ISBN 978 3 8487 0822 2

Content:

Demographic change holds Germany firmly in its grip. The consequences of this development are diverse and increasingly have come into the focus of political debates and scientific research over recent years. This book deals with one aspect of demographic change which as of yet has received comparatively little attention. Its basic question is: What consequences does the ageing society have on political attitudes and political behavior of the German population? Using various sources of data and methods of analysis this question is investigated from multiple perspectives, each with a different thematic thrust. Projections of future developments are also provided.

The Authors:

Laura Konzelmann is Assistant Professor of Political Science at the University of Mannheim.
Michael Bergmann is Assistant Professor of Political Science at the University of Mannheim.
Hans Rattinger is Professor of Political Science at the University of Mannheim.

The series is edited by Hans Rattinger, Oscar W. Gabriel and Rüdiger Schmitt-Beck.
