

Contents

	<i>Preface</i>	xi
1	Overview	1
1.1	Historical and phenomenological aspects	1
1.2	Rigorous results	10
2	Two-body problems	23
2.1	General properties	23
2.2	Order of energy levels	29
2.3	Spacing of energy levels	56
2.4	The wave function at the origin, the kinetic energy, mean square radius etc.	67
2.5	Relativistic generalizations of results on level ordering	85
2.6	The inverse problem for confining potentials	96
2.7	Counting the number of bound states	121
3	Miscellaneous results on the three-body and N-body problem	136
	Appendix A: Supersymmetric quantum mechanics	146
	Appendix B: Proofs of theorems on angular excitations	151
	Appendix C: The Sobolev inequality	155
	<i>References</i>	159
	<i>Index</i>	166
