Preface	vii
Contributors	xi

Part I. Methods for Exogenous Expression of Ion Channels in Cells

1 Functional Reconstitution of the Human Epithelial Na ⁺ Channel in a Mammalian Expression System Alexander Staruschenko, Rachell E. Booth, Oleh Pochynyuk, James D. Stockand, and Qiusheng Tong	3
2 Overexpression of Proteins in Neurons Using Replication-Deficient Virus Richard M. Ahlquist and Jane M. Sullivan	15
3 Exogenous Expression of Proteins in Neurons Using the Biolistic Particle Delivery System Nikita Gamper and Mark S. Shapiro	27

Part II. Methods for Studying Channel Structure–Function

4 Tertiary and Quaternary Structure Formation of Voltage-Gated Potassium Channels John M. Robinson, Andrey Kosolapov, and Carol Deutsch	41
5 Biophysical Approach to Determine the Subunit Stoichiometry of the Epithelial Sodium Channel Using the <i>Xenopus laevis</i> Oocyte Expression System Farhad Kosari, Shaohu Sheng, and Thomas R. Kleyman	53
6 Spectroscopy-Based Quantitative Fluorescence Resonance Energy Transfer Analysis Jie Zheng	65

Part III. Methods for Studying Channel Regulation and Physiological Function

7 Probing the Effects of Phosphoinositides on Ion Channels Chou-Long Huang	81
--	-----------

8	Epithelial Sodium Channel in Planar Lipid Bilayers Bakhrom K. Berdiev and Dale J. Benos	89
9	A Simple In Vivo Method for Assessing Changes of Membrane-Bound Ion Channel Density in <i>Xenopus</i> Oocytes Mouhamed S. Awayda, Weijian Shao, Ivana Vukojacic, and Abderrahmane Bengrine	101
10	Preparation of Cortical Brain Slices for Electrophysiological Recording Costa M. Colbert	117
11	Juxtacellular Labeling and Chemical Phenotyping of Extracellularly Recorded Neurons In Vivo Glenn M. Toney and Lynette C. Daws	127
12	Carbon Fiber Amperometry in the Study of Ion Channels and Secretion Duk-Su Koh	139
Part IV. Methods for Studying Channelopathies, Genetic Screening, and Molecular Biology		
13	Genetic Screening for Functionality of Bacterial Potassium Channel Mutants Using K ⁺ Uptake-Deficient <i>Escherichia coli</i> Lyubov V. Parfenova and Brad S. Rothberg	157
14	KCNQ1 K ⁺ Channel-Mediated Cardiac Channelopathies Gildas Loussouarn, Isabelle Baró, and Denis Escande	167
15	Tissue-Specific Transgenic and Knockout Mice Andrée Porret, Anne-Marie Mérillat, Sabrina Guichard, Friedrich Beermann, and Edith Hummler	185
