A Structural Ricardian Valuation of Climate Change Impacts on Agriculture in Pakistan

Table of Contents

Preface.....	7
Acknowledgements.....	9
List of Figures and Tables.....	15
1 Introduction and Problem Statement.....	19
1.1 Objectives.....	23
1.2 Conceptual Approach.....	24
2 The Agriculture Sector of Pakistan.....	27
2.1 Geography and Soils.....	27
2.2 Climate and Water Resources of Pakistan.....	31
2.2.1 Climate.....	31
2.2.2 Water resources.....	36
2.3 Agro-Ecological Zones of Pakistan.....	40
2.4 Development of the Agricultural Sector in Pakistan.....	44
2.4.1 Land use pattern in Pakistan.....	44
2.4.2 Agricultural Production – Major Crops of Pakistan.....	47
2.4.3 History of Land reforms, Farm structures and tenurial systems.....	60
2.5 Domestic Agricultural Policy.....	66
2.6 Agriculture in the National Economy.....	74
2.6.1 Agriculture and the GDP.....	75
2.6.2 Employment.....	76
2.6.3 Trade.....	78
2.7 Investment and Agricultural Credit.....	81
2.8 Total Factor Productivity.....	85
3 The role of climate in agricultural production and local vulnerabilities.....	89
3.1 Agricultural Production under Climate Change and the response of crop growth....	89

3.2	Vulnerability to Climate Change in Pakistan	95
3.2.1	Temperature	96
3.2.2	Precipitation	99
3.2.3	Extreme Events	102
4	Modeling the Impacts of Climate Change on Agriculture	107
4.1	Crop Simulation Approach or Agronomic models.....	108
4.2	Economy-wide models: Computable General Equilibrium Models (CGE).....	110
4.3	Econometric Approach: The Standard Ricardian Model	111
5	Ricardian Studies- Literature Review	117
5.1	Conceptual understanding of the Ricardian Approach.....	123
5.2	Climate Change Adaptation in Agriculture	132
5.3	Adaptation and the importance of Local Traditional Knowledge (LTK).....	136
5.4	Black Box of Adaptation- The Structural Ricardian Method.....	139
6	Standard Ricardian Model - Modifications and Application to Pakistan.....	145
6.1	Study Area and Data	145
6.2	Econometric estimation	165
6.2.1	Structural multicollinearity, outliers, leverage and influence	166
6.2.2	Climate Sensitivity and Spatial Autocorrelation	170
6.3	Interpretation of the parameter estimates	179
6.3.1	Ricardian Climate Sensitivities	185
6.3.2	Control Variables	205
7	Structural Ricardian Model for the economic impact assessment of Climate Change ..	211
7.1	Dataset and Study Area	211
7.2	Empirical strategy.....	213
7.3	First stage crop choice model- Interpretation of results	219
7.4	Second stage income regressions- Interpretation of results.....	229
8	Climate Change Scenarios and Simulations using the Ricardian Approach.....	235

8.1	Specification of future Climate Change for Pakistan	235
8.2	Climate Change Simulations	244
8.2.1	Simulations using the Standard Ricardian Model	244
8.2.2	Simulations using the Structural Ricardian Model	251
9	Conclusions and Policy Implications	259
10	German Summary	267
	List of References.....	277
	Annex	315
