

## Séminaire de Probabilités XL

Bearbeitet von  
Catherine Donati-Martin, Michel Émery, Alain Rouault, Christophe Stricker

Neuausgabe 2007. Taschenbuch. xi, 489 S. Paperback

ISBN 978 3 540 71188 9

Format (B x L): 15,5 x 23,5 cm

Wirtschaft > Betriebswirtschaft: Theorie & Allgemeines > Wirtschaftsmathematik und -

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung [beck-shop.de](http://beck-shop.de) ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

---

## Contents

---

### Part I Specialized Course

---

|                                                                                            |   |
|--------------------------------------------------------------------------------------------|---|
| <b>An Introduction to (Stochastic) Calculus with Respect to Fractional Brownian Motion</b> |   |
| <i>Laure Coutin</i> .....                                                                  | 3 |

---

### Part II Local Time-Space Calculus

---

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| <b>A Change-of-Variable Formula with Local Time on Surfaces</b>                                             |     |
| <i>Goran Peskir</i> .....                                                                                   | 69  |
| <b>A Note on a Change of Variable Formula with Local Time-Space for Lévy Processes of Bounded Variation</b> |     |
| <i>Andreas E. Kyprianou, Budhi A. Surya</i> .....                                                           | 97  |
| <b>Integration with Respect to Self-Intersection Local Time of a One-Dimensional Brownian Motion</b>        |     |
| <i>Joseph Najnudel</i> .....                                                                                | 105 |
| <b>Generalized Itô Formulae and Space-Time Lebesgue–Stieltjes Integrals of Local Times</b>                  |     |
| <i>K. David Elworthy, Aubrey Truman and Huaizhong Zhao</i> .....                                            | 117 |
| <b>Local Time-Space Calculus for Reversible Semimartingales</b>                                             |     |
| <i>Nathalie Eisenbaum</i> .....                                                                             | 137 |
| <b>Elements of Stochastic Calculus via Regularization</b>                                                   |     |
| <i>Francesco Russo and Pierre Vallois</i> .....                                                             | 147 |
| <b>On the Smooth-Fit Property for One-Dimensional Optimal Switching Problem</b>                             |     |
| <i>Huyên Pham</i> .....                                                                                     | 187 |

**Part III Other Contributions**

---

|                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Strong Form of Stable Convergence</b><br><i>Irene Crimaldi, Giorgio Letta, Luca Pratelli</i> .....                                                                           | 203 |
| <b>Product of Harmonic Maps is Harmonic:<br/>A Stochastic Approach</b><br><i>Pedro J. Catuogno<sup>1</sup>, Paulo R.C. Ruffino<sup>2</sup></i> .....                              | 227 |
| <b>More Hypercontractive Bounds for Deformed Orthogonal<br/>Polynomial Ensembles</b><br><i>Michel Ledoux</i> .....                                                                | 235 |
| <b>No Multiple Collisions for Mutually Repelling Brownian<br/>Particles</b><br><i>Emmanuel Cépa and Dominique Lépine</i> .....                                                    | 241 |
| <b>On the Joint Law of the <math>L^1</math> and <math>L^2</math> Norms of a 3-Dimensional<br/>Bessel Bridge</b><br><i>Larbi Alili, Pierre Patie</i> .....                         | 247 |
| <b>Tanaka Formula for Symmetric Lévy Processes</b><br><i>Paavo Salminen, Marc Yor</i> .....                                                                                       | 265 |
| <b>An Excursion-Theoretical Approach to Some Boundary<br/>Crossing Problems and the Skorokhod Embedding<br/>for Reflected Lévy Processes</b><br><i>Martijn R. Pistorius</i> ..... | 287 |
| <b>The Maximality Principle Revisited:<br/>On Certain Optimal Stopping Problems</b><br><i>Jan Oblój</i> .....                                                                     | 309 |
| <b>Correlated Processes and the Composition of Generators</b><br><i>Nathanaël Enriquez</i> .....                                                                                  | 329 |
| <b>Representation of the Martingales for the Brownian Snake</b><br><i>Laurent Serlet</i> .....                                                                                    | 343 |
| <b>Discrete Sampling of Functionals of Itô Processes</b><br><i>Emmanuel Gobet, Stéphane Menozzi</i> .....                                                                         | 355 |
| <b>Itô's Integrated Formula for Strict Local Martingales with<br/>Jumps</b><br><i>Oleksandr Chybirjakov</i> .....                                                                 | 375 |

|                                                                               |     |
|-------------------------------------------------------------------------------|-----|
| <b>Enlargement of Filtrations and Continuous Girsanov-Type<br/>Embeddings</b> |     |
| <i>Stefan Ankirchner, Steffen Dereich, Peter Imkeller</i> .....               | 389 |
| <b>On a Lemma by Ansel and Stricker</b>                                       |     |
| <i>Marzia De Donno and Maurizio Pratelli</i> .....                            | 411 |
| <b>General Arbitrage Pricing Model: I – Probability Approach</b>              |     |
| <i>Alexander Cherny</i> .....                                                 | 415 |
| <b>General Arbitrage Pricing Model: II – Transaction Costs</b>                |     |
| <i>Alexander Cherny</i> .....                                                 | 447 |
| <b>General Arbitrage Pricing Model: III – Possibility Approach</b>            |     |
| <i>Alexander Cherny</i> .....                                                 | 463 |
