

Magnetic Resonance Tomography

Bearbeitet von
Maximilian F Reiser, Wolfhard Semmler, Hedvig Hricak

1. Auflage 2007. Buch. liv, 1510 S. Hardcover
ISBN 978 3 540 29354 5
Format (B x L): 20,3 x 27,6 cm

[Weitere Fachgebiete > Medizin > Klinische und Innere Medizin > Neurologie,
Neuropathologie, Klinische Neurowissenschaft](#)

schnell und portofrei erhältlich bei

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beek-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1	Introduction	1
2	Basics of Magnetic Resonance Imaging and Magnetic Resonance Spectroscopy	3
2.1	Overview	5
2.2	Physical Basics <i>G. Brix</i>	8
2.2.1	Nuclear Spin and Magnetic Moment	8
2.2.2	Nucleus in a Magnetic Field	9
2.2.3	Macroscopic Magnetization	11
2.2.4	Dynamic of Magnetization I: Resonance Excitation	12
2.2.5	Dynamic of Magnetization II: Relaxation	13
2.2.6	The MR Experiment	18
2.2.7	Standard Pulse Sequences	19
2.2.8	Influence of the Electron Shell on the Local Magnetic Field	22
	References	25
	Suggested Reading	25
2.3	Image Reconstruction <i>G. Brix</i>	26
2.3.1	Magnetic Gradient Fields	26
2.3.2	Slice-Selective Excitation	27
2.3.3	Principle of Spatial Encoding within a Partial Volume: Projections	28
2.3.4	Methods of Image Reconstruction in MRI	30
2.3.5	Multiple-Slice Technique	34
	Suggested Reading	35
2.4	Image Contrasts and Imaging Sequences <i>G. Brix, H. Kolem, and W.R. Nitz</i>	36
2.4.1	Image Contrasts	36
2.4.2	Classical Imaging Sequences	37
2.4.3	Gradient-Echo Techniques	44
2.4.4	Modification of k -Space Sampling	53
2.4.5	Preparation Techniques	56
2.4.6	Sequence Families	57
	References	74
	Suggested Reading	75
2.5	Technical Components <i>M. Bock</i>	76
2.5.1	Magnet	76
2.5.2	Gradients	83

2.5.3	Shim	84
2.5.4	Radiofrequency System	85
2.5.5	Computer System	87
2.5.6	Patient Monitoring	88
2.5.7	Summary	90
	References	91
2.6	Contrast Agents	92
	<i>A. Huppertz and C.J. Zech</i>	
2.6.1	Physicochemical Properties of MR Contrast Agents	92
2.6.2	Dependency of Contrast Agents from the Magnetic Field Strength	94
2.6.3	Safety of MR Contrast Agents	95
2.6.4	Value of Contrast Agents in Clinical Practice	97
	References	108
2.7	Flow Phenomena and MR Angiographic Techniques	114
	<i>M. Bock</i>	
2.7.1	Introduction	114
2.7.2	MR Properties of Blood	114
2.7.3	Time-of-Flight MRA	114
2.7.4	Arterial Spin Labeling	117
2.7.5	Native-Blood Contrast	118
2.7.6	Black-Blood MRA	118
2.7.7	Velocity-Dependent Phase	120
2.7.8	Contrast-Enhanced MRA	121
2.7.9	Summary	127
	References	128
2.8	Diffusion-Weighted Imaging and Diffusion Tensor Imaging	130
	<i>O. Dietrich</i>	
2.8.1	Introduction	130
2.8.2	Physics of Diffusion	130
2.8.3	MR Measurement of Diffusion-Weighted Images	136
2.8.4	MR Measurement of Diffusion Tensor Data	141
2.8.5	Visualization of Diffusion Tensor Data	145
	References	149
2.9	Risks and Safety Issues Related to MR Examinations	153
	<i>G. Brix</i>	
2.9.1	Safety Regulations and Operating Modes	153
2.9.2	Static Magnetic Fields	153
2.9.3	Time-Varying Magnetic Gradient Fields	156
2.9.4	Radiofrequency Electromagnetic Fields	161
2.9.5	Special Safety Issues, Contraindications	164
	References	165
3	Brain, Head, and Neck	169
3.1	Brain: Modern Techniques and Anatomy	172
	<i>M. Wintermark, M.D. Wirt, P. Mukherjee, G. Zaharchuk, E. Barbier, and W.P. Dillon</i>	
3.1.1	Introduction	172
3.1.2	Diffusion-Weighted Imaging	173
3.1.3	Diffusion Tensor Imaging	175

3.1.4	Dynamic Susceptibility Contrast Imaging	178
3.1.5	Arterial Spin Labeling	179
3.1.6	Spectroscopy	183
	References	189
3.2	Normal Development, Congenital, Hereditary, and Acquired Diseases of the Central Nervous System in Pediatrics	193
	<i>B.B. Ertl-Wagner and C. Rummeny</i>	
3.2.1	Introduction	193
3.2.2	Examination Technique	193
3.2.3	Normal Development of the Brain	194
3.2.4	Congenital Disorders of the Brain	197
3.2.5	Phakomatoses	216
3.2.6	Hypoxic–Ischemic Injuries to the Pediatric Brain	226
3.2.7	Metabolic Diseases of the Pediatric Brain	231
	References	241
3.3	Intracranial Tumors	243
	<i>M. Essig</i>	
3.3.1	Introduction	243
3.3.2	The WHO Classification of Brain Tumors	243
3.3.3	Practical Aspects of MR Imaging in Brain Tumors	244
3.3.4	Blood–Brain Barrier and Tumor Enhancement: Mechanisms and Applications	245
3.3.5	Intra-Axial Cerebral Tumors	248
3.3.6	Extra-Axial Cerebral Tumors	273
3.3.7	Non-Tumorous Changes	288
3.3.8	Functional Imaging in Intracranial Tumors	290
	References	302
3.4	Cerebrovascular Disease	310
	<i>D.C. Bergen, J.M. Fagnou, and R.J. Sevick</i>	
3.4.1	Introduction	310
3.4.2	MR Technique	310
3.4.3	Acute Ischemic Stroke	311
3.4.4	Intracerebral Hemorrhage	327
3.4.5	Intracerebral Hemorrhage Etiology	334
	References	344
3.5	Intracranial Infections	348
	<i>E. Turgut Tali and Serap Gültekin</i>	
3.5.1	Meningitis	348
3.5.2	Empyema	355
3.5.3	Cerebritis and Abscess	357
3.5.4	Encephalitis	373
	References	378
3.6	Neurodegenerative Disorders	381
	<i>S. Karimi and A.I. Holodny</i>	
3.6.1	Introduction	381
3.6.2	Dementia	381
3.6.3	Disorders with Prominent Motor Disability	387
3.6.4	Hydrocephalus	389
3.6.5	Mesial Temporal Sclerosis	395
	References	396

3.7	Pituitary Gland and Parasellar Region	399
	<i>M. Kanagaki, N. Sato, and Y. Miki</i>	
3.7.1	Introduction	399
3.7.2	Examination Techniques	399
3.7.3	Normal Anatomy	400
3.7.4	Pathological Conditions	404
	References	429
3.8	The Orbits	433
	<i>N. Hosten, C. Zwicker, and M. Langer</i>	
3.8.1	Introduction	433
3.8.2	Examination Techniques	433
3.8.3	Normal Anatomy	434
3.8.4	Pathological Lesions	434
3.8.5	Differential Diagnosis	442
3.8.6	Diagnostic Procedures	442
	References	444
3.9	Magnetic Resonance of the Skull Base and Petrous Bone	445
	<i>R. Maroldi, D. Farina, A. Borghesi, E. Botturi, and C. Ambrosi</i>	
3.9.1	Introduction	445
3.9.2	Normal Anatomy	450
3.9.3	Lesions of the Skull Base	454
3.9.4	Lesions of the Temporal Bone	474
	References	481
3.10	Head and Neck	483
	<i>H.E. Stambuk and N.J. Fischbein</i>	
3.10.1	Introduction	483
3.10.2	Mucosal Diseases of the Head and Neck	484
3.10.3	Non-Mucosal Diseases of the Head and Neck	509
	Suggested Reading	533
4	Spine and Spinal Canal	535
4.1	Extradural Diseases of the Spine	536
	<i>C.S. Poon, J. Doumanian, G. Sze, M. Johnson, and C.E. Johnson</i>	
4.1.1	Introduction	536
4.1.2	Degenerative Spine Disease	536
4.1.4	Extradural Spine Tumors	562
4.1.5	Vertebral Column Trauma	574
	References	587
4.2	Intradural Extramedullary Spine	590
	<i>D. Lin</i>	
4.2.1	Introduction	590
4.2.2	Examination Techniques	590
4.2.3	Normal Anatomy	591
4.2.4	Pathological Findings	592
4.2.5	Indications and Value of MRI	613
	Acknowledgement	614
	References	614

4.3	Intramedullary Diseases of the Spinal Cord	617
	<i>P. Pawha, C. Shen, J. Doumanian, F. Lin, M. Johnson, R. Ashton, and G. Sze</i>	
4.3.1	MRI Techniques for Spinal Cord Imaging	617
4.3.2	Intramedullary Neoplasms	618
4.3.3	Vascular Diseases of the Spinal Cord	625
4.3.4	Demyelinating Disease	640
4.3.5	Radiation Myelopathy	647
4.3.6	Intramedullary Infectious and Inflammatory Diseases	649
4.3.7	Intramedullary Traumatic Injury	653
	References	659
5	Thorax and Vasculature	663
5.1	Lungs, Pleura, and Mediastinum	666
	<i>G. Layer and H.U. Kauczor</i>	
5.1.1	General Requirements for Imaging of Thoracic Organs	666
5.1.2	Basic MR Sequences for Imaging of the Chest	666
5.1.3	MRI of Ventilation	670
5.1.4	Use of Contrast Agents	671
5.1.5	Signal Intensities and Contrast Behavior	672
5.1.6	Normal Anatomy	672
5.1.7	Lung Diseases	674
5.1.8	Diseases of the Pleura	688
5.1.9	Mediastinal Disease	690
5.1.10	Differential Diagnosis	693
5.1.11	Value of MRI with Regard to Other Imaging Modalities	694
5.1.12	Diagnostic Procedure	696
	References	696
5.2	High-Risk Screening Breast MRI	700
	<i>E.A. Morris</i>	
5.2.1	Importance of Early Detection	700
5.2.2	Pathology of Breast Cancer: What Are We Looking for?	701
5.2.3	Why Consider MRI?	701
5.2.4	Defining the High-Risk Population	701
5.2.5	Overview of High-Risk MRI Screening Studies	704
5.2.6	Description of High-Risk Screening MRI Studies	704
5.2.7	National Guidelines	706
5.2.8	Current Issues with Using MRI for Screening	706
5.2.9	Increased Call-Backs and Biopsies	707
5.2.10	Inconsistency of DCIS Detection	707
5.2.11	MRI Interpretation	707
5.2.12	MRI Technique	708
5.2.13	Research Needed	708
5.2.14	Summary	709
	References	709
5.3	Heart	711
5.3.1	Acquisition Techniques and Protocols	711
	<i>B.J. Wintersperger</i>	
	References	717
5.3.2	Congenital Heart Disease: Cardiac Anomalies and Malformations	718
	<i>T.R.C. Johnson</i>	
	References	732

5.3.3	Primary Cardiomyopathies	734
	<i>K. Nikolaou</i>	
	References	742
5.3.4	Secondary Cardiomyopathies and Specific Heart Muscle Diseases	744
	<i>A. Huber</i>	
	References	750
5.3.5	Valvular Heart Diseases	751
	<i>A. Huber</i>	
	References	760
5.3.6	Pericardial Diseases	761
	<i>K. Bauner</i>	
	References	766
5.3.7	Ischemic Heart Disease	766
	<i>K. Nikolaou</i>	
	References	775
5.3.8	Cardiac Tumors	778
	<i>B.J. Wintersperger</i>	
	References	786
5.4	MR Angiography	788
5.4.1	MRA Techniques and Acquisition Techniques	788
	<i>H.J. Michaely and S.O. Schönberg</i>	
5.4.2	Pulmonary MRA	804
	<i>C. Fink</i>	
5.4.3	MRA of the Supra-Aortic and Intracranial Vasculature	809
	<i>C. Fink, U. Attenberger, H.J. Michaely, and S.O. Schönberg</i>	
5.4.4	MRA of the Renal Arteries	817
	<i>S.O. Schönberg and H.J. Michaely</i>	
5.4.5	Diseases of the Aorta	829
	<i>D. Theisen</i>	
5.4.6	Peripheral MRA	837
	<i>H.J. Michaely and H. Kramer</i>	
5.4.7	Whole-Body MRA	846
	<i>H. Kramer and H. Schlemmer</i>	
	References	851
6	Abdomen and Retroperitoneum	863
6.1	Abdominal MRI	864
	<i>N.C. Balci, E. Altun, K. Hermann, and R.C. Semelka</i>	
6.1.1	Introduction	864
6.1.2	Imaging Technique	864
6.1.3	Liver	864
6.1.4	Pancreas	886
6.1.5	Gallbladder and Bile Ducts	893
6.1.6	Bile Ducts	895
6.1.7	Spleen	897
6.1.8	Peritoneum	903
6.1.9	Gastrointestinal Tract	906
	References	909
6.2	Kidneys, Adrenals, and Retroperitoneum	912
	<i>H.J. Michaely, M. Laniado, and S.O. Schönberg</i>	
6.2.1	Introduction	912
6.2.2	General Examination Techniques	912

6.2.3	Kidney	913
6.2.4	Adrenal Gland	943
6.2.5	Lymph Nodes and Retroperitoneal Tumors	953
6.2.6	Psoas Muscle	958
	Suggested Reading	959
7	Pelvis	963
7.1	Female Pelvis	964
	<i>E. Sala and H. Hricak</i>	
7.1.1	Introduction	964
7.1.2	Magnetic Resonance Imaging Technique	964
7.1.3	Normal Anatomy	966
7.1.4	Uterus and Vagina	967
7.1.5	Adnexa	986
7.1.6	Miscellaneous Conditions	996
	References	997
7.2	Male Pelvis	999
7.2.1	Urinary Bladder	999
	<i>U.G. Müller-Lisse and U.L. Müller-Lisse</i>	
	References	1016
7.2.2	Male Pelvis: Prostate	1018
	<i>U.G. Müller-Lisse, M.K. Scherr, and U.L. Müller-Lisse</i>	
	References	1037
7.2.3	Male Pelvis: Scrotum	1039
	<i>U.G. Müller-Lisse, M.K. Scherr, C. Degenhart, and U.L. Müller-Lisse</i>	
	References	1054
7.2.4	Male Pelvis: Penis	1055
	<i>U.G. Müller-Lisse, M.K. Scherr, C. Degenhart, and U.L. Müller-Lisse</i>	
	References	1067
7.3	Pelvic Floor Assessment by Magnetic Resonance Imaging	1069
	<i>A. Maubon, C. Servin-Zardini, M. Pouquet, Y. Aubard, and J.P. Rouanet</i>	
7.3.1	Introduction	1069
7.3.2	MRI Anatomy	1069
7.3.3	Functional Anatomy of the Pelvic Floor	1069
7.3.4	MRI Techniques for Pelvic Floor Dysfunction	1070
7.3.5	Conclusion	1075
	References	1076
8	Musculoskeletal System	1079
8.1	Introduction	1081
	<i>C. Glaser, S. Weckbach, and M. Reiser</i>	
8.2	Examination Technique	1081
8.2.1	Patient Preparation and Positioning	1081
8.2.2	Coil Selection	1082
8.2.3	Imaging Planes	1082
8.2.4	MRI Sequences	1082
8.3	Relaxation Times, Signal Intensities, and Contrast Behavior	1086
	References	1086

8.4	Diseases of the Bone Marrow and Hematopoietic System	1086
8.4.1	Leukemia	1087
8.4.2	Multiple Myeloma	1088
8.4.3	Metastases and Malignant Lymphomas	1090
8.4.4	Storage Diseases	1091
8.4.5	Osteomyelofibrosis	1093
8.4.6	Aplastic Anemia and Sequelae of Chemotherapy and Radiotherapy	1093
8.4.7	Hemosiderosis, Hemochromatosis, and Sickle Cell Anemia	1093
	References	1094
8.5	Inflammatory Diseases of Bone and Joints	1094
8.5.1	Bacterial/Viral Infections	1094
	References	1106
	Suggested Reading	1106
8.6	Avascular Necrosis	1106
8.6.1	Avascular Necrosis of the Hip and Transient Bone Marrow Edema Syndrome	1107
8.6.2	Perthes Disease and Coxitis Fugax	1110
8.6.3	Bone Infarction	1113
8.6.4	Kienboeck's Disease	1113
8.6.5	Necrosis of the Scaphoid Bone	1114
8.6.6	Osteochondritis Dissecans and Spontaneous Osteonecrosis of the Knee	1114
8.6.7	Osteonecrosis and Osteochondritis in Other Locations	1116
	References	1116
8.7	Imaging of Internal Joint Derangement	1117
8.7.1	Imaging of Normal Joint Structures	1117
8.7.2	Knee	1117
	References	1129
8.7.3	Shoulder	1130
	References	1140
8.7.4	Wrist	1141
	References	1145
8.7.5	Temporomandibular Joint	1146
8.7.6	Ankle and Foot	1147
	References	1151
8.7.7	Elbow	1151
	References	1155
8.8	Bone and Soft Tissue Tumors	1155
8.8.1	Intraosseous Tumor Extension	1155
8.8.2	Compact Bone	1158
8.8.3	Extraosseous Tumor Extension	1158
8.8.4	Soft Tissue Tumors	1161
8.8.5	Evaluation of Tumor Nature	1162
8.8.6	Tumor Classification	1164
8.8.7	Therapy Control	1167
	References	1168
8.9	Posttraumatic Alterations	1169
8.9.1	Bone Injuries	1169
	References	1172
8.10	Differential Diagnosis	1173

8.11	Diagnostic Value of MRI and Comparison with Other Imaging Modalities	1173
8.11.1	Bone Marrow	1174
8.11.2	Bone Tumors and Bone Metastases	1174
8.11.3	Infections	1174
8.11.4	Aseptic Osteonecroses	1174
8.11.5	Joints	1174
