

Perspectives in Modern Seismology

Bearbeitet von
Friedemann Wenzel

1. Auflage 2005. Buch. XI, 226 S. Hardcover

ISBN 978 3 540 23712 9

Format (B x L): 15,5 x 23,5 cm

Gewicht: 1150 g

[Weitere Fachgebiete > Geologie, Geographie, Klima, Umwelt > Geologie > Vulkanologie, Seismologie](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Introduction.....XI

An Earthquake Early Warning System for the Romanian Capital 1

Abstract..... 1

1. Introduction 1

2. Examples and Design Principles2

3. Design of an EWS for Bucharest.....4

4. Cost-Benefit Analysis.....9

5. A New Paradigm for Early Warning Systems 10

6. Conclusions 11

Acknowledgements 11

References 11

A Combined Geophysical/Engineering Approach for the Seismic Safety of Long-Span Bridges 13

Abstract..... 13

1. Introduction 13

2. Assessment of Site Effects..... 15

2.1 Data Acquisition 15

2.2 Data Analysis..... 16

2.3 Results 16

2.4 Ground Motion Scenarios..... 18

3. Vulnerability Assessment of Bridges 22

3.1 Modelling 22

3.2 Resonance Frequencies..... 23

3.3 Dynamic Simulations 26

4. Conclusions 28

Acknowledgements 29

References 29

Finite-Difference Simulations of the 1927 Jericho Earthquake..... 31

Abstract..... 31

1. Introduction 31

2. Earthquake Scenarios	35
3. Elastic and Computational Modeling Parameters.....	36
4. Discussion.....	38
4.1 Peak Ground Velocities	38
4.2 Spectral Accelerations	40
5. Summary.....	43
Acknowledgements	44
References	44
Nonlinear Seismology – The Seismology of the XXI Century	47
Abstract.....	47
1. Introduction	48
2. Geotechnical Evidence for Nonlinear Soil Behaviour.....	48
3. Constitutive and Dynamic Equations. Approximate Solutions of Wave Equations.....	51
3.1 Approximate Solutions of Wave Equations	52
3.2 Nonlinear SH Plane Waves Incident to a Solid-Solid Interface	53
4. Quantitative Evaluation of Nonlinearity.....	57
4.1 The Definition of the Spectral Amplification Factor (SAF).....	58
4.2 Spectral Amplification Factors for Recent Strong Vrancea Earthquakes	59
5. Discussion.....	63
6. Conclusions	65
Acknowledgements:	66
References	66
Small-Scale Mantle Plumes: Imaging and Geodynamic Aspects	69
Abstract.....	69
1. Introduction	70
2. Mantle Plumes	71
3. Observations	76
4. Eifel Plume	78
4.1 Seismological Anatomy.....	78
4.2 Excess Temperature and Buoyancy Flow	84
4.3 Comparison with Massif Central and Hawaii.....	87
5. Consequences and Discussion	88
5.1 Origin and Ascent.....	88
5.2 Scales of Plumes.....	89
6. Future Perspectives.....	90
Acknowledgements	91
References	91

Structure of the Upper Mantle Beneath Northern Eurasia Derived from Russian Deep-Seismic PNE Profiles.....	95
Abstract.....	95
1. Introduction: PNE Deep Seismic Sounding in Russia.....	96
2. The Upper Mantle Discontinuities at 660 and 520 km Depth	98
3. High-Frequency Scattering in the Uppermost Mantle	104
Acknowledgements	109
References	110
True Amplitudes: A Challenge in Reflection Seismology	115
Abstract.....	115
1. Introduction	115
2. Theory.....	118
3. The True-Amplitude Weight Function	120
4. Example	122
5. Conclusions	125
Acknowledgements	125
References	125
Imaging of Orebodies with Vertical Seismic Profiling Data	127
Abstract.....	127
1. Introduction	128
2. Description of the Problem	130
2.1 Scattering of the Elastic Wavefield	131
2.2 Spatial Ambiguity.....	132
3. Using Polarisation Information.....	133
4. A Synthetic Data Example.....	135
5. A Real Data Example	138
6. Conclusions	140
Acknowledgement	142
References	142
The Dead Sea Fault and Its Effect on Civilization.....	145
Abstract.....	145
1. Introduction	146
2. Crustal Structure	146
3. Evolution of Physiography	150
4. Ancient Hominids Out of Africa	152
5. Seismicity Along the Dead Sea Fault	154
5.1 Paleoseismic Record.....	156
5.2 Historical and Archeological Earthquake Record	158
5.3 Instrumental Record	160

5.4 Patterns of Seismicity	160
5.5 Example: Jericho	161
6. Discussion.....	162
Acknowledgements	163
References	163

Velocity Field of the Aegean-Anatolian Region from 3D Finite

Element Models.....	169
Abstract.....	169
1. Introduction	170
2. Tectonic Development of the Eastern Mediterranean	171
3. Geophysical, Geological and Geodetic Observations.....	172
4. Model Geometry	174
5. Model Assumptions and Boundary Conditions	174
6. Model Rheology and Material Properties.....	176
7. Model Results	177
7.1 Model 1 with Linear Newton Viscosity	178
7.2 Model 2 and 3 with Non-linear Viscosity	179
8. Discussion and Conclusions	181
Acknowledgments	184
References	184

Monitoring of Slab Detachment in the Carpathians 187

Abstract.....	187
1. Introduction	188
2. Tectonic Overview	190
3. Geophysical Data.....	191
4. Seismicity	192
5. Geodynamic Model	194
6. Kinematic Gravity Modelling.....	196
7. Conclusions	199
Acknowledgements	200
References	200

Modelling of Descending Slab Evolution Beneath the SE-Carpathians: Implications for Seismicity..... 203

Abstract.....	203
1. Introduction: Vrancea Seismicity and Geodynamics.....	204
2. Shear Stress Evolution Induced by the Descending Vrancea Slab – A Corner Flow Model	207
3. Past, Present and Future of the Vrancea Slab Inferred from Numerical Models	211

3.1 Model Description	212
3.2 Evolution of the Descending Slab from the Late Miocene to the Present	215
3.3 Evolution of the Descending Slab after Slab Break-Off.....	218
4. Discussion and Conclusions	220
Acknowledgements	221
References	222
List of Reviewers	225
