Sequential Competitive Location on Networks

Contents

List of Figures	xiii
List of Tables	xv
1 Introduction and Preliminaries	1
1.1 Basic Notation and Definitions	2
1.1.1 Graphs and Networks	2
1.1.2 Game Theory	5
1.1.3 Discrete Choice Theory	6
1.2 Foundations of Competitive and Voting Location	7
1.3 Vertex and Edge Demand	12
1.4 Outline of the Thesis	13
2 Sequential Competitive Location on Networks: Literature Review	15
2.1 Voting Location: Condorcet Points and Related Concepts . .	18
2.2 Voting Location: Some (1 1)-Centroid Problems	22
2.3 (r X _p)-Medianoid Problems	24
2.4 (r p)-Centroid Problems	32
2.5 Multiple Players, Endogenous Location and Some Selected $\mathbb{R}^1$ Models	36
2.6 On the Influence of Specific Modeling Assumptions	42
2.7 Conclusion	50
3 Competitive or Voting Location with Proportional Choice	51
3.1 Bottleneck Points	52

3.2	A Proportional Choice Rule	54
3.2.1	1-Suboptimal Points	56
3.2.2	Examples and Counterexamples	59
3.2.3	Determining 1-Suboptimal Points: Implementational Issues	62
3.3	Including Edge Demand	71
3.3.1	Basic Properties	74
3.3.2	1-Optimal Points on Chain Networks with Edge De- mand Only	75
3.4	Conclusion	77
4	(r p)-Centroid Problems on Networks with Vertex and Edge Demand	79
4.1	The Binary (r p)-Centroid Problem with Vertex and Edge De- mand	80
4.1.1	Bilevel Programming Models	80
4.1.2	Potential Solution Approaches	84
4.1.3	Some Complexity Results	87
4.1.4	Finite Dominating Sets	91
4.2	An Efficient Algorithm on Tree Networks	93
4.2.1	Chain Networks	94
4.2.2	General Tree Networks	103
4.3	Conclusion	117
5	Competitive Location and Pricing with Random Utilities	119
5.1	Problem Formulation	120
5.1.1	Pricing Stage: Nash Equilibria and Local Equilibria	124
5.1.2	Computational Complexity	128
5.2	Pricing Stage: Algorithmic Approaches	132
5.2.1	Fixed-Point Iteration	134
5.2.2	Newton's Method	136
5.2.3	A Combined Algorithm	139
5.2.4	Computational Analysis	143

5.3	Location Stage	148
5.4	Conclusion	153
6	Summary and Outlook	155
	Bibliography	159
A	Derivation of the Logit Choice Probabilities	177
