Preface   *xv*

**Part 1: The Modern setting   1**

1	Upwelling processes associated with Western Boundary Currents   3
	L. PIETRAFESA
	Abstract   3
	Introduction   3
	Upwelling theory   4
	The South Atlantic Bight   8
	Wind-induced upwelling in the presence of a boundary current   8
	Thermohaline-driven upwelling   10
	Topographic effects   12
	Bathymetric break influences   14
	The Charleston Bump   16
	Gulf Stream frontal features   18
	Conclusions   21
	Acknowledgments   24
	References   24
2	Diagenesis of phosphorus in sediments from non-upwelling areas   27
	R. A. BERNER
	Abstract   27
	Introduction   27
	Interstitial dissolved phosphate as a diagenetic indicator   27
	Theoretical modeling of phosphorus diagenesis   30
	P:C ratios in sediments   30
	Acknowledgments   31
	References   31
3	Organic matter in Modern marine phosphatic sediments from the Peruvian continental margin   33
	M. W. SANDSTROM
	Abstract   33
	Introduction   33
	Geological setting   34
	Methods   34
	Sample material   34
	Analytical procedures   34
	Results   35

Contents

viii

	Diagenesis and transformation of organic matter	35		The timing of dolomite and apatite formation: stable isotopic evidence	82
	Molecular composition of hydrocarbons	37		Conclusions	83
	Alkanes	37		Acknowledgments	84
	Acyclic isoprenoids	40		References	84
	Branched alkenes	40			
	Steroid hydrocarbons	41	7	Organic geochemistry of phosphorites: relative behaviors of phosphorus and nitrogen during the formation of humic compounds in phosphate-bearing sequences	87
	Triterpenoid hydrocarbons	41		J.G. TRICHET, M. RACHIDI AND H. BELAYOUNI	
	Discussion	42		Abstract	87
	Diagenesis of organic matter and phosphorite formation	42		Introduction	87
	Comparison with organic matter in phosphorites	42		Initial stages in the incorporation of humic acids in pellets	89
	Summary and conclusions	43		Phosphorus behavior during the early stages of incorporation	89
	Acknowledgments	43		Phosphorus in purified humic acids	89
	References	43		Amino acids and nitrogen in humic compounds	92
4	Pore water, petrologic and stable carbon isotopic data bearing on the origin of Modern Peru margin phosphorites and associated authigenic phases	46		Discussion and conclusions	94
	C.R. GLENN			References	96
	Abstract	46	8	Neogene to Holocene phosphorites of Australia	98
	Introduction	46		P.J. COOK AND G.W. O'BRIEN	
	Geologic setting	47		Abstract	98
	Petrology	47		Introduction	98
	Phosphatic grains	47		Neogene basins	98
	Nodules	48		Neogene phosphorites of Victoria	100
	Mineral paragenesis	49		Murray Basin	101
	Stable carbon isotopic results	50		Otway Basin	101
	Sources of phosphorus	51		Bass Basin (Torquay Embayment)	102
	Carbonate substitution in CFA	53		Gippsland Basin	104
	Conclusions	55		Offshore phosphorites and phosphatic sediments	105
	Acknowledgments	60		Northern New South Wales	105
	References	60		Non-ferruginous nodules	107
5	Phosphorite growth and sediment dynamics in the Modern Peru shelf upwelling system	62		Ferruginous nodules	109
	W.C. BURNETT			Tasmania	110
	Abstract	62		Northwestern Western Australia	111
	Introduction	62		South Tasman Rise	111
	Phosphorites and upwelling	62		Tasman Sea seamounts	111
	Nodules, pellets and other grains	63		Discussion	112
	The Peru shelf environment	63		Distribution	112
	Sediment texture and composition	63		Age	112
	Sediment accumulation and mixing	64		Lithology	112
	Phosphorite deposits on the Peru shelf	67		Depositional model	112
	Conclusions and future work	70		Origin of Neogene phosphorites	112
	Acknowledgments	70		Any major deposits?	113
	References	71		Acknowledgments	113
				References	113
	<b>Part 2: Modern and Neogene phosphorites and associated sediments</b>	73	9	Miocene phosphorites of Cuba	116
6	Occurrence of dolomite in Neogene phosphatic sediments	75		A.V. ILYIN AND G.I. RATNIKOVA	
	P.BAKER AND M. ALLEN			Abstract	116
	Abstract	75		Introduction	116
	Introduction	75		Pre-Miocene stratigraphy	116
	Geology of dolomite occurrences in the Pungo River Formation	76		Miocene stratigraphy	116
	Geology of dolomite occurrences in the Hawthorn Group	77		Miocene phosphorites	117
	Geology of dolomite occurrences in the Monterey Formation, California	78		Petrography	117
	The occurrence of dolomite in Quaternary organic-rich marine sediments	78		Geologic history	118
	The formation of phosphate in Quaternary marine sediments	79		References	121
			10	Phosphorite deposits in the Upper Oligocene, San Gregorio Formation at San Juan de la Costa, Baja California Sur, Mexico	122
				C. GALLI-OLIVIER, G. GARDUÑO AND J. GAMIÑO	

Contents

Abstract	122
Introduction	122
Geologic setting	122
Earlier investigations of phosphorites in Baja California Sur	123
San Gregorio Formation	123
Lower member	123
Upper member	123
Field characteristics and petrology of the lower member	123
Phosphorites	123
Phosphatic sandstones	125
Siliceous mudrocks	125
Origin of the San Juan de la Costa phosphorite	125
Conclusions	125
Acknowledgments	126
References	126
11 Phosphates in West and Central Africa – the problem of Neogene and Recent formations	127
G.M. SISTRAC, R. FLICOTEAUX, J.R. LAPPARTIENT AND J.P. PRIAN	
Abstract	127
The Neogene as related to phosphates in West Senegal	127
The Pire Goureye deposit: prospecting and type sequence	129
The phosphate occurrences of Casamance (S. Senegal) and the problem of the marine Neogene in Senegal	129
The Miocene between Senegal and Congo	135
Guinea Bissau	135
Ivory Coast	136
Togo–Benin	136
Nigeria	137
Cameroon and equatorial Guinea	137
Gabon	137
Neogene to Recent phosphates offshore of the People's Republic of Congo and of Gabon	137
Pre-Holocene sedimentation offshore of Congo and of Gabon	140
Angola	141
Conclusions	141
References	141
12 Phosphorite deposits on the Namibian continental shelf	143
J.M. BREMNER AND J. ROGERS	
Abstract	143
Introduction	143
General geology	143
Petrography	146
Geochemistry	146
Age	147
Sedimentation	148
Resources	150
Acknowledgments	151
References	151
13 Phosphorite deposits on the South African continental margin and coastal terrace	153
G. BIRCH	
Abstract	153
Introduction	153
Distribution	153
Mineralogy and geochemistry	155
Phosphorite ages	156
Phosphorite genesis	156
Estimated resources	156
Acknowledgments	157
References	157
14 Moroccan offshore phosphorite deposits	159
C.P. SUMMERHAYES AND J.M. MCARTHUR	
Abstract	159
Geology and stratigraphy	159
Morphology and classification	159
Age	159
Petrography	160
Glauconitic conglomerates	160
Pelletal conglomeratic phosphorite	161
Ferruginous dolomitic phosphatic limestone	161
Non-ferruginous phosphatic limestones	161
Mineralogy	163
Geochemistry	163
Sedimentary history	163
Glauconitic phosphatic conglomerates	163
Pelletal phosphorite conglomerates	163
Phosphatized foraminiferal limestones	165
Mechanism of phosphatization	165
Paleoenvironments	165
Resources	166
Acknowledgments	166
References	166
15 Neogene phosphorites of the Sea of Japan	167
I.I. BERSENEV, G.N. BATURIN, E.P. LELIKOV AND V.V. GUSEV	
Abstract	167
Introduction	167
General structure, geology and stratigraphy	167
Paleogeography of the Sea of Japan during the Miocene	168
Phosphorites	168
Lithology	168
Nature of phosphatic material	171
Chemical composition of phosphorites	171
Ultramicroscopic structures of phosphorites	171
Origin of Sea of Japan phosphorites	172
References	175
16 Physical and chemical properties of the phosphate deposit on Nauru, western equatorial Pacific Ocean	177
D.Z. PIPER, B. LOEBNER AND P. AHARON	
Abstract	177
Introduction	177
Analytical techniques	179
Physiography of Nauru	180
Carbonate rocks of Nauru	182
Phosphate on Nauru	185
Discussion	186
Conclusions	193
Acknowledgments	193
References	193
17 The submerged phosphate deposit of Mataiva Atoll, French Polynesia	195
A.M. ROSSFELDER	
Abstract	195
Introduction	195
Reconnaissance and evaluation fieldwork	195

31 Carolina continental margin: Part 3 – Patterns of phosphate deposition and lithofacies relationships within the Miocene Pungo River Formation, North Carolina continental margin 424  
S.R. RIGGS AND P.M. MALLETTE

Abstract 424  
Introduction 424  
Miocene lithostratigraphy 424  
Lithologic components of the Pungo River Formation 424  
    Siliclastic sediments 425  
    Biogenic sediments 425  
    Authigenic and early diagenetic sediments 426  
    Late diagenetic components 426  
Lithofacies of the Pungo River Formation 426  
    Siliclastic lithofacies 426  
    Biogenic lithofacies 427  
    Authigenic and early diagenetic lithofacies 428  
Regional distribution of lithofacies in Onslow Bay 428  
    Frying Pan Section 429  
    Onslow Bay Section 430  
    Bogue Banks Section 432  
Vertical lithofacies patterns 434  
    Uniform textural and mineralogical lithofacies (UTML) 434  
    Interbedded lithofacies (IBL) 435  
    Fining upward sequence lithofacies (FUSL) 436  
Sediment responses to multiple sea-level events 436  
    Cyclical depositional units 436  
    Late diagenetic overprinting 437

Miocene depositional patterns on the Carolina continental margin 439  
Environments of phosphogenesis 440  
Acknowledgments 442  
References 442

32 Carolina continental margin: Part 4 – Relationships between benthic foraminiferal assemblages and Neogene phosphatic sediments, North Carolina coastal plain and continental shelf 444  
SCOTT W. SNYDER

Abstract 444  
Introduction 444  
General depositional environments in the North Carolina Neogene 445  
Ecology of selected modern benthic foraminiferal species 445  
    Modern benthic foraminifera in oxygen minima 445  
    Modern benthic foraminifera in polluted environments 445  
Benthic foraminifera associated with ancient oxygen minima 446  
Implications of ecological data for Neogene assemblages 447  
Phosphatic sediment – benthic foraminiferal relationships 450  
    Aurora area 450  
    Onslow Bay 454  
Summary and conclusions 462  
Acknowledgments 463  
References 463
