

Table of Contents

Stress Distributions in an Annular Disk Possessing Stress Induced Material Anisotropy N.N. Alexandrova and P.M.M. Vila Real	1
Numerical Analysis of Triaxial Residual Stresses in Quenched 316H Stainless Steel A. Andrade Campos and F. Teixeira Dias	7
Texture Evolution during High Temperature Plane Strain Compression of High Silicon Steels P.R. Calvillo and Y. Houbaert	15
Fracture Toughness of Iron Boride Layers Obtained by Paste Boriding Process G. Ramírez, I. Campos-Silva and A.S. Balankin	21
Self-Affine Patterns of Boride Layers I. Campos-Silva, G. Ramírez, A.S. Balankin and R. Torres	27
Modeling and Simulation of Resin Filling and Cure Processes in Molds Partially Filled with Porous Media V.A.F. Costa	33
On the Thermal Conductivity of Adhesively Bonded and Sintered Hollow Sphere Structures (HSS) T. Fiedler and A. Öchsner	39
Influence of the Morphology of Joining on the Heat Transfer Properties of Periodic Metal Hollow Sphere Structures T. Fiedler and A. Öchsner	45
Calculation of the Effective Thermal Conductivity in Composites Using Finite Element and Monte Carlo Methods T. Fiedler, A. Öchsner, N. Muthubandara, I.V. Belova and G.E. Murch	51
A Thermodynamical Model for Analysis of Isothermal Phase Transformations under High Pressure V. Grigorova and D. Roussev	57
Comparison between the Thermodynamical Behaviour of PdTe₂ and PtTe₂, while Subjected Isothermally to High Pressure V. Grigorova, D. Roussev and S. Jobic	63
Fracture Toughness and Crack Deflection in Porous Multilayered Ceramics: Application to NiO-YSZ N. Joulaee, A. Makradi, S. Ahzi and M.A. Khaleel	69
Finite Element Analysis of Temperature and Density Distributions in Selective Laser Sintering Process L. Dong, A. Makradi, S. Ahzi and Y. Remond	75
Comparison between Self-Consistent and Intermediate Approaches for the Simulation of Large Deformation Polycrystal Viscoplasticity S. M'Guil, S. Ahzi, H. Youssef, J. Gracio and M.A. Khaleel	81
Evaluation of Transmission Conditions for a Thin Heat-Resistant Inhomogeneous Interphase in Dissimilar Material G. Mishuris, W. Miszuris and A. Öchsner	87
Finite Element Verification of Transmission Conditions for 2D Heat Conduction Problems G. Mishuris, W. Miszuris and A. Öchsner	93
Flux Evaluation in Anisotropic Heat Conduction Using the Modified Local Green's Function Method (MLGFM): Comparative Studies P.A. Muñoz-Rojas and M. Vaz	100
Modeling the Longitudinal Temperature Evolution of a Chirped Fiber Bragg Grating Submitted to Temperature Gradients B. Neto and P.S. André	106
The Effective Conductivity of 2D Porous Materials with Temperature Dependent Material Properties E. Pesetskaya, A. Öchsner and S. Rogosin	112
Two Different Approaches for the Effective Conductivity Investigation of 2D Porous Materials with Temperature Dependent Material Properties E. Pesetskaya, T. Fiedler and A. Öchsner	118

Design of an Induction Glass Melting Furnace by Means of Mathematical Modelling Using the Finite Element Method	
I. Arellano, G. Plascencia, E. Carrillo, M.A. Barrón, A. Sánchez and J. Gutiérrez	124
Estimation of the Heat Flux Through Furnace Side Walls Protected with Water Cooled Cooling Devices	
G. Plascencia, T.A. Utigard, J. Gutiérrez, D. Jaramillo, V. Mayagoitia and M.L. Hernández-Pichardo	130
Heat Conduction of 2D Composite Materials with Symmetric Inclusions: a Model and Reduction to a Vector-Matrix Problem	
M. Dubatovskaya and S. Rogosin	136
Hele-Shaw Model for Melting/Freezing with Two Dendrits	
S. Rogosin and T. Vaitekhovich	143
Intermediates in Ring-Disc Electrode Processes	
C.A.C. Sequeira	152
Vibration Analysis of a Ni-Ti Shape Memory Alloy Rod	
M. Ghazinejad and A. Shokuhfar	164
SPH as an Inverse Numerical Tool for the Prediction of Diffusive Properties in Porous Media	
A.C.M. Sousa and F. Jiang	171
Evaluation of Thermal and Mechanical Filler Gas Influence on Honeycomb Structures Behavior	
M. Vesenjak, A. Öchsner and Z. Ren	190
Thermal Post-Impact Behavior of Closed-Cell Cellular Structures with Fillers – Part I	
M. Vesenjak, A. Öchsner and Z. Ren	196
Thermal Post-Impact Behavior of Closed-Cell Cellular Structures with Fillers – Part II	
M. Vesenjak, Z. Žunič, A. Öchsner and Z. Ren	202
Special Session on Phase change: Multiscales and strong coupling	208
Amplification of the Thermocapillary Convection during Evapo-Condensation Cycle in Heat Pipes	
R. Bennacer and M. El Ganaoui	209
Investigation of Evaporation and Diffusion Phenomena in Porous Media	
R. Bennacer and K. Sefiane	215
A Model for Rapid Solidification for Plasma Spraying	
S. Ben Naoua, M. El Ganaoui, H. Sammouda and P. Fauchais	223
Special Session on Nanostructures and Materials	231
Design of Moving Components of an Ultra Precision Machine Tool for Nanometric Machining	
M. Vahdati and A. Shokuhfar	232
A New Inorganic Membrane: TiO₂ Ultrafilter Based on Functionally Graded Porous Alumina	
C. Falamaki and J. Veysizadeh	239
An Experimental Study on Synthesis and Characterization of Silica Nanoparticles Prepared by Sol-Gel Method	
A. Shokuhfar, T. Shokuhfar, M. Ghazinejad, R. Babazade and S. Tabatabae	245
Production of Zinc Oxide Nanoparticles by Liquid Phase Processing: an Investigation on Optical Properties	
M. Vafaei and H. Youzbashizade	252
Characterization of Al/SiC Nanocomposite Prepared by Mechanical Alloying Method	
A. Shokuhfar, M.R. Dashtbayazi, M.R. Alinejad and T. Shokuhfar	257
Effect of Micron and Nano Size Oxide Material Additives on Reaction Sintering, Micro Structural and Physical Properties of Al₂TiO₅ Based Ceramics	
G. Naderi, A. Shokuhfar, H.R. Rezaie, R. Naghizadeh and T. Shokuhfar	266
