

Genetic Control of Neuronal Migrations in Human Cortical Development

Bearbeitet von
Gundela Meyer

1. Auflage 2006. Taschenbuch. xii, 114 S. Paperback

ISBN 978 3 540 36688 1

Format (B x L): 15,5 x 23,5 cm

Gewicht: 207 g

[Weitere Fachgebiete > Chemie, Biowissenschaften, Agrarwissenschaften > Entwicklungsbiologie > Molekularbiologie](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

List of Contents

1	Introduction	1
2	Materials and Methods	3
3	The Anatomical Basis of Human Cortical Development	3
3.1	The Embryonic Period: Formation of the Cortical Anlage and Early Regionalization	3
3.2	The Early Foetal Period (8–20 GW): Time Course of Cell Proliferation and Migration	7
3.3	Establishment of Cortical Lamination	7
3.4	Development of Axonal Pathways	8
3.5	Neuronal Differentiation	10
3.6	Cortical Gyration	11
4	Neuronal Migration	12
4.1	Radial Migration	12
4.2	Tangential Migration	14
4.3	Kinetics of Neuronal Migration	16
5	Compartments of the Cortical Wall	16
5.1	Compartments at the Preplate Stage	18
5.1.1	The Neuroepithelium of the Ventricular Zone	18
5.1.2	The Preplate	19
5.2	The Transition from Human Preplate to Cortical Plate	20
5.3	Compartments of the Cortical Wall After the Appearance of the Cortical Plate	27
5.3.1	Ventricular/Subventricular Zone	27
5.3.2	The Intermediate Zone	28
5.3.3	The Subplate	29
5.3.3.1	A Timetable of Human Subplate Development	31
5.3.3.2	Is the Subplate a Derivative of the Preplate?	32
5.3.3.3	The Subplate as the Source of Neurons in the Adult White Matter	34
5.3.4	The Cortical Plate	36
5.3.5	The Marginal Zone	38
5.3.6	The Subpial Granular Layer	38
5.3.6.1	The SGL as a Migratory Compartment	40
6	The Cortical Hem: Signaling Center and Birthplace of CR Cells	43

7	The Reelin–Dab1 Signaling Pathway	44
7.1	Reelin Gene and Protein	46
7.2	The Effects of Reelin Deficiency in Mice and Humans	47
7.3	Distribution of Reelin in the Developing Cortex	50
7.3.1	Cajal–Retzius Cells	50
7.3.1.1	What Is a CR Cell?	51
7.3.1.2	How Necessary Are Cajal–Retzius Cells?	52
7.3.1.3	The Developmental History of CR Cells in the Human Cortex	53
7.3.1.4	A Timetable of the Origins of Human CR Cells	57
7.3.1.5	A Comparison of Rodent and Human CR Cells	58
7.3.2	Reelin in the Cortical Plate	58
7.4	Reelin in Postnatal and Adult Human Cortex	59
7.5	Reelin Function in Plasticity and Learning	60
7.6	Evolutionary Aspects of Reelin	61
7.7	Reelin Receptors	62
7.7.1	Integrins—Putative Co-receptors?	64
7.8	Dab1	65
7.8.1	Dab1 Gene and Protein	65
7.8.2	Dab1 in Human Cortical Development	66
7.9	Tyrosine Kinases in Cortical Development	68
8	The Cdk5/p35 Pathway	69
9	LIS1 and DCX: Key Genes for Neuronal Migration and Cortical Folding	70
9.1	Human Lissencephaly Syndromes	70
9.2	Type 1 Lissencephaly	71
9.3	LIS1	72
9.4	DCX	74
9.4.1	DCX in Mice	75
9.4.2	DCX and LIS1 Expression in Human Cortex	75
10	ARX Deficiency: A Novel Type of Lissencephaly	81
11	Final Considerations: The Unique Features of Human Brain Development . .	82
	References	84
	Subject Index	113
