

Information-Spectrum Methods in Information Theory

Bearbeitet von
Te Sun Han, H. Koga

1. Auflage 2002. Buch. xviii, 538 S. Hardcover

ISBN 978 3 540 43581 5

Format (B x L): 15,5 x 23,5 cm

Gewicht: 2120 g

Weitere Fachgebiete > EDV, Informatik > Datenbanken, Informationssicherheit,
Geschäftssoftware > Informations- und Kodierungstheorie

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beek-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Table of Contents

1	Source Coding	1
1.1	Source Coding: Fixed-Length Codes	1
1.2	Source Coding: Variable-Length Codes	8
1.3	Coding for General Sources: Fixed-Length Codes	14
1.4	Fixed-Length Coding for Mixed Sources	20
1.5	Strong Converse Theorem for Source Coding	34
1.6	ε -Source Coding	38
1.7	Coding for General Sources: Variable-Length Codes	43
1.8	Coding for General Source: Weak Variable-Length Codes ...	51
1.9	Source Coding and Large Deviation: Decoding Error Probability	63
1.10	Source Coding and Large Deviation: Probability of Correct Decoding	85
1.11	Reliability Functions of the General Source with Variable-Length Coding	96
1.12	Information Spectrum and Invariancy	97
2	Random Number Generation	103
2.1	Random Number Generation.....	103
2.2	Resolvability and Intrinsic Randomness	118
2.3	Strong Converse Theorem for Random Number Generation ..	124
2.4	δ -Random Number Generation	128
2.5	Variable-Length Intrinsic Randomness	141
2.6	Random Number Generation and Source Coding	154
3	Channel Coding	169
3.1	Channel Coding: Stationary Memoryless Channel	169
3.2	Coding for General Channel	176
3.3	Coding for Mixed Channels	190
3.4	ε -Channel Coding	210
3.5	Strong Converse Theorem on Channel Coding	218
3.6	Channel Capacity with Cost Constraint	225
3.7	Strong Converse Property of Channel with Cost Constraint .	232
3.8	Joint Source-Channel Coding	247
3.9	Separation Theorems of the Traditional Type	263

4	Hypothesis Testing	269
4.1	Hypothesis Testing	269
4.2	ϵ -Hypothesis Testing	279
4.3	Strong Converse Theorem for Hypothesis Testing	283
4.4	Hypothesis Testing and Large Deviation Probability of Testing Error	286
4.5	Hypothesis Testing and Large Deviation: Probability of Correct Testing	308
4.6	Generalized Hypothesis Testing	319
4.7	Hypothesis Testing and Source Coding	320
5	Rate-Distortion Theory	325
5.1	Coding Subject to Distortion Criterion	325
5.2	Rate-Distortion Theory for Stationary Memoryless Sources ..	325
5.3	General Rate-Distortion Theory	333
5.4	Rate-Distortion Function $R_{fm}(D \mathbf{X})$	340
5.5	Rate-Distortion Function $R_{fa}(D \mathbf{X})$	343
5.6	Rate-Distortion Function $R_{vm}(D \mathbf{X})$	348
5.7	Rate-Distortion Function $R_{va}(D \mathbf{X})$	357
5.8	Rate-Distortion for Stationary Memoryless Sources Revisited	369
5.9	Rate-Distortion for Stationary Ergodic Sources	376
5.10	Rate-Distortion Function for Mixed Sources	380
6	Identification Code and Channel Resolvability	395
6.1	Identification Code and Channel Resolvability	395
6.2	Identification Coding	396
6.3	Channel Resolvability	404
6.4	Identification Capacity Theorem and Channel Resolvability Theorem	413
6.5	Identification Capacity with Cost Constraint	421
6.6	Channel Resolvability with Cost Constraint	422
6.7	Identification Capacity and Resolvability of Continuous Input Channels	425
6.8	Identification-Transmission Codes	435
7	Multi-Terminal Information Theory	453
7.1	What Is Multi-Terminal Information Theory?	453
7.2	The Slepian-Wolf Source Coding System	454
7.3	Slepian-Wolf Source Coding for Mixed Sources	464
7.4	ϵ -Source Coding for Slepian-Wolf Source Coding System ...	471
7.5	Strong Converse Theorem for Slepian-Wolf Source Coding System	477
7.6	Multiple-Access Channel Coding Systems	481
7.7	General Capacity Region Theorem for Multiple-Access Channels	483

7.8 Stationary Memoryless Multiple-Access Channels	487
7.9 Mixed Multiple-Access Channels	495
7.10 Proof of Theorem 7.7.1	500
7.11 ε -Coding for Multiple-Access Channel	509
7.12 Strong Converse Theorem for Multiple-Access Channels	513
7.13 Multiple-Access Channels with Cost Constraint	520
References	527
Index	533
