# Table of Contents

<b>Preface, Committee and Prof. Balitskii 60<sup>th</sup> Anniversary of Birthday</b>	
<b>Electrochemical Hydrogen in Metals - Can we Effectively Control this Harm?</b> S.M. Beloglazov and G.S. Beloglazov	1
<b>Modelling Macroscopic Properties of Organic Species on the Basis of Quantum Chemical Analysis (on an Example of Inhibiting Efficiency of Ureides and Acetylides against Corrosion)</b> G.S. Beloglazov, A.A. Sikachina and S.M. Beloglazov	7
<b>A Critical Review of Existing Hydrogen Diffusion Models Accounting for Different Physical Variables</b> J. Toribio and V. Kharin	13
<b>Cavitation Erosion and Corrosion of Pearlitic Gray Cast Iron in Non-Standardized Cavitation Conditions</b> J. Chmiel, R. Jasionowski and D. Zasada	19
<b>Analysis of the Effect of the Wearing Type on Surface Structural Changes of Ni<sub>3</sub>Al-Based Intermetallic Alloy</b> D. Zasada, W. Polkowski and R. Jasionowski	25
<b>Hydrogen Diffusion in Metals Assisted by Stress: 2D Numerical Modelling and Analysis of Directionality</b> J. Toribio, V. Kharin, D. Vergara and M. Lorenzo	33
<b>Hydrogen Degradation of the Pressure Gas Tanks Materials after Long-Term Service</b> A. Balitskii, M. Semerak, W. Balitska, A. Subota and O. Wus	39
<b>Investigating Fatigue Strength of Vacuum Carburized 17CrNi6-6 Steel Using a Resonance High Frequency Method</b> P. Kula, K. Dybowski, S. Lipa, R. Pietrasik, R. Atraszkiewicz, L. Klimek, B. Januszewicz and E. Wołowiec	45
<b>Hydrogen Influence on Electrochemical Properties of Gallium Monoselenide</b> O. Balitskii, J. Elias, N. Kvashnivska, N. Polishchuk and S. Gryshchenko	53
<b>Role of Hydrogen in Cavitation Degradation of Iron in Water Solutions</b> J. Chmiel and E. Łunarska	59
<b>Effect of Nanostructuring of Structural Steels on its Wear Resistance and Hydrogen Embrittlement Resistance</b> H. Nykyforchyn, V. Kyryliv and O. Maksymiv	65
<b>Hydrogen Embrittlement of Biodegradable Magnesium</b> W. Dietzel	71
<b>Microstructure Evolution of Aluminum Deformed by Combination of KoBo Extrusion and Differential Speed Rolling (DSR)</b> A. Brzostowicz and W. Polkowski	77
<b>Description of the Experimental Method and Procedure of Model Wear Test of Refrigeration Compressors' Parts</b> K. Górny, P. Tyczewski and W. Zwierzycki	85
<b>An Analysis of the Tribocorrosion Wear by Means of Wear Maps</b> A. Stachowiak and W. Zwierzycki	93
<b>Tribological Wear in the Complex Service Conditions</b> P. Tyczewski	101
<b>Influence of Spatial Structures of 316L Stainless Steel on its Cavitation Erosion Resistance</b> B. Śniegocka, M. Szkodo and J. Chmiel	109
<b>Multi Parameter Sliding Test Result Evaluation for the Selection of Material Pair for Wear Resistant Components of a Hydraulic Motor Dedicated for Use with Environmentally Friendly Working Fluids</b> J. Łubiński and P. Sliwiński	115
<b>Evaluation of Wear Resistance of Ti Alloys Used for Elements Friction of Knee Endoprosthesis</b> B. Majkowska, M. Jądzewska, D. Miotke, E. Wołowiec and A. Zieliński	123

<b>Stresses in the Surface Layer and Hydrogen Absorption and Diffusion in Cavitation Condition</b>	
J. Chmiel, J. Baranowska, R. Jędrzejewski and A. Rzeczycki	131
<b>Effect of some Sulphur Additives on the Degradation of 9Cr-1Mo Steel after its 10 Years Service in the CCR Platforming Unit</b>	
J. Dampc and M. Szkodo	139
<b>Physico-Mechanical Wear Processes of Cell Guides in Container Ships - Phenomenology</b>	
M. Szyszko	145
<b>Effect of Surface Treatment of Titanium Elements on the Bond Strength to Zirconium Dioxide</b>	
B. Śmielak, M. Gołębiowski, L. Klimek and E. Wołowiec	151
<b>Complex XRD and XRF Characterization of TiN-TiCN-TiC Surface Coatings for Medical Applications</b>	
K. Banaszek, B. Januszewicz, E. Wołowiec and L. Klimek	159
