the term <i>Information</i>	9
2.1.2. The Importance of Information for Today's Organizations	11
2.2. Human Computer-based Information Behavior	12
2.2.1. A Model of Computer-based Information Behavior	13
2.2.2. Phases in Information Acquisition	14
2.2.2.1. Information Need	14
2.2.2.2. Choice among Computer-based Information Chan- nels	17
2.2.2.3. Information Request	18
2.2.2.4. IS-enabled Information Delivery	19
2.2.2.5. Passive Information Exposure	20
2.2.2.6. Active Information Assimilation and Evaluation .	22
2.2.2.7. Summary	23
2.2.3. Research Boundaries	25

2.3. Information Seeking Stopping Behavior	26
2.3.1. Conceptualization of <i>Stopping</i> in Information Search . . .	26
2.3.2. Different Perspectives on Information Seeking Stopping Behavior	27
2.3.2.1. Cost-Benefit-driven Stopping Behavior	27
2.3.2.2. Cost-Benefit-independent Stopping Behavior . . .	30
2.3.2.3. Summary	35
2.3.3. Theoretical Lenses for Analyzing Information Seeking Stopping Behavior	36
2.3.3.1. Selection of Theoretical Lenses	36
2.3.3.2. Dual-Process Theories and Derivatives	40
2.3.3.3. Social Presence Theory	45
2.3.3.4. Effort-Accuracy Framework of Cognition	48
2.3.3.5. Summary	49
2.4. Development of the Research Model	51
2.4.1. Development of Hypotheses	52
2.4.1.1. Dependent Variable: Information Seeking Stopping Behavior	52
2.4.1.2. Impact of Technology Characteristics	54
2.4.1.3. Impact of Individual Characteristics	55
2.4.1.4. Impact of Task Characteristics	58
2.4.1.5. Moderating Variable	60
2.4.2. Development of Control Hypotheses	61
2.4.3. Summary of Hypotheses	66
2.5. Summary	66
3. Research Design	71
3.1. Epistemological and Ontological Grounding	71
3.2. Selection of a Research Methodology	74
3.3. Specification of the Research Methodology	76
3.3.1. Introduction to Heart Rate Variability	78
3.3.2. Introduction to Structural Equation Modeling	81
3.3.2.1. Model Estimation Approaches	83
3.3.2.2. Selection of an Appropriate Model Estimation Approach	85

3.4. Web-Based Laboratory Experiment Environment	86
3.4.1. Design of the Laboratory Experiment Environment	87
3.4.2. Task Design	87
3.4.3. Experimental Manipulations	89
3.5. Operationalization of Constructs	92
3.5.1. Independent Variables and Moderator Variables	92
3.5.2. Variables Referring to Information Processing	96
3.5.3. Variables Referring to Stopping Behavior	98
3.6. Data Collection	99
3.6.1. Sample Selection	99
3.6.2. Questionnaire Design and Pre-Test of Experiment	100
3.7. Summary	102
4. Pre-Test and Theory Refinement	103
4.1. Experimental Design	103
4.2. Data Analysis and Findings	105
4.2.1. Descriptive Statistics and Overall Evaluation of the Laboratory Experiment Environment	105
4.2.2. Evaluation and Adaptation of Experimental Tasks	107
4.3. Refinement of Research Model	109
4.4. Summary	112
5. Empirical Validation	115
5.1. Experimental Design and Experimental Procedure	115
5.2. Data Analysis and Findings	118
5.2.1. Descriptive and Basic Inferential Statistics	118
5.2.1.1. Demographics and Educational Background	118
5.2.1.2. Information Seeking and Stopping Behavior	119
5.2.1.3. Individual Characteristics	120
5.2.2. Model Estimation and Evaluation	122
5.2.2.1. Measurement Model Evaluation	125
5.2.2.2. Structural Model Evaluation	129
5.2.2.3. Analysis of Stopping Behavior	137
5.3. Summary	141

6. Discussion	143
6.1. Interpretation of Results	143
6.2. Theoretical Contributions	147
6.3. Managerial and Practical Implications	156
6.4. Limitations	160
6.5. Avenues for Future Research	162
7. Conclusion	167
Appendices	
A. Literature on Human Computer-based Information Behavior in the IS Community	171
B. Architecture of Laboratory Experiment Environment Software	175
C. Detailed Description of the Laboratory Experiment	179
C.1. Task Design	179
C.2. Experiment Protocol	187
D. Operationalization of Constructs (German)	189
Bibliography	197

List of Figures

1.1. Research Approach	6
2.1. Model of Human Computer-based Information Behavior	15
2.2. Cross References between Publications Reviewed Above	24
2.3. Overview of Construct Categories and Fundamental Causal Relationships	52
2.4. Explanatory Research Model of Information Seeking Stopping Behavior	69
3.1. Example of an FFT Spectral Analysis Created with Kubios HRV	80
3.2. Example of a Path Model	83
4.1. Experimental Design in Pre-test Phase	104
4.2. Subjects' Average Heart Rate during Baseline Measurement . . .	107
4.3. Refined Explanatory Model of Information Seeking Stopping Behavior	113
5.1. Experimental Design in Main Study	116
5.2. Nationality of Subjects	119
5.3. Education Background of Subjects	120
5.4. Duration of Experiments and Sub-Tasks	121
5.5. Number of Information Chunks Retrieved by versus Available to a Subject	121
5.6. Box plot of <i>Extraversion Scores</i> in Eight Experimental Conditions	123
5.7. Box plot of <i>Maximizer Tendency Scores</i> in Eight Experimental Conditions	123
5.8. Box plot of <i>Need for Cognition Scores</i> in Eight Experimental Conditions	124
5.9. Results of Partial Model	133

5.10. Main and Interaction Effects of Variables Manipulated in the Experiment	135
5.11. Model Results	142
6.1. Assumed Impact of the Number of Testimonials on Perceived Source Credibility	153
B.1. Database Model	177

List of Tables

2.1. Reviewed IS Top Journals and Number of Articles Selected	13
2.2. Cognitive Stopping Rules	33
2.3. Selected Theories Used in Extant Literature on Information Seeking and Stopping Behavior	37
2.4. Variety of Terms Attached to Dual-Processes	40
2.5. Definition of Model Constructs	64
2.6. Summary of Hypotheses	68
3.1. Heart Rate Variability Metrics Based on Frequency Domain Methods	80
3.2. List of Experimental Manipulations	90
3.3. Operationalization of the Construct <i>Perceived task complexity</i> . .	93
3.4. Operationalization of the Construct <i>Perceived task experience</i> . .	94
3.5. Operationalization of the Construct <i>Perceived task motivation</i> . .	95
3.6. Operationalization of the Constructs <i>System 1 information processing</i> and <i>System 2 information processing</i>	97
3.7. Operationalization of the Constructs <i>Propensity to use experiential / rational stopping rules</i>	99
4.1. Subject Age and Processing Times	106
4.2. Paired <i>t</i> -Test of High Frequency Component for Task 3 versus Task 6 and Task 4 versus Task 6 Including Test for Normal Distribution	108
4.3. Operationalization of the Construct <i>Perceived source credibility</i> . .	112
5.1. Overview of Experimental Conditions	117
5.2. Participation in the Experiment	118
5.3. Age of Subjects	119
5.4. Indicator Reliability	126
5.5. Construct Reliability and Convergent Validity	128

5.6. Discriminant Validity: Squared Correlations Between Model Constructs	130
5.7. Impacts on System 1 and System 2 Information Processing	132
5.8. Effect Sizes of Constructs Influencing Dependent Variables	133
5.9. Impacts on System 1 and System 2 Information Processing – Moderator and Control Variables	137
A.1. Research Addressing Information Behavior-related Aspects in the IS Domain	172
C.1. Protocol Used to Prepare the Experiment Sessions during the Pre-test Phase	187
D.1. Operationalization of the Construct <i>Perceived task complexity</i> (German)	189
D.2. Operationalization of the Construct <i>Perceived task experience</i> (German)	190
D.3. Operationalization of the Construct <i>Perceived task motivation</i> (German)	190
D.4. Operationalization of the Construct <i>Need for Cognition</i> (German)	191
D.5. Operationalization of the Construct <i>Extraversion</i> (German)	192
D.6. Operationalization of the Construct <i>Maximizer tendency</i> (German)	193
D.7. Operationalization of the Constructs <i>System 1 information processing</i> and <i>System 2 information processing</i> (German)	194
D.8. Operationalization of the Constructs <i>Propensity to use experiential / rational stopping rules</i> (German)	194
D.9. Operationalization of the Construct <i>Perceived source credibility</i> (German)	195
