Diagnosis: Imaging Procedures

1

1 Craniocerebral Diseases

3

Methods and Normal Findings	4	Transcranial and Perioperative Sonography	33
Plain Films		Sonography of the Cervical Vessels .	34
<i>K. Sartor</i>	4	Nuclear Medicine Imaging	
Basic Principles and Applications ...	4	<i>M. Henze</i>	35
Survey Films and Special Views	4	Basic Principles and Applications ...	35
Conventional Tomography	8	Planar Imaging	35
Computed Tomography		Single Photon Emission Computed Tomography	35
<i>O. Jansen and K. Sartor</i>	8	Positron Emission Tomography	37
Standard Techniques	9	Normal Brain Maturation in Magnetic Resonance Imaging	
Special Techniques	10	<i>I. Mader and W. Grodd</i>	40
Image Data Postprocessing	12	4 Postnatal Months (Fig. 1.29)	42
Magnetic Resonance Imaging		8 Months (Fig. 1.30)	43
<i>S. Heiland and M. Skalej</i>	13	16 Months (Fig. 1.31)	44
Basic Principles and Applications ...	13	24 Months (Fig. 1.32)	45
Standard Techniques	15	3 Years (Fig. 1.33)	46
Special Techniques	17	Malformations and Developmental Abnormalities	49
Image Data Postprocessing	20	General Pathology and Neurology	
Magnetic Resonance Angiography ..	20	<i>H. Traupe and S. Trittmacher</i>	49
Magnetic Resonance Spectroscopy ..	21	Imaging Principles	
Angiography		<i>H. Traupe and S. Trittmacher</i>	50
<i>M. Forsting</i>	23	Abnormalities of Ventral Induction	
Basic Principles and Applications ...	23	<i>H. Traupe and S. Trittmacher</i>	50
Arch Aortography and Subclavian Angiography	24	Holoprosencephaly	50
Carotid Angiography	24	Neuroepithelial Cysts	51
Vertebral Angiography	25	Dandy-Walker Malformation	51
Retrograde Brachial Angiography ...	25	Abnormalities of Dorsal Induction	
Sinus Venography	25	<i>H. Traupe and S. Trittmacher</i>	52
Sonography		Encephaloceles	52
<i>K.-R. Atzor</i>	32		
Basic Principles and Applications ...	32		
Sonography in Newborns and Infants	32		

Chiari Malformation	52	Tumors and Tumor-like Diseases	86
Syringobulbia and		General Pathology and Neurology	
Syringohydromyelia	53	<i>C. Zimmer and H. Traupe</i>	86
Developmental Abnormalities		Imaging Principles	
of the Cerebral Cortex, Corpus Callosum,		<i>C. Zimmer and H. Traupe</i>	87
and White Matter		Supratentorial Tumors	
<i>W. Grodd</i>	54	<i>C. Zimmer and H. Traupe</i>	89
Abnormalities of Proliferation		Gliomas	89
and Migration	54	Neuronal Tumors	92
Dysgenesis of the Corpus Callosum .	57	Choroid Plexus Tumors	93
Developmental Abnormalities		Primary Lymphomas of the Brain ...	93
of the White Matter	58	Pineal Tumors	94
Parasagittal White-Matter Injury ...	59	Meningiomas and Nonmeningeal	
Neurocutaneous Syndromes		Mesenchymal Tumors	95
<i>M. Hermes</i>	61	Malformative and Germ Cell	
Neurofibromatosis	61	Tumors	97
Tuberous Sclerosis	62	Embryonal Tumors	98
Hippel–Lindau Disease	62	“New” WHO Tumors	99
Sturge–Weber Disease	62	Metastases	100
Hydrocephalus (Congenital Forms)		Infratentorial Tumors	
<i>M. Voges and G. Huber</i>	64	<i>U. Grzyska</i>	101
Communicating Hydrocephalus	64	Brainstem Gliomas	101
Noncommunicating Hydrocephalus .	65	Cerebellar Astrocytomas	103
Other Malformations and Developmental		Medulloblastomas	103
Abnormalities		Ependymomas	103
<i>G. Huber and M. Voges</i>	65	Choroid Plexus Papillomas	106
Porencephaly and Arachnoid Cysts .	65	Hemangioblastomas	106
Ectopia of the Posterior Pituitary ...	66	Neurinomas	108
Malformations of the Eye and Orbit .	66	Meningiomas	109
Cranial and Craniospinal		Malformative Tumors	109
Malformations	67	Metastases	109
Diagnostic Evaluation of Epilepsy		Tumors of the Sellar Region and Skull Base	
<i>B. Ostertun</i>	68	<i>W. Müller-Forell</i>	111
Traumatic Lesions	72	Pituitary Adenomas	112
General Pathology and Neurology		Craniopharyngiomas	114
<i>B. Haubitz</i>	72	Meningiomas	116
Imaging Principles		Optic and Hypothalamic Gliomas ...	117
<i>B. Haubitz</i>	72	Germinomas	118
Craniocerebral Injuries		Malformative Tumors	118
<i>B. Haubitz</i>	73	Chordomas and Chondromas	121
Brain Injuries	73	Paragangliomas	122
Subdural Hematoma	77	Metastases and Local Extensions	
Epidural Hematoma	79	from Regional Tumors	125
Vascular Injuries	80	Other Masses of the Sellar Region	
Skull Fractures	81	and Skull Base	126
Injuries of the Facial Skeleton		Pseudotumor cerebri	
<i>G. Albrecht</i>	82	<i>J. Reul</i>	130

Tumors of the Orbit		Diagnostic Principles	
<i>F.-E. Zanella</i>	131	<i>T. Herzog and B. Dietrich</i>	193
Intraocular Tumors	132	Pyogenic Bacterial Infections	
Retrobulbar Tumors		<i>T. Herzog and B. Dietrich</i>	195
with Optic Nerve Involvement	134	Epidural Abscess	195
Retrobulbar and Peribulbar Tumors		Subdural Empyema	196
without Optic Nerve Involvement ..	135	Brain Abscess	197
Other Orbital Tumors		Acute Bacterial Meningitis	
and Tumor-Simulating Diseases	136	and Ependymitis	198
Postoperative Findings	137	Septic-Embolic Focal Encephalitis ..	199
Tumors and Tumor-Simulating Diseases		Granulomatous Bacterial Infections	
of the Skull		<i>R. Kraft and K. Sartor</i>	199
<i>K. Sartor</i>	138	Tuberculosis	200
Vascular Diseases	141	Other Granulomatous Diseases	
General Pathology and Neurology		of Bacterial Origin	201
<i>O. Jansen and H. Brückmann</i>	141	CNS Involvement by Noninfectious	
Imaging Principles		Granulomatous Diseases	201
<i>O. Jansen and H. Brückmann</i>	141	Viral Infections	
Ischemic Brain Diseases		<i>W. Weber and H. Henkes</i>	202
<i>O. Jansen and H. Brückmann</i>	142	Herpes simplex Encephalitis	202
Focal Cerebral Ischemia	142	Herpes zoster Encephalitis	203
Acute and Chronic Vascular		Other Acute Viral Encephalitides ...	204
Encephalopathy	157	Progressive Multifocal	
Cerebral Hemorrhage		Leukoencephalopathy	204
<i>St. Bockenheimer</i>	160	Progressive Diffuse	
Hypertensive Hemorrhage	165	Leukoencephalopathy	205
Other Intracerebral Hemorrhages ...	167	Slow Virus Encephalitis	206
Subarachnoid Hemorrhage	168	Fungal Infections	
Other Vascular Diseases		<i>W. Weber and H. Henkes</i>	206
<i>M. Schumacher</i>	169	Parasitic Diseases	
Aneurysms		<i>W. Weber and H. Henkes</i>	207
<i>M. Schumacher</i>	170	Cysticercosis	207
Vascular Malformations		Other Parasitic Diseases	208
<i>M. Schumacher</i>	175	AIDS	
Dural AV Fistulas		<i>R. Kraft and K. Sartor</i>	209
<i>H. Sahl and M. Schumacher</i>	181	Infections and Inflammations of the Head	
Arterial Dissection		and Neck Region	
<i>H. Sahl and M. Schumacher</i>	182	<i>G. Albrecht and K. Sartor</i>	211
Moyamoya Disease		Sinusitis and Mastoiditis	211
<i>M. Schumacher</i>	184	Mucocoeles and Cholesterol	
Cerebral Venous and Dural Sinus		Granulomas	213
Thrombosis		Inflammatory Cranial Nerve	
<i>M. Orszagh and M. Schumacher</i>	184	Syndromes	215
Infections and Inflammations	192	Demyelinating and Degenerative	
General Pathology and Neurology		Diseases	218
<i>T. Herzog and B. Dietrich</i>	192	General Pathology and Neurology	
		<i>A. Schwartz</i>	218

Diagnostic Procedures		Secondary Degenerative Diseases	
<i>A. Schwartz</i>	219	of the Basal Ganglia	239
Demyelinating Diseases		Bilateral Thalamic Lesions	241
<i>A. Schwartz and A. Gass</i>	219	Other Diseases with Primary Neuronal	
Multiple Sclerosis	220	Involvement	
Acute Disseminated		<i>F. Hentschel</i>	241
Encephalomyelitis	223	Brain Atrophy and Dementia	
Central Pontine Myelinolysis	225	Brain Atrophy	241
Marchiafava–Bignami Disease	227	Dementia	242
Congenital White-Matter Diseases		Acquired Hydrocephalus	
(Leukodystrophies)		<i>F. Hentschel</i>	247
<i>W. Grodd</i>	227	Normal pressure Hydrocephalus	
Adrenoleukodystrophy	227	(Communicating Hydrocephalus) ...	247
Metachromatic Leukodystrophy ...	228	Noncommunicating Hydrocephalus .	249
Alexander Disease	228	Psychoses	
Canavan Disease	229	<i>F. Hentschel</i>	249
Pelizaeus–Merzbacher Disease	230	Affective Psychoses,	
Cockayne Syndrome	230	Anxiety and Panic Disorders	249
Mucopolysaccharidoses	231	Schizophrenia	250
Aminoacidopathies	232	Substance Abuse	
Degenerative Diseases with Primary		<i>F. Hentschel</i>	251
Involvement of the Deep Gray Matter		Iatrogenic Lesions and Effects of Medical	
<i>S. M. Hummel and M. Schumacher</i>	233	Conditions	254
Wilson Disease	233	Effects of Radiation and Chemotherapy	
Huntington Disease	235	<i>T. Hagen and M. Deinzer</i>	254
Hallervorden–Spatz Disease	235	Effects of Other Treatments and Medical	
Leigh Disease	237	Conditions	
Wernicke Encephalopathy	237	<i>T. Hagen and M. Deinzer</i>	257
Parkinson Disease and Multiple			
System Degenerations	238		

2 Spinal Diseases

261

Methods and Normal Findings	262	Myelography	
Plain Radiographs		<i>J. Reul</i>	271
<i>K. Sartor</i>	262	Basic Principles and Applications ...	271
Basic Principles and Applications ...	262	Standard and Special Techniques ...	272
Survey Films, Special Views,		Angiography	
and Tomograms	263	<i>M. Mull</i>	273
Computed Tomography		Discography	
<i>K.-R. Atzor and K. Sartor</i>	266	<i>J. Reul</i>	276
Basic Principles and Applications ...	266	Sonography	
Standard and Special Techniques ...	267	<i>K.-R. Atzor</i>	276
Magnetic Resonance Imaging			
<i>S. Heiland and K. Sartor</i>	270		

Nuclear Medicine Imaging	Injuries of the Sacrum and Coccyx
<i>M. Henze</i> 277	<i>M. Hermes and K. Sartor</i> 297
Planar Imaging 277	Perforating Injuries
Single Photon Emission Computed	<i>M. Hermes and K. Sartor</i> 297
Tomography 279	
Positron Emission Tomography 279	
Malformations and Developmental Abnormalities	Spinal Tumors and Tumor-like Diseases
<i>J. Reul</i> 280	<i>H. J. Freitag and C. Groden</i> 299
General Pathology and Neurology 280	General Pathology and Neurology 299
Imaging and Treatment Principles 281	Imaging Principles 299
Dysraphic Anomalies 281	Intramedullary Tumors 299
Meningocele, Myelomeningocele,	Astrocytomas 300
and Myelomeningocystocele 281	Ependymomas 300
Tethered Cord Syndrome 282	Other Intramedullary Tumors 301
Diastematomyelia 283	Extramedullary–Intradural Tumors 305
Lipomeningocele 283	Neurinomas 305
Dermal Sinus 283	Meningiomas 305
Neurenteric Cyst 283	Other Extramedullary–Intradural Tumors 306
Nondysraphic Anomalies 283	Extradural Tumors 306
Syringomyelia and Hydromyelia 284	Metastases 307
Congenital Tumors 284	Lymphomas 307
Anomalies and Malformations	Other Extradural Tumors 308
in Neurofibromatosis 284	Primary Spinal Tumors 308
Traumatic Lesions 285	Hemangiomas 308
General Pathology and Neurology	Aneurysmal Bone Cyst 309
<i>K. Sartor</i> 285	Other Benign or Conditionally
Imaging Principles	Benign Bone Tumors (Osteoid
<i>K. Sartor</i> 286	Osteoma, Osteoblastoma,
Injuries of the Cervical Spine	Osteochondroma) 309
<i>K. Sartor</i> 287	Malignant Primary Spinal Tumors .. 309
Fractures and Dislocations	Paravertebral Tumors 309
of the Upper Cervical Spine 288	
Fractures and Dislocations of the	Vascular Diseases
Midcervical and Lower Cervical	<i>M. Mull</i> 310
Spine 290	General Pathology and Neurology 310
Cervical Cord Injuries 292	Imaging Principles 310
Injuries of the Nerve Roots and Root	Spinal Vascular Malformations 311
Sleeves 294	Dural AV Fistulas 311
Injuries of the Thoracic and Lumbar Spine	Intradural and Extradural
<i>M. Hermes and K. Sartor</i> 294	AV Malformations 313
Fractures and Dislocations 295	Cavernous Hemangioma 313
Injuries of the Thoracic and Lumbar	Ischemic Infarction 314
Cord and Cauda equina 297	Spontaneous Epidural Hematoma 314

Infections and Inflammations	315	Degenerative Diseases of the Spine	325
General Pathology and Neurology		General Pathology and Neurology	
A. Schwartz	315	K. Sartor	325
Imaging Principles		Imaging Principles	
A. Schwartz	316	K. Sartor	325
Intradural Infections and Inflammations		Spondylogenic Diseases with Predominantly Radicular Symptoms	
A. Schwartz	316	K. Sartor	326
Transverse Myelitis	316	Spondylarthrosis and Uncovertebral	
Leptomeningitis and Arachnoiditis ..	316	Arthrosis of the Cervical Spine	326
Other Intradural Infections and Inflammations	318	Lateral Entrapment Syndrome of the Lumbar Spine	326
Extradural Infections and Inflammations		Spondylosis with Predominantly Medullary Symptoms	
M. Voges and G. Huber	318	M. Hermes	327
Spondylitis and Spondylodiscitis ...	318	Cervical Spondylosis with Stenosis .	327
Epidural Abscess	319	Calcifications of the Cervical	
Calcinosis intervertebralis in Children	319	Posterior Longitudinal Ligament	328
Rheumatic Diseases of the Spine		Combined Congenital and Acquired Lumbar Stenosis	328
G. Huber and M. Voges	321	Disk Herniations Including Postoperative Changes and Recurrence	
Demyelinating and Degenerative Diseases of the Spinal Cord		M. Hermes and K. Sartor	329
A. Schwartz	322	Lumbar Disk Herniations	330
General Pathology and Neurology, Imaging Principles	322	Cervical Disk Herniations	332
Spinal Multiple Sclerosis and Acute Disseminated Encephalomyelitis	323	Thoracic Disk Herniations	333
Multiple Sclerosis	323	Postoperative Changes and Recurrence	333
Acute Disseminated Encephalomyelitis	323	Other Diseases of the Spinal Column and Spinal Cord	
Other Demyelinating and Degenerative Diseases of the Spinal Cord	323	K. Sartor	335
		Diseases of the Brachial Plexus	335
		Radiation-Induced Changes	335
		Epidural Lipomatosis	335

3 Neuromuscular Diseases **337**

Methods and Normal Findings		Polyneuropathies	339
E. Keller and L. Solymosi	338	Myositis	340
Progressive Muscular Dystrophy	339	Other Muscular Diseases	342
Neurogenic Diseases	339		
Progressive Spinal Muscular Atrophy	339		

Treatment: Interventional Procedures**343****4 Endovascular Treatment of Craniocerebral Diseases****345****Materials and Methods***J.-P. Wakat and S. Bien* 346

Treatment Principles 346

Catheterization Techniques 346

Guidewire-Directed

Catheterization 346

Flow-Directed Catheterization 346

Embolic Materials 347

Balloons 347

Tissue Adhesives 347

Microparticles 348

Coils 348

Treatment of AV Malformations (Angiomas)*J.-P. Wakat and S. Bien* 348

Pathology and Pathophysiology 348

Endovascular Therapy 349

Complications of Endovascular

Therapy 351

Patient Selection 351

Treatment of AV Fistulas*J.-P. Wakat and S. Bien* 352

Carotid–Cavernous Fistula 352

Direct Carotid–Cavernous Fistulas .. 352

Indirect Carotid–Cavernous Fistulas . 354

Vertebral Artery Fistulas 354

Dural AV Fistulas 355

Treatment of Cerebral Aneurysms*J.-P. Wakat and S. Bien* 356

Pathology and Treatment Principles 356

Endovascular Therapy 356

Preoperative Devascularization of Hypervascular Tumors*H. Urbach and L. Solymosi* 358

Meningiomas 359

Juvenile Nasopharyngeal Fibromas 359

Paragangliomas 361

Thrombolysis*R. von Kummer* 363Thrombosis, Thrombolysis,
and Thrombolytic Agents 363

Indications and Contraindications 364

Indications 364

Contraindications 365

Delivery Methods and Dosages 365

Controlled Studies 366

Angioplasty*R. Kachel* 367

Preliminary Tests 368

Indications 368

Methods and Instrumentation 369

Previous Experience and Results 369

5 Endovascular Therapy and Other Minimally Invasive Treatments for Spinal Diseases**377****Materials and Methods***M. Mull* 378

Treatment Principles 378

Catheterization Techniques

and Embolic Materials 378

Catheterization Techniques

and Embolic Materials 379

Treatment of Angiodysplasias and AV Fistulas		
<i>M. Mull</i>	379	Methods, Results, and Complications 385
Dural AV Fistulas	379	Percutaneous Nucleotomy 385
AV Malformations (Angiomas)	379	Percutaneous Biopsy 386
Preoperative Devascularization of Hypervascular Tumors		Pain Management
<i>M. Schumacher</i>	382	<i>M. Schumacher</i>
Percutaneous Nucleotomy		Facet Joint Blockade
<i>J. Reul</i>	384	Sympathetic Blockade
Indications and Contraindications	384	Root Block
		Percutaneous Vertebroplasty
