

## Introduction to Medical Geology

Bearbeitet von  
C. B. Dissanayake, Rohana Chandrajith

1. Auflage 2009. Buch. xvi, 297 S. Hardcover  
ISBN 978 3 642 00484 1  
Format (B x L): 15,5 x 23,5 cm  
Gewicht: 631 g

[Weitere Fachgebiete > Medizin > Human-Medizin, Gesundheitswesen > Medizin, Gesundheitswesen allgemein](#)

schnell und portofrei erhältlich bei

The logo for beck-shop.de features the text 'beck-shop.de' in a bold, red, sans-serif font. Above the 'i' in 'shop' are three red dots of increasing size. Below the main text, 'DIE FACHBUCHHANDLUNG' is written in a smaller, red, all-caps, sans-serif font.

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung [beck-shop.de](http://beck-shop.de) ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

|                                                              |           |
|--------------------------------------------------------------|-----------|
| <b>CHAPTER 1: INTRODUCTION.....</b>                          | <b>1</b>  |
| Historical perspectives.....                                 | 1         |
| We are what we eat and drink.....                            | 5         |
| Deficiencies, excesses and imbalances of trace elements..... | 8         |
| <br><b>CHAPTER 2: GEOCHEMISTRY OF THE TROPICAL</b>           |           |
| <b>ENVIRONMENT.....</b>                                      | <b>19</b> |
| Tropical environment .....                                   | 19        |
| Arid zone .....                                              | 20        |
| Seasonally dry tropics and sub-tropics .....                 | 21        |
| Humid tropics and sub-tropics .....                          | 21        |
| Mountainous zone.....                                        | 22        |
| Rock weathering and soil formation in the tropics .....      | 24        |
| Tropical weathering of mineralized terrains .....            | 29        |
| Weathering profiles .....                                    | 30        |
| Weathering of nickeliferous serpentinites .....              | 30        |
| Formation of secondary minerals .....                        | 32        |
| Chemistry of weathering of ultra-basic rocks .....           | 33        |
| Hydrogeochemistry of the tropical environment .....          | 35        |
| <br><b>CHAPTER 3: BIOAVAILABILITY OF TRACE ELEMENTS</b>      |           |
| <b>AND RISK ASSESSMENT.....</b>                              | <b>47</b> |
| Bioaccumulation .....                                        | 47        |
| Bioavailability .....                                        | 48        |
| Risk assessment .....                                        | 51        |
| Aspects of epidemiology in medical geology .....             | 54        |
| Causation and correlation .....                              | 55        |
| Homeostasis in medical geology .....                         | 56        |
| <br><b>CHAPTER 4: MEDICAL GEOLOGY OF FLUORIDE .....</b>      | <b>59</b> |
| Geochemistry of fluoride .....                               | 60        |
| Geochemistry of fluoride in weathering and solution .....    | 62        |
| Fluoride in soils .....                                      | 66        |
| Fluoride in sediments .....                                  | 66        |
| Fluoride in plants .....                                     | 67        |

|                                                                |            |
|----------------------------------------------------------------|------------|
| Fluorides and health .....                                     | 69         |
| Bioavailability of fluoride .....                              | 69         |
| Dental fluorosis .....                                         | 71         |
| Skeletal fluorosis .....                                       | 76         |
| Case studies .....                                             | 78         |
| Dental fluorosis in Sri Lanka .....                            | 78         |
| Distribution of fluoride in the groundwater of Sri Lanka ..... | 81         |
| Dental fluorosis in India .....                                | 84         |
| Fluorosis in the east African rift valley .....                | 87         |
| Endemic fluorosis in China .....                               | 92         |
| Brick tea fluorosis in China .....                             | 94         |
| Defluoridation of high fluoride groundwater .....              | 95         |
| <b>CHAPTER 5: IODINE GEOCHEMISTRY AND HEALTH.....</b>          | <b>99</b>  |
| The iodine cycle in the tropical environment .....             | 99         |
| Iodine sorption on clays and humic substances .....            | 109        |
| Effect of microbial activity on iodine geochemistry .....      | 111        |
| Iodine in drinking water .....                                 | 112        |
| Iodine in food .....                                           | 112        |
| Plate tectonics, high altitudes and iodine cycling .....       | 114        |
| Iodine and health .....                                        | 117        |
| Iodine Deficiency Disorders (IDD) .....                        | 117        |
| Endemic cretinism .....                                        | 120        |
| Goitrogens .....                                               | 121        |
| Endemic goitre in Sri Lanka .....                              | 125        |
| The Endemic goitre belt of India and Maldives .....            | 130        |
| Goitre in Vietnam .....                                        | 132        |
| Iodine deficiency in China .....                               | 132        |
| Iodine deficiency in East Africa .....                         | 135        |
| <b>CHAPTER 6: NITRATES IN THE GEOCHEMICAL</b>                  |            |
| <b>ENVIRONMENT.....</b>                                        | <b>139</b> |
| The nitrogen cycle .....                                       | 139        |
| Nitrates, fertilizers and environment .....                    | 142        |
| Nitrogen loading in rice fields .....                          | 147        |
| Nitrates from human and animal wastes .....                    | 148        |
| Nitrates and health .....                                      | 153        |
| Nitrates and methaemoglobinaemia .....                         | 153        |
| Nitrates and cancer .....                                      | 154        |

|                                                                                                              |                |
|--------------------------------------------------------------------------------------------------------------|----------------|
| <b>CHAPTER 7: MEDICAL GEOLOGY OF ARSENIC .....</b>                                                           | <b>157</b>     |
| Introduction .....                                                                                           | 157            |
| Arsenic in rocks and minerals .....                                                                          | 161            |
| Arsenic in soils .....                                                                                       | 161            |
| Arsenic in natural waters .....                                                                              | 164            |
| Arsenic adsorption and desorption .....                                                                      | 168            |
| Microorganisms and their impact on arsenic speciation<br>and mobility .....                                  | 169            |
| Medical geology of arsenic- the West Bengal,<br>Bangladesh example .....                                     | 175            |
| Bangladesh basin-geography and geology .....                                                                 | 175            |
| Sediment characteristics .....                                                                               | 176            |
| Mineralogy and geochemistry of sediments .....                                                               | 178            |
| Organic matter .....                                                                                         | 179            |
| The scale of the problem .....                                                                               | 179            |
| The geochemical mechanisms of arsenic mobility in the<br>Bengal basin .....                                  | 181            |
| Distribution of arsenic in the aquifer system .....                                                          | 181            |
| Geochemical mechanism of arsenic mobility .....                                                              | 183            |
| Arsenic in rice and other crops .....                                                                        | 185            |
| Health effects of arsenic .....                                                                              | 186            |
| <br><b>CHAPTER 8: WATER HARDNESS IN RELATION TO<br/>CARDIOVASCULAR DISEASES AND<br/>URINARY STONES .....</b> | <br><b>191</b> |
| Water hardness .....                                                                                         | 192            |
| Cardio-protective role of calcium and magnesium .....                                                        | 192            |
| Geochemical basis for tropical endomyocardial fibrosis (EMF) .....                                           | 197            |
| Effect of water hardness on urinary stone formation (urolithiasis) ....                                      | 200            |
| Types of stones .....                                                                                        | 202            |
| Calcium oxalate .....                                                                                        | 202            |
| Calcium phosphate .....                                                                                      | 202            |
| Uric acid .....                                                                                              | 202            |
| Magnesium ammonium phosphate stones.....                                                                     | 202            |
| Cysteine .....                                                                                               | 203            |
| <br><b>CHAPTER 9: SELENIUM- A NEW ENTRANT TO<br/>MEDICAL GEOLOGY.....</b>                                    | <br><b>205</b> |
| The geochemistry of selenium in the environment .....                                                        | 205            |
| Microbial transformation of selenium .....                                                                   | 211            |
| Dissimilatory reduction .....                                                                                | 212            |
| Assimilatory reduction .....                                                                                 | 213            |
| Oxidation .....                                                                                              | 215            |
| Methylation and volatilization .....                                                                         | 215            |

|                                                                                                         |            |
|---------------------------------------------------------------------------------------------------------|------------|
| Selenium and human and animal health .....                                                              | 216        |
| Immune function .....                                                                                   | 217        |
| Viral infection- AIDS .....                                                                             | 217        |
| Reproduction .....                                                                                      | 217        |
| Mood .....                                                                                              | 217        |
| Thyroid function .....                                                                                  | 218        |
| Cardiovascular diseases .....                                                                           | 218        |
| Oxidative-stress or inflammatory conditions .....                                                       | 218        |
| Cancer .....                                                                                            | 218        |
| Selenium deficiency diseases in China .....                                                             | 219        |
| Selenium and iodine deficiency diseases (IDD) .....                                                     | 222        |
| <b>CHAPTER 10: GEOLOGICAL BASIS OF PODOCONIOSIS,<br/>GEOPHAGY AND OTHER DISEASES .....</b>              | <b>223</b> |
| Geophagy .....                                                                                          | 223        |
| Geophagy among animals .....                                                                            | 227        |
| Ingestion of geomaterials for human health-the medical concerns ....                                    | 229        |
| Podoconosis-a geochemical disease .....                                                                 | 231        |
| Natural dust and pneumoconiosis .....                                                                   | 234        |
| <b>CHAPTER 11: HIGH NATURAL RADIOACTIVITY IN<br/>SOME TROPICAL LANDS – BOON<br/>OR BANE? .....</b>      | <b>237</b> |
| Terrestrial radiation in beach sands in Brazil .....                                                    | 238        |
| Monazite rich beach sands of India .....                                                                | 240        |
| High natural radioactivity of the Minjingu phosphate mine,<br>Tanzania .....                            | 243        |
| Very high natural radiation in Ramsar, Iran .....                                                       | 243        |
| High natural background radiation in Yangjiang, China .....                                             | 245        |
| The Oklo natural reactor .....                                                                          | 245        |
| Radiation and health .....                                                                              | 247        |
| <b>CHAPTER 12: BASELINE GEOCHEMICAL DATA FOR<br/>MEDICAL GEOLOGY IN TROPICAL<br/>ENVIRONMENTS .....</b> | <b>251</b> |
| Geochemical mapping - China's example .....                                                             | 252        |
| Soil micronutrient maps in tropical countries and medical<br>geology .....                              | 255        |
| Future prospects for medical geology .....                                                              | 256        |
