

## Dual Superconductor Models of Color Confinement

Bearbeitet von  
Georges Ripka

1. Auflage 2004. Buch. viii, 140 S. Hardcover

ISBN 978 3 540 20718 4

Format (B x L): 15,5 x 23,5 cm

Gewicht: 860 g

[Weitere Fachgebiete > Physik, Astronomie > Physik Allgemein > Theoretische Physik,  
Mathematische Physik](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung [beck-shop.de](http://beck-shop.de) ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

# Contents

- 1 Introduction** **1**
  
- 2 The Symmetry of Electromagnetism with Respect to Electric and Magnetic Charges** **7**
  - 2.1 The Symmetry between Electric and Magnetic Charges at the Level of the Maxwell Equations . . . . . 7
  - 2.2 Electromagnetism Expressed in Terms of the Gauge Field  $A^\mu$  Associated to the Field Tensor  $F^{\mu\nu}$  . . . . . 9
  - 2.3 The Current and World Line of a Charged Particle . . . . . 12
  - 2.4 The World Sheet Swept Out by a Dirac String in Minkowski Space . . . . . 13
  - 2.5 The Dirac String Joining Equal and Opposite Magnetic Charges . . . . . 16
  - 2.6 Dirac Strings with a Constant Orientation . . . . . 17
  - 2.7 The Vector Potential  $\vec{A}$  in the Vicinity of a Magnetic Monopole . . . . . 19
  - 2.8 The Irrelevance of the Shape of the Dirac String . . . . . 21
  - 2.9 Deformations of Dirac Strings and Charge Quantization . . . . . 23
  - 2.10 The Way Dirac Originally Argued for the String . . . . . 26
  - 2.11 Electromagnetism Expressed in Terms of the Gauge Field  $B^\mu$  Associated to the Dual Field Tensor  $\bar{F}^{\mu\nu}$  . . . . . 27
  
- 3 The Landau-Ginzburg Model of a Dual Superconductor** **33**
  - 3.1 The Landau-Ginzburg Action of a Dual Superconductor . . . . . 34
  - 3.2 The Landau-Ginzburg Action in Terms of Euclidean Fields . . . . . 36
  - 3.3 The Flux Tube Joining Two Equal and Opposite Electric Charges . . . . . 37

|          |   |           |
|----------|---|-----------|
| 3.3.1    | The Ball-Caticha Expression of the String Term . . . . .  | 38        |
| 3.3.2    | Deformations of the String<br>and Charge Quantization . . . . .                                     | 40        |
| 3.3.3    | The Relation Between the Dirac String<br>and the Flux Tube in the Unitary Gauge . . . . .           | 41        |
| 3.3.4    | The Flux Tube Calculated in the Unitary Gauge . . . . .   | 42        |
| 3.3.5    | The Electric Field and the Magnetic Current . . . . .   | 45        |
| 3.3.6    | The Abrikosov-Nielsen-Olesen Vortex . . . . .   | 46        |
| 3.3.7    | Divergencies of the London Limit . . . . .  | 47        |
| 3.4      | Comparison of the Landau-Ginzburg Model<br>with Lattice Data . . . . .                              | 48        |
| 3.5      | The Dielectric Function of the Color-Dielectric Model . . . . .                                     | 51        |
| 3.6      | The London Limit of the Landau-Ginzburg Model . . . . .   | 53        |
| 3.6.1    | The Gluon Propagator . . . . .  | 55        |
| 3.6.2    | The Energy in the Presence of Static Electric Charges<br>in the London Limit . . . . .              | 56        |
| 3.6.3    | The Confining Potential in the London Limit . . . . .   | 56        |
| 3.6.4    | Chiral Symmetry Breaking . . . . .  | 58        |
| 3.7      | The Field-Strength Correlator . . . . .   | 58        |
| 3.8      | The London Limit Expressed in Terms<br>of a Kalb-Ramond Field . . . . .                             | 62        |
| 3.8.1    | The Double Gauge Invariance . . . . .   | 62        |
| 3.8.2    | The Duality Transformation . . . . .  | 64        |
| 3.8.3    | The Quantification of the Massive<br>Kalb-Ramond Field . . . . .                                    | 65        |
| 3.8.4    | The Elementary Excitations . . . . .  | 67        |
| 3.8.5    | The Nambu Hierarchy of Gauge Potentials . . . . .   | 68        |
| 3.9      | The Hamiltonian of the Landau-Ginzburg Model . . . . .  | 69        |
| 3.10     | The Elementary Excitations<br>of the Landau-Ginzburg Model . . . . .                                | 70        |
| 3.11     | The Two-Potential Zwanziger Formalism . . . . .   | 72        |
| 3.11.1   | The Field Tensor $F^{\mu\nu}$ Expressed in Terms of Two<br>Potentials $A^\mu$ and $B^\mu$ . . . . . | 72        |
| 3.11.2   | The Zwanziger Action Applied<br>to a Dual Superconductor . . . . .                                  | 74        |
| 3.11.3   | Elimination of the Gauge Potential $A^\mu$ . . . . .  | 75        |
| <b>4</b> | <b>Abelian Gauge Fixing</b>   | <b>79</b> |
| 4.1      | The Occurrence of Monopoles in an Abelian Gauge . . . . .   | 81        |
| 4.1.1    | The Magnetic Charge of a $SU(2)$ Monopole . . . . .   | 81        |

|                 |  |            |
|-----------------|--|------------|
| 4.1.2           | The Magnetic Charges of $SU(3)$ Monopoles . . . . .  | 84         |
| 4.2             | The Maximal Abelian Gauge and Abelian Projection . . . . .                                       | 88         |
| 4.3             | Abelian and Center Projection on the Lattice . . . . .   | 90         |
| <b>5</b>        | <b>The Confinement of <math>SU(3)</math> Color Charges</b>                                       | <b>93</b>  |
| 5.1             | An Abelian $SU(3)$ Landau-Ginzburg Model . . . . .   | 93         |
| 5.1.1           | The Model Action and Its Abelian<br>Gauge Invariance . . . . .                                   | 93         |
| 5.2             | The Coupling of Quarks to the Gluon Field . . . . .  | 96         |
| 5.3             | The Energy of Three Static (Quark) Charges . . . . .   | 98         |
| 5.4             | Quantization of the Electric and Magnetic Charges . . . . .                                      | 100        |
| 5.5             | Flux Tubes Formed by the Electric and Magnetic Fields . . .                                      | 101        |
| 5.6             | A Weyl Symmetric Form of the Action . . . . .  | 103        |
| <b>Appendix</b> |  |            |
| <b>A</b>        | <b>Vectors, Tensors, and Their Duality Transformations</b>                                       | <b>109</b> |
| A.1             | Compact Notation . . . . .   | 109        |
| A.2             | The Metric $g^{\mu\nu}$ and the Antisymmetric Tensor $\varepsilon^{\mu\nu\alpha\beta}$ . . . . . | 110        |
| A.3             | Vectors and Their Dual Form . . . . .  | 110        |
| A.3.1           | Longitudinal and Transverse Components<br>of Vectors . . . . .                                   | 111        |
| A.3.2           | Identities Involving Vectors . . . . .   | 111        |
| A.3.3           | Identities Involving Vectors<br>and Antisymmetric Tensors . . . . .                              | 112        |
| A.4             | Antisymmetric Tensors and Their Dual Form . . . . .  | 113        |
| A.4.1           | The Dual of an Antisymmetric Tensor . . . . .  | 113        |
| A.4.2           | The Zwanziger Identities . . . . .   | 113        |
| A.4.3           | Longitudinal and Transverse Components<br>of Antisymmetric Tensors . . . . .                     | 115        |
| A.5             | Antisymmetric and Dual 3-Forms . . . . .   | 116        |
| A.6             | Three-Dimensional Euclidean Vectors . . . . .  | 118        |
| A.6.1           | Cartesian Coordinates . . . . .  | 121        |
| A.6.2           | Cylindrical Coordinates . . . . .  | 121        |
| A.6.3           | Spherical Coordinates . . . . .  | 122        |
| <b>B</b>        | <b>The Relation between Minkowski and Euclidean Actions</b>                                      | <b>125</b> |
