## Part One—Microbicides

<b>1</b>	<b>Introduction to microbicides</b>				
	W. PAULUS	3			
1.1	Micro-organisms-microbicides	3			
1.2	Evaluation of preservatives	7			
	References	8			
<b>2</b>	<b>Relationship between chemical structure and activity or mode of action of microbicides</b>				
	W. PAULUS	9			
2.1	Introduction	9			
2.2	Classification of microbicides	10			
2.2.1	Membrane-active microbicides	10			
2.2.2	Electrophilically active microbicides	13			
2.3	Microbial resistance to microbicides	20			
2.4	Effectiveness of microbicides and the duration of their effect	21			
2.5	Summary	22			
	References	22			
<b>3</b>	<b>R&amp;D in material protection: new biocides</b>				
	R. BRUNS, J. KAULEN, O. KRETSCHIK, M. KUGLER and H. UHR	25			
3.1	Introduction: situation of R&D in material protection	25			
3.2	Fungicides	25			
3.2.1	Azoles [II, 14.]	26			
3.2.2	Multiside inhibitors	27			
3.2.3	Chelating agents	29			
3.3	Bactericides	30			
3.3.1	Membrane-active compounds	30			
3.3.2	Electrophilic substances	31			
3.3.3	Chelating agents	33			
3.3.4	Inorganic bactericides	34			
3.4	Insecticides	34			
3.4.1	Pyrethroids	34			
3.4.2	Insect growth regulators	35			
3.4.3	Chloronicotinyne	37			
3.4.4	Phenylpyrazole	37			
3.5	Antifouling	38			
3.5.1	Copper and organic biocides	38			
3.5.2	Natural toxins	39			
3.5.3	Other concepts	40			
3.6	New approaches	41			
3.6.1	Antimicrobial enzymes	41			
3.6.2	Biofilms	41			
3.7	New technologies in research	42			
3.8	Testing of new biocides	43			
3.8.1	Screening for new fungicides	43			
3.8.2	Screening for new Antibacterials	43			
3.8.3	Screening for new insecticides	44			
3.8.4	Screening for new actives against marine antifouling	44			
3.8.5	High throughput screening	44			
3.9	Conclusion	44			
	References	45			
<b>4</b>	<b>Legislative aspects</b>				
<b>4.1</b>	<b>United States antimicrobial pesticide regulations</b>				
	S.C. OSLOSKY and D. PAWELLEK	47			
4.1.1	Introduction: Pesticides beyond the agricultural application	47			
4.1.2	Master plan wanted	47			
4.1.3	The enigma of classification	48			
4.1.4	A dialogue with a registrant	51			
4.1.5	Conclusion	62			
	References	63			
	Glossary	63			
<b>4.2</b>	<b>The European biocidal products directive</b>				
	B. SCHMIDT-SONNENSCHNEIN	65			
4.2.1	Introduction	65			
4.2.2	Content of the biocidal products directive	65			
	Definition of a biocidal product	65			
	Scope	65			
	Authorisation for placing on the market of biocidal products	66			
	Frame formulations	67			
	Mutual recognition	67			
	Provisional authorisation	68			
	Inclusion of an active substance in Annex I or IA	68			
	The substitution principle	69			
	Data protection	69			
	Research and development	69			
	Confidentiality	70			
	Classification, packaging and labelling of biocidal products	70			
	Advertising	71			
	Poison control	71			
	The Annexes	71			
	Summary	73			
4.2.3	Transitional measures and the review programme	74			
4.2.4	The technical guidance documents	74

**5.11 Disinfectants and sanitizers**

<b>J. GEBEL, A. KIRSCH-ALTENA, V. VACATA and M. EXNER</b>	<b>305</b>
5.11.1 Introduction	305
5.11.2 Historical review	306
5.11.3 Application fields	307
Human medicine	308
Food, industrial, domestic, and institutional areas	308
Veterinary field	308
5.11.4 Disinfection in the medical field/human medicine	308
Hands/Skin	308
Surfaces	309
Instruments	309
Laundry	310
5.11.5 Efficacy of disinfectants	310
Factors affecting the efficacy of disinfectants	310
Test methods	311
5.11.6 Normative and legislative regulations	311
Relevant laws	313
Regulatory procedures for active ingredients, end-use products, new and old biocides	313
Harmonized CEN standards	314
ISO-Standards	314
USA – EPA and FDA regulations	314
Summary	314
Acronyms and Abbreviations	315
References	315

**5.12 Microbicide applications in the leather industry**

<b>C. HAUBER</b>	<b>317</b>
5.12.1 Introduction	317
5.12.1.1 Historical development	317
5.12.1.2 The structure of the skin	317
5.12.2 Leather manufacture	318
5.12.2.1 Sensitive process steps	318
5.12.2.2 Damages caused by micro-organisms	318
5.12.2.3 Preservation of the raw hide	321
5.12.2.4 Preservation of semi-processed leather	321
Acknowledgments	323
References	324

**5.13 Microbial degradation of plastics**

<b>P. DYLINGOWSKY and R.G. HAMEL</b>	<b>325</b>
5.13.1 History of plastics and biocides for plastics	325
5.13.2 Susceptibility of plastics	326
Flexible PVC	326
Plasticizers	326
Other additives	327
Polyurethanes	327
TPE/TPR	327
Other plastics	328
Applications	328

18.1.2.	N-Alkyl(C <sub>8</sub> -C <sub>18</sub> )-N, N-dimethyl-N-benzylammonium chloride = Benzalkonium chloride	711	20.10.1.	Poly(tert.-butylaminoethyl) methacrylate	755
18.1.3.	Diisobutylphenoxyethoxyethyl-dimethylbenzylammonium chloride	712	20.11.	Antibiotics	756
18.1.4.	Di-n-decyl-dimethylammonium chloride (DDAC)	713	20.11.1.	Nisin A	756
18.1.5.	Dioctyl-dimethylammonium chloride	715	20.11.2.	Pimaricin	757
18.1.6.	N-Decyl-N-isononyl-N,N-dimethylammonium chloride	715	<b>21. OXIDIZING AGENTS</b>	<b>758</b>	
18.1.7.	Benzyl-cocoalkyl-dimethylammonium chlorides	716	21.1.	Peroxy Compounds	758
18.1.8.	1-Hexadecylpyridinium chloride monohydrate	717	21.1.1.	Hydrogenperoxid	758
18.1.9.	Dequalinium chloride	718	21.1.2.	Sodium perborate tetrahydrate	759
18.1.10.	3-(Trimethoxysilyl)-propyl-dimethyloctadecylammonium chloride	718	21.1.3.	Peroxyacetic acid	759
18.1.11.	Polymeric Quaternary Ammonium Compounds	720	21.1.4	Magnesium bis(2-carboxylate-monoperoxybenzoic acid) hexahydrate	760
18.1.12.	Tetraalkylphosphonium compounds (TAPC's)	722	21.1.5.	Higher peroxycarboxylic acids	761
18.2.	Long-Chain Alkylamines	723	21.2.	Halogens, Hypohalogenites and Halogen Releasing Compounds	762
18.2.1.	Dodecylamine	723	21.2.1.	Chlorine	763
18.2.2.	Bis(3-aminopropyl)dodecylamine	724	21.2.2a.	Sodium hypochlorite solution	763
18.2.3.	Fatty amine hydrochlorides (C <sub>8</sub> -C <sub>18</sub> ) derived from coconut oil	725	21.2.2b.	Calcium hypochlorite dihydrate	764
18.3.	Guanidines and biguanides	726	21.2.3.	Hypobromous acid	765
18.3.1.	Cocospolylenediamine-1,5-bis-guanidiniumacetate	726	21.2.4.	Chlorine dioxide	766
18.3.2.	Bis(guanidinooctyl)amine triacetate	727	21.2.5.	Chloramine-T	767
18.3.3.	Poly(hexamethylenebiguanide) hydrochloride (PHMB)	727	21.2.6.	Dichloroisocyanuric acid sodium salt dihydrate	767
18.3.4.	1,6-Di(4'-chlorophenyl-diguanido)hexane	729	21.2.7.	Trichloroisocyanuric acid	768
18.4.	Ampholytes	732	21.2.8.	Trichloromelamine (TCM)	769
18.4.1.	Dodecyl-di(aminoethyl)glycine	732	21.2.9.	N-Chlorosuccinimide (NCS)	770
18.4.2.	n-Dodecyl-β-aminopropionic acid	733	21.2.10.	1,3-Dichloro-5,5-dimethylhydantoin (DCDMH)	770
			21.2.11.	1-Bromo-3-chloro-5,5-dimethylhydantoin (BCDMH)	771
			21.2.12.	Poly(vinyl-pyrrolidone) iodine	772
			21.3.	Sodium iodate	773
